I have called Yaesu and they feel that there is a problem with this radio.
After reading many emails from other FT100 owners, I feel that this is not a
problem with other Ft100s.
I have done numerous tests with the radio.
I have keyed my HT in the house, sitting directly under the tower. Transmitting
500mw from the ht's rubber duck antenna, the FT100's meter read S-9+10,
transmitting 1 watt from HT, the FT100 displayed S-9+40, When I transmitted 5
watts from the HT, the FT100 finally showed full scale (S-9+60). The meter
should have been full scale at this distance with 1/2 watt.
I also was talking to my wife in her car. She has a 50 watt mobile. She was
transmitting full power about 3 miles away on simplex (146.54mhz). The
FT100's meter was reading S-3 to S-7 with a lot of static. Even when she was
less that a mile from the house, the meter on the FT100 was still just S-9+20.
It is not just the low S-Meter reading. The receiver is also very attenuated.
There is static and white noise on repeaters that are full scale and full quiet
on other radios that I have had hooked up to the same antenna.

For Sale:

A 1965 Cobra Cam88 CB, has the old channel which was referred to as "B", but which was actually channel 24. The rig has recently been gone through to the tune of well over $150.00. The chassis looks a little gooey to me and could use some cleaning up.
The channel knob is not the original, but it fits in very nicely with the scheme of things...you'd never know Otherwise. The S-Meter is a replacement, however it is EXACTLY the same size as the original except with a black face. The brushed aluminum face has a few minor flaws....nothing too terible. All the lettering is very good.
Comes with original Mic; from what I can gather, it is an Astatic hand held contracted by B/K, Output is near 4 watts. Modulation is very nice with a Tug8-D104.....punchy yet mellow. It has built in switchable speech compression; Cobra calls it "Dyna-Boost". It has power cords for both 13.8 VDC and 110 AC,

Also, I have a 1960 or 1961 Demco Power modulator. It's essentially a two tube preamp for use between the mic and mic input. I suspect that there is some collectablity factor here. It's missing the two tubes, and I'll be damned if I know what they are. I'm sure a Riders book could settle the score quickly. I can assure you this unit was working properly before I decided to salavage the tubes in all my pubescent pomposity. (duh) It'll need the proper amphenol mic connectors to be useable.

Also, I have a Cobra SR 900 16 channel scanner in fair cosmetic condition with with three preset NOAA freqs. It's operated from a 12 volt power adapter. It has an external antenna output Obviously, this is a primitive item, and might be good for the casual listener. I'll throw in the last two items if we can come to terms on a mutually satisfactory deal.

For Sale: Uniden pro 500B 40 channel CB. This is a gimme too.....I'll make you a great package deal. (I think it was 40.00 new!)

Now for something completley different, any call for THESE odd balls? I have two mint woofers for the JBL Model 4401 Control Monitor speakers. They appear to be 51/2" from surround to surround, or 61/2" from
one end of the brushed aluminum frame to the other. The speakers are mint with heavy magnets, rubber surrounds, and white cones. These origianlly served in radio monitor
duty, but the moronic jocks insisted on driving the weasely amp just past the point of distortion and subsequently turned the tweets to toast. You can have them naked, or I can ship with the cabinets, your choice. The cabinets are in pretty fair shape.

If you'd like to know more, Please email me cfries@ tic.bisman.com

I have several VHF and UHF Motorola Maxar radios for sale.

The VHF radios are 25 watt radios. All radios are two (2) channels; and come complete with radio, mic, heavy duty locking bracket, and power cord.

You will need to purchase the crystals for your favorite frequencies, and have the radios tuned to your specs.

Radios do include a PL reed, already installed.

VHF radios are $25.00 + $10.00 shipping.
UHF radios are $35.00 + $10.00 shipping.

Shipping is USPS Priority Mail. Radios are in great condition.

Going fast, but still several left. Respond to hutch@jerrylee.com for
immediate shipment.

Thanks,

Eric - N8XHP

Without trying to sound obnoxious, I might not corss post to areas that
would have little interest.

Good luck

Oddly enough, Mr. K....

YOU JUST DID!
Good Morning Kettle....this is the pot calling....YOU'RE BLACK!!!!!

Have a lovely day.

If everyone had pix this good, a lot of "problems" would be avoided!!!  Good job
Walt.

Do you just want a schematic for interest sake, or are you trying to
repair it?

Those date from 1976 and there isn't anything special about the circuitry.
I found an ad for them in the February 1976 issue of 73, but it doesn't
give much detail. There was a review of a Hufco counter some time later

in 73, but mine are not organized well enough to be able to find the article easily.

It's going to use a chain og 7490's to divide down the timebase, and a 7490 BCD counter/(maybe a latch, a 7475)/decoder per digit. There is nothing magical about that, and there really is only a set way to connect them up so you can easily get the details from all kinds of articles zbout building frequency counters. The only unique circuitry would be the input circuit and the rewet circuits.

The January 1976 issue of 73 has an article by Jim Huffman titled "A $50 Self-Powered Counter". It's an almost pocket size unit. It has three digits and a switch to see the rest of the decimal places. It shows the input circuitry, which is a 40673 MOSFET feeding a 7413 Schmitt trigger. I'm not looiing it up, but that's what was used in the K2OAW frequency counter which appeared in a multi-part article in 73 in 1972. I suppose there might be slight component variations. It gives some more details, but it's pretty much some stringing together of some module like circuit boards that the company made.

The February 1976 issue of 73 has another article by Jim Huffman, "What do You Want to Count?" It sort of goes into the explanation of those "modules". There's a three digit counting board, and on it each digit has a 7490 counter, a 7447 decoder and a 7-segment LED readout. It doesn't bother with a latch. There's another IC at the bottom of the board which I can't read, but a schematic for the board shows a 7400.

So if nobody comes up with the schematic, the question becomes: "What's inside?". Is it one whole board, or "modules"? What IC's are on the board? Unless the reference frequency comes from the AC line (it's been done!), there will be a crystal oscillator and a chain of 7490's to divide it down, and they will all be wired up the same way, since they are all dividing by ten.

The display units are going to be something like the above and layout itself will show a pattern. If it's a bad readout, you look up the decoder IC and see whether it's meant for common anode or common cathode, and then buy a new one. The pinout may be the same, but you can verify by the wiring on the circuit board, since the decoder is a known absolute.

The input circuitry may require some tracing, but if it's got a MOSFET and a 7413, chances are he used the K2OAW input circuitry, and you jast have to verify the match.

Another popular input circuitry came from a commercial frequency counter and when QST reviewed it, must have been 1972, they showed the circuitry. From there, it showed up in plenty of the frequency counter articles of the time. It was an FET and bipolar transistor buffer capacitor coupled to a 7404 with the first or the first two stages set for linear operation via a feedback resistor. I mention the circuit since it was popular and it might have possibly shown up in the Hufco counter.

If the reference chain is not working (you can check it by figuring out the dividing ratio and hooking an audio amplifier to a low frequency output (the 7490 data sheet will give you the proper pin) for a tone. Try a different crystal (anything in the same range will give you an indication, and if there's still no tone, then inject another oscillator into the input of the first 7490 (such as from one of those crystal oscillators in a metal can that fit a 14pin dip socket). You'll have to figure your other schemes if still nothing comes out; but since they are digital IC's they will either be working or not.

The reset circuitry may be the most difficult since there are all kinds of ways of doing it. On the other hand, if there are no latches the circuit will be even simpler than most that were published.

The counter may look complicated, because of the number of IC's, but most of the wiring is repetitive. Once you've figure out one digit, the rest will be the same.

Of course, if you've got a blank board this may not be too helpful, unless the IC numbers are silk screened on the board. If it's just a blank board, you'd do well to forget it. Not because it's too much trouble to build a frequency counter with such small scale integration IC's, but becuase it used straight 74xx series TTL that used a lot of current and didn't have very high frequency range and you could do it simpler today with better integrated logic, and more likely CMOS or Schottky.

Michael VE2BVW

Motorola Radius VHF GM900 Mobile. Model number M01KHK9AN3AN.
136-178MHz, 16 channels, with
    5-tone signalling. Cosmetically it is a 10/10. Transmits,
receives, and appears to work just fine, but it is sold as is.
    No mounting bracket, power cable or mic included (uses standard
Radius power cable and mic). Will have
    programmed before shipping if required. Buyers must prepay with an
Internationally Negotiable money order in
    US funds. Buyer pays actual shipping and insurance costs.

Listed on Ebay -->
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=95964502

Collection of ARRL Handbooks, 25 issues in all. Some duplicates as noted.

Due to the number, and my desire not to pack and ship separately, I have listed as a group using the following criteria:
Scale: ->
Excellent- Near New ->
Very Good- Slight binding cracks, slight folds, binding in good shape, no tears or damage ->
Good- Normal wear for age ->
Fair- Showing some wear

1942 Very Good
1945 Fair but cover is loose
1946 Good but small tear on binding cover
1946 Good
1947 Fair
1947 Good
1947 Fair
1950 Good

Need to check the steering diodes in the BC BPF for leakage. Quite often
the case with sets that have
had an open antenna attached while exposed to wind static, nearby
lightning, or transmitting into the
receiver, inadvertantly, of course. The latter usually takes the shunt and
some of the attenuator with it though. I think the other dude was trying
to say "things that do many things, can't do one thing well."
While there may be some truth to that statement, I find it hard to beleive
that the R&D team would
overlook any image, conversion mixing, or overload products that would
land(at least) in the amateur bands.

Good Morning, Mr. Steven S. Weber:

I suggest the following:

#1) Go back and read the original post. Did I say "SWR Meter", as you say, or did I say S-METER.   In the event you didn't know, they are usually two different items.

2)   Go back and read the original post again, dolt!   I DID NOT say they
were Identical.
I DID say however, that they were of identical SIZE. WHICH I STAND
BEHIND!!!!

3)   Ask yourself if there is something productive you could be doing,
rather than picking your nose and picking apart IMAGINED discrepancies in
other individual's posts.

4) Have a wonderful day, moron.

On Ebay: Click here for more info -->
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=97558259

T-195 Military Transmitters, Package of 2
Designed by Collins Radio, the T-195 is often found paired with the R392 receiver. An exceptionally heavy-duty transmitter, the T-195 is both waterproof and shockproof. By using two car batteries in series, the transmitter is perfect for vehicle use, or as a field day transmitter.

This package includes 2 of these transmitters. Both are in very good condition. As per most "de-milled" equipment, the meters have been removed. They have been replaced in one of the units. One unit makes full RF output; the other seems to have a problem with the Auto-Tune mech. I understand from Electric Radio that often these problems are a result of poor connections on the modules.

This heavy-duty transmitter covers 1.5-20MHz continuous. RF Power output is a solid 80-100W with nice sounding plate modulated AM. Emission modes are AM and CW.

Frequency coverage is in 4 bands using a Collins PTO. The unit features antenna Auto-Tuning, with two choices of antenna connections depending on feedpoint impedance.

Final tube uses a 4X150D, and 2-4X150D are used as modulators.

Dimensions are 11.5h X 22w X 14.25d. Weight is 135 lbs. Power requirement is 28VDC 42amps.

Due to the weight, the buyer must pick up in the Buffalo, NY area, or arrange pickup, crating and shipping at his/her cost.

Payment must be received in Postal Money Order, or Bank Check prior to shipping.

As always if you have any questions just email.

Tnx

73,

Bruce KG2IC

Need a couple items for this receiver - need an AF GAIN knob ( the knob with
the red insert ) and need top and bottom covers.

Thanks in advace for any help.

Tom Norris KA4RKT
badger@telalink.net

( for those wrting to ask "what is a G133F??" is a modified Collins
51S1 for aircraft signals intercept use. Nifty radio, a "51S1 in a box"
with a matte black backlit front and case that fints into no known type
of rack mount. )

I have need of a good power supply transformer for the Hallicrafters PS-2000
(for the SR-2000 Xcvr). If transformer good, will naturally consider
buying parts unit. If you have either, pls advise details/price/general
location/etc. Naturally, a direct/better substitute with
documentation/specs can be considered.
Thanks
dan

Model 23-25-220
Input voltage: 95-->130, or 175-->235, or 190-->260
Input Amps max: 23.2/12.6/11.6, dependent on input voltage strapping
Output: 120 or 240 volts at 2000VA (yes, two thousand!) max

For more info go to http://www.newark.com/C115_modules/3847.html

The model I have for sale is no longer made but it's very similar to Newark p/n 46F3371 (except for support of 480V). Please see the Newark page for details on regulation and isolation. This thing is much too heavy to ship, sorry but only local sales will be considered (I live roughly halfway between Chicago and Milwaukee, near Six Flags).

The nearest equivalent current model is over $1,500; mine can be yours for five hundred. It's in great shape and guaranteed healthy.

Thanks for taking the time to read this,
Carl Van Camp

I have a Dentron GLA-1000B 15-80M @ 400W linear for sale. Excellent
cosmetic and working condition. Have the info for the 10M mod but have
not done the mod yet. Uses a pair of 6LQ6 sweep tubes, currently wired
for 220V. Asking $300.00 + shipping but prefer to meet for pickup.

Have the following Linear AMP parts for sale, will not split up, all or nothing:

1: Peter Dahl plate transformer: Primary: 115/230 VAC Secondary: 1250 VAC @ 1.5 Amp CCS (this produces 3100 VDC under load in a voltage doubler supply - It's a big puppy!)

8: 1500uf @450V Computer Grade Filter Caps

2: 4CX1500b Eimac Tetrodes (good medical pulls)

1: 7.0V @ 15A(?) filament xformer (will have to be dropped down to 6.0V to use with the 4CX1500b)

1: Socket for 4CX1500b

1: Dual Squirel Cage blower fan for cooling, good pull from military equipment.

1: Copies of several plans for linears that use the 4CX1500b (including Collins linear)

Asking $400.00 + shipping for the lot.

Hi I am looking for a service manual for a Motorola UHF Micor Mobile.
The Motorola part number is 68-81015E70-H.

Please email ve7fet@NOSPAM.psychonet.net (removing the NOSPAM) with
price and condition.

Thanks,

Lee

WARNING ! The QST review of both the 706 and 706MKII identified a full power 100 watt spike at the start of reduced power transmissions. These should be used with EXTREME caution unless you want to fry the input circuit of your amp !!   It is NOT as cut and dry as he portrays.

IC706 AMPLIFIER INTERFACE

My new ICOM IC 706 amplifier interface plugs into the accessory connector on the rear of the 706 and provides a phono jack to which you can connect a cable to your amplifier relay. The interface can key any amplifier with DC antenna relays (the only one I'm aware of with an AC relay is a Collins 30L1 and I'm not sure there's) any problem with that either!). The interface incorporates a reed relay with a 250VDC 1 amp contact rating.   Only $29. plus $3 S&H

Order from Jack Schuster, W1WEF, 408 Thompson St, Glastonbury, CT 06033

The GLA-1000B uses four tubes in the final. When the 6LQ6/6JE6's go bad,
you can retro them into Svetlana EL-509's. I've done a few.

Ouch another testy tester.

Son, if you read my post I made no doubt about your quality. I raised the RF spike to spare others burned amps,especially solid state amps not rated for an input power of 100 watts. Is that OK with you ?

Gee-- isn't that a "standard" Icom "feature"? The 781 does this too.
Makes it tough to run low drive ceramic tube based amps.

I added a few things to my site...I got some new toys and love to show them off.
Icom PCR-100
Pro-2037
Pro-70
And I got back into the metal detecting hobby with a White's Eagle Spectrum.

I also added a FCC band plan page and a feedback page.

Wear it out!

AEA HF Antenna Analyzer

This is one of the best antenna testing units to come along in years. With it's digital readout, and ability to sweep a range of frequencies, antenna condition, SWR, feedpoint impedance, and losses can be determined in seconds.
Has output for capture on computer serial port (cable included!) for logging and monitoring antenna installations over time. Unit works perfectly and has seen little use.

Complete with carrying case, manuals, computer control cable and paperwork.

Payment must be received in certified funds or Postal Money Order prior to shippment. Buyer to pay shipping costs, your choice UPS or FedEX.

Tnx http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=98990222

Well, well, well, looks like the good old FCC has its share of jerks like ham radio. Ironic that they are telling hams THEY can't speak their minds on the air, when they are using government computers and work time for this. Daily Digest recipients received this today.....

Wonder what ARRL thinks ?

Try Techamerica (www.techamerica.com). Just pulled their website and they show
them is stock for $159. Don't think you'll find a good used one for that.
Nate KL3NP

I have finished with my final update on the items we will be taking to Dayton. Please be sure to read the info at the top of the page if you are interested in purchasing an item(s). If you emailed me about and item and I have not replied, it may be because I accidently deleted the message because of the large amount of replies or because the item is sold. I have marked all items that have been sold on the site. Hope to see everyone at the hamfest. Once again, the site address is:

http://www-personal.umich.edu/~robbinsm/heathkit.htm

Thanks,
Matt

Actually I've seen used ones on this list for $100, but far and few
between.  I have this radio myself and like it very much.
Good Luck.

I would like to buy an Altair 680, IMSAI 8080, or other Altair/IMSAI from
that era.  I want to add one of these units to my collection of items from
this era.  You may contact me directly at chipsndips@snet.net.

National FB-7XA in excellent condition, the black wrinkle paint is perfect, no scratches, dents, or corrosion inside or out. This has the crystal filter and comes with the FB-7 doghouse supply and the following OSC and DET coils: 80M, 40M, 20M, 10M, Bands "A" and "C" . The matching power supply is also in excellent shape. The only imperfection is a hole

drilled
on the right hand side of the cabinet near the bottom.

It is my understanding that there is an exemption of some type for amateur radio
equipment purchased for personal use (not resale). It's been a while and I don't
remember the details but I purchased a PTC-II from SCS in Germany for $900 plus
and was
not accessed any import duties on it.

the below listed repeater needs a 70cm motorola mobile duplexer.
it only runs 25 watts output on 70cm so it's a good match.
quite awhile ago, someone was selling them for $50 but no contact.
anyone out there care to help out the machine.
thanks for your time.

Yeah, and people are lulled into a false sense of security because everone has to "register," yet eBay never checks the registration information. I'm surprised we haven't heard more reports of fraud...

Thanks for the update!! Some of us out here actually appreciate being
informed of potential "scammers" !! Someone needs to turn the "lights on" on
these rodents!!!!
Not doing anything about it, only "Enables" them to continue there activity.
So, what I'm saying is don't stick your head in the sand and be an enabler
to these criminals!

-Enough said.

I'm looking for an S-100 bus modem. Yes, honest, S-100 bus, 300 baud modem.
I want to add it to an S-100 bus system I have and add one to my display
wall at work where I have a number of S-100 items. Any S-100 bus modem you
may have in that box of wires in the shack. I'll buy it from ya. I'd also
be interested in an acoustic modem (coupler) if you have one of those.
Please reply to me directly at chipsndips@snet.net.
Thanks.

Alan

I can never figure out why people use fake names out here instead of
just letting people know who they are and how they can be contacted.
Why are they h"hiding"? Man, am I going to get flamed on this one!

So what's the point? Undesirables are going to find were you live from an
nationwide ISP account and show up at your home?

Does not make sense to me as long as one does not give out an address or
send someone money who will defraud them.

Hello,

Does anyone here know anything about the Yaesu FT767? I'd like to know about
power output, modes, bands covered, how reliable
it is, whether the finals are solid state or tube, general coverage
frequency range, etc. I've looked for information about the 767 on the web,
but I haven't been able to find any. Can anyone help me?

Many thanks in advance,

There are many reasons. Perhaps some people don't like to advertise to the whole world who they are and the fact they own valuable, easy-to-steal, radio gear. Remember, these posts are accessible by millions worldwide, for virtually forever. A few people reading them might be less scrupulous than the average honest citizen.

Nice rig. I used to run one. It is an All mode General coverage solid state HF base rig. All the bells and wistles you could get on a rig 10 or so years ago. 100 watts except 40 on AM and FM if I remember correclty. Had space in the back to insert modules for 6and2 meters and 440 mhz. Nice setup if you had all three modules. I only had 2 meters and 440 but I loved it. The only reason I sold it is I'm not a serious enough ham to keep that much invested in a toy.

Quantity of 10 New NiCd battery packs at Ebay. to find the auction first go here:

http://cgi3.ebay.com/aw-cgi/eBayISAPI.dll?ViewListedItems&userid=boatman9&sort=3
&since=-1&page=1&rows=0

then select the auction hyper-link for the batteries.

These are Mitsubishi cellular telephone battery packs. Each pack contains five (5) size AA Nickel Cadmium rechargeable batteries. These are rated by the manufacturer at 850 MilliAmp hours. Since each cell is nominally 1.2 volts the entire pack is a 6 volts. These packs can be used by soldering onto the terminals or you can cut them open and remove the cells for use individually.

Connection to a digital camera can be made by soldering a small power cord onto the battery's positive and negative terminals and then attach the correct plug for your camera on the other end of the cord. Since the batteries are 850 mAH the correct charge rate is 85 MilliAmp for 14 to 16 hours. If you use the batteries individually you can simply charge them using an ordinary AA NiCd charger.

You get 10 of these packs for one price.

Of course any local with a scanner can usually get the same information by listening to normal 2M ragchewing and nets....and these people live right down the road.

There are many reasons to "hide".
I get net access as a perk with my job.
Last year I nearly got fired and/or lost my "net" access due to the
unholly amount of spam that one little post brought.
If anyone really wants to spend the time, they could almost certainly
track me down.  Any police agency would have no trouble "backtracking",
but the spammers are not that resosurcefull. Yet!
So, to any and all that dislike me hiding, tood bad, it is not going to
cange.  It is either this, or lurk only.
And I like to think that I have at least a little to contribute.

Hi,

I am looking for a FM board for my Kenwood TS930s. If you have one, or know where there is one available for sale at a reasonable price can you please let me know via Email to: timj@omen.net.au as I do not browse the news groups very often.

Thanks.

Tim. VK6EI Perth, Western Australia

PS I am will to pay shipping costs etc. from where you are.

Prices are cash pick-up in Vista, N. San Diego County, CA, else payment in advance by U.S.Postal Service Money Order, and will split cost of shipping & insurance. Contact Frank, KE6WOE, 760-941-9174, or email frankL@home.com with questions. No trades please.

(1) Complete Yaesu FT-50RD HT, 5 watt with FTT-12 Option (Digital Voice) with the following accessories: FNB-41 9.6V 600mah battery, FNB-49 6V
600mah battery, FBA-15 Battery Case (for AA Ni-Cads), MH-34B Speaker Mic, MH-37A Ear Mic, CT-30 Mic 'Y' Adapter, CN-3 DC adapter, CSC-V10 Cordura Case, RH-1 Rubber Protector Grip Strip, CLIP-10 Belt Clip, VC-23 VOX Headset, and NC-60B Charging Stand, ADMS-1c Software and programming cable. Radio never used except to program - like new condition. Over $650 new, sell for $395.

(2) Kenwood TM-231 2mtr mobile, excellent condition - $145

(3) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906MHz good condition - $300

(4) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906MHz with TV Video Option board, excellent condition - $355 (Sale in progress)

(6) RCI-2970 10Mtr all-mode (100 watt version). Works fine, however, digital display needs adjusting so as to be able to read from above display (how, I don't know). Reads fine level or below eye level with display. Otherwise good condition - $265.

(10) Kenwood TH-78A 2mtr/70cm dual band HT with ME-1 Memory Upgrade, Extended TX/RX, MAHA Speaker Mic, BT-8 NiCad (AA) Battery Case, PB-18 7.2V 1100mah battery, ANLI RD-88H Antenna - $300

(13) Portable 4 Band HT + Scanner Station: Comes with custom configured aluminum carrying case with cut-out foam lining, wired for 12 vdc to each HT and scanner position. Case opens to configure as operating stand and an external 12VDC power source (battery, powersupply, ??) plugs in to rear of case, powering all radios and scanner. Included in case accessories are a digital multimeter, BNC antenna adapters, battery clamps with cable for external case plug, small set of basic tools, 2 BNC to PL-259 coax cables and BNC to external suction cup glass antenna mount with coax cable. I built it for an ARES/RACES field mount-out kit.
Radios included:
a. Kenwood TH-78A 2mtr/70cm dual band HT with extended TX/RX, SMC-32 Speaker Mic, ME-1 Memory Upgrade, PB-14S 12V 800mah battery, PB-13 7.2v 700mah battery, ANLI RD-88 antenna

b. Kenwood TH-315A 220MHz HT, PB-2 8.4v 500mah battery, charger, SMC-30 speaker mic, AEA telescoping rod antenna

        c. Azden AZ-61 6mtr HT with Azden ARD-6m telescoping rod
antenna (and "rubber duck"), 2 BP-11A battery packs, BC-26 AC
adapter/charger, speaker mic

        d. RS Pro-43 scaner (30-54MHz, 118-194MHz, 220-512MHz,
806-999.9875MHz, external speaker, 12 to 9vdc adapter (built into
case), and 2 AA battery packs

        Case is designed so that when configured, all radios stand
vertical in their respective case cut-outs, and operate from the
case's 12vdc power (external) or can easily be individually removed
for operation outside of the case/stand. All radios are in excellent
condition, as well as the Pro-43 scanner. Would prefer local pick-up
so that you can see the value. I don't intend to split up the radios
at this time. $1095. Will include NIB RS 2mtr 35 watt amp (12vdc)
and assembled Ramsey Electronics PA-20 20 watt 220MHz amp (also 12vdc)
in the deal.

Thanks for reading this message. I am looking for information
from someone who has bought something on the news group
from an individual living in Canada. What are the import duties
or tariffs if any imposed by the US customs? I sure would hate to
buy this radio and find out that there is a 50% or more tariff on the thing!
 I have not found a clear answer on the 'net.

Thanks,
Randy KB8ASO   Milan, IN.

A lot of government agencies have web sites with all sorts of
information. Have you tried finding a web site for the U.S. Customs
Service?

All above are brand new in boxes with warrantee registration card, manuals, and all other literature. Never mounted. Asking for $475 and shipping for the COMPLETE set. Some have emailed that it is too much but they didn't realize the FTS-22 and YSK-8100 are $75 each. Serious responders only.
Thanks.

Randy:

If you live in the US and are purchasing something in Canada, only US customs
may impose duties on your purchase. If the product is made in the US or if
it's value us less than $50US, you will have not problems and to my knowledge,
no duties will be charged. If it is not either of the above, they will asses a
tax based on what it is (ie 5% or the such). You should check with them
concerning this. I'm not sure on this, but there may be brokerage fees charged
by the shipper to move it across the border.

I bought a music synthesizer last year for $300 USD, I think I paid $15 shipping for 10# and U.S. Customs charged a $30 tarif and there was a $25 fee from a broker or someone like that. I wouldn't bother doing it again unless its really a rare item.

I think you'll find that items for PERSONAL use do NOT require a broker.
UPS, however, assumes that EVERYTHING is commercial, so they feed things
thru a broker. For 30 bucks or so. Use the post office. Check with FEDEX, as
they may be more friendly, but at higher transport rates. There is a publication
put out
by U.S. Customs, outlining the rules. Be careful in following the rules.
Also be conscious that things like scanners that can receive cellular frequencies
can
be considered to be contraband, under U.S. law. /mark

Forsale;
Star Micronics. NX-2420 Color Printer w/24pin. Widetrack
With tractor printing. Includes complete users manual, printer
guide, tractor paper, printer cable, dust cover & extra printer
ribbon. It is scratch free & works great. It is as close to new
as it can be. Asking $55/bo Sorry can not ship.. Will include
like new printer cart/table for a few extra dollars.
Great for students or any small business needing multi-color
tractor work. High quality color or back & white print.

Hello,
Name is Bud I have e-mailed you once before how far are you from the East
Brunswick area I have not lived in N.J. very long and don't my way around yet
I might like to take a look at the power supply.
Thanks
Bud.

Prices are cash pick-up in Vista, N. San Diego County, CA, else
payment in advance by U.S.Postal Service Money Order, and will split
cost of shipping & insurance. Contact Frank, KE6WOE, 760-941-9174, or
email frankL@home.com with questions. No trades please.

(1) Complete Yaesu FT-50RD HT, 5 watt with FTT-12 Option (Digital

Voice) with the following accessories: FNB-41 9.6V 600mah battery, FNB-49 6V 600mah battery, FBA-15 Battery Case (for AA Ni-Cads), MH-34B Speaker
Mic, MH-37A Ear Mic, CT-30 Mic 'Y' Adapter, CN-3 DC adapter, CSC-V10 Cordura Case, RH-1 Rubber Protector Grip Strip, CLIP-10 Belt Clip, VC-23 VOX Headset, and NC-60B Charging Stand, ADMS-1c Software and programming cable. Radio never used except to program - like new condition. Over $650 new, sell for $395.

(2) Kenwood TM-231 2mtr mobile, excellent condition - $145

(3) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906MHz good condition - $300

(4) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906MHz with TV Video Option board, excellent condition - $355 (Sale in progress)

(6) RCI-2970 10Mtr all-mode (100 watt version). Works fine, however, digital display needs adjusting so as to be able to read from above display (how, I don't know). Reads fine level or below eye level with display. Otherwise good condition - $265.

(10) Kenwood TH-78A 2mtr/70cm dual band HT with ME-1 Memory Upgrade, Extended TX/RX, MAHA Speaker Mic, BT-8 NiCad (AA) Battery Case, PB-18 7.2V 1100mah battery, ANLI RD-88H Antenna - $300

(13) Portable 4 Band HT + Scanner Station: Comes with custom configured aluminum carrying case with cut-out foam lining, wired for 12 vdc to each HT and scanner position. Case opens to configure as operating stand and an external 12VDC power source (battery, powersupply, ??) plugs in to rear of case, powering all radios and scanner. Included in case accessories are a digital multimeter, BNC antenna adapters, battery clamps with cable for external case plug, small set of basic tools, 2 BNC to PL-259 coax cables and BNC to external suction cup glass antenna mount with coax cable. I built it for an ARES/RACES field mount-out kit.

Radios included:

a. Kenwood TH-78A 2mtr/70cm dual band HT with extended TX/RX, SMC-32 Speaker Mic, ME-1 Memory Upgrade, PB-14S 12V 800mah battery, PB-13 7.2v 700mah battery, ANLI RD-88 antenna

b. Kenwood TH-315A 220MHz HT, PB-2 8.4v 500mah battery, charger, SMC-30 speaker mic, AEA telescoping rod antenna

c. Azden AZ-61 6mtr HT with Azden ARD-6m telescoping rod antenna (and "rubber duck"), 2 BP-11A battery packs, BC-26 AC adapter/charger, speaker mic

d. RS Pro-43 scaner (30-54MHz, 118-194MHz, 220-512MHz, 806-999.9875MHz, external speaker, 12 to 9vdc adapter (built into case), and 2 AA battery packs

Case is designed so that when configured, all radios stand vertical in their respective case cut-outs, and operate from the case's 12vdc power (external) or can easily be individually removed for operation outside of the case/stand. All radios are in excellent condition, as well as the Pro-43 scanner. Would prefer local pick-up so that you can see the value. I don't intend to split up the radios at this time. $1095. Will include NIB RS 2mtr 35 watt amp (12vdc) and assembled Ramsey Electronics PA-20 20 watt 220MHz amp (also 12vdc) in the deal.

Many of us up here will decline to make a purchase from the US if they insist on using UPS for just that reason.
I got ding $145 brokerage on a $600 item once. I have found the US postal service
to be one of the best ways
to get stuff accross the 49th parallel.

Paul VE6LDS from the other side of the story

RCI-2970 10Mtr all-mode (100 watt version). Works fine, however digital display needs adjusting so as to be able to read from above

display. Reads fine level or below eye level with display. Otherwise
good condition - $265.

Price is cash pick-up in Vista, N. San Diego County, CA, else
payment in advance by U.S.Postal Service Money Order, + $5 towards
cost of shipping & insurance. Contact Frank, KE6WOE, 760-941-9174, or
email frankL@home.com with questions. No trades please.

This does not apply to amateur radio equipment.  There's NO duty on ham
equipment.  Otherwise for all other stuff there's Duty about 5-10% and
taxes about 7-8%.  Then if you use a broker it cost even more. If they
think you claimed too low they can appraise it for you at a using some
rediculous method.  If they catch you tring to hide it in a car they can
impound the car and charge you double duty and taxes to get your item
```

back or it goes to auction. Remember to mark whatever you are sending
clearly "AMATEUR RADIO EQUIPMENT" 73 Chris

I can understand all responces made to the request unknowingly Paul did not reconize the sorce of the ?,
we do have a problem with the cb's getting used wrong and there is no easy fix. Howevever the mods are easily done by a ham or anybody else that gets the info in the future why not deliver the info to a lic. ham via email and not public display it may only keep one radio from being modified for the wrong reason but it is a start.

I am looking for a reliable 2m all-mode rig w/mic and manual.
Must be 100% operational.  Minor cosmetic blemishes OK.

Have to trade all of the following:

1.  Alinco DJ-S11 -- pocket 2m HT w/sma swivel mod to allow
                            for a better antenna, as well as mobile antennas
                            and/or an amp.  Nice.  In original box w/manual.
2.  Radio Shack HTX-202 in original box w/battery, manual, etc. Nice.
3.  Radio Shack HTX-404 in original box w/battery, manual, etc. Nice.
4.  Shure 450T desk mic as-new in box w/manual
5.  D-104 mic w/amplified base (needs a little cleaning and tinkering)
6.  Kenwood TR-7200G 2m mobile w/original manual.  Nice.
7.  Motorola Mitrek 2m range rig w/control head, mic & cable harness
     Model # CT43JJA3900A (needs cleanup and mic needs cord and plug)
8.  GAP Titan vertical (needs work)

If a local pickup (Southern NH/Central MA) will throw in Panasonic
KX-P1124 mono printer and Citizen GSX-220 color printer.

All new in box (FTS-22 installed) with all manuals/papers and unfilled
warrantee card. I have only had it a week. Planned on using it but other
circumstances have come up. All gear is 100%. Radio and accessories still

in protective plastic. Selling all as a unit. Retail $820 for all. $500 and shipping takes it.

RX 110-1300 MHz
TX 144-148, 430-450Mhz   MARS/CAP Mod capable.

Kenwood TH-79A(D)

Kenwood TH-79A(D) 2m/70cm dual band handheld amateur radio transciever

Feature-packed handheld radio. Only used at hamfests and the occasional public service event. This radio is approximately 4 years old and has never given me any problems. Condition is excellent.

* 82 non-volatile memory channels with ID
* Dot-Matrix LCD and menu system
* Encoder/Decoder built-in
* Alphanumeric access to guide function
* Ability to receive two frequencies on the same band simultaneously
* 5 watts power

Package deal includes:

* PB-32 6v Battery
* PB-34 9.6v Batter
* BT-9 3-AA Battery case
* Wall Charger
* Swivel-type belt case

```
* Heath speaker/mic
* Ear-clip type boom speaker/mic

Gee, considering "Jun's" in L.A. is selling them new for $455 bucks, it
appears you need to reconsider your asking price!  Check out the latest
issue of QST ads...

I aquired a Swan 350 with a 117CX power supply some time ago. It was originally intended for my father, but we picked him up a Swan 500 instead. So, I don't really have any use for the radio, nice as it is.

I tuned it up tonight on 20 meters and was able to get around 200 watts out of the finals, and I didn't even have the load maxed out.

The reciever in this radio is of some of the best quality I have heard. I was surpised as to how sensitive it is.

But, alas, I am entirely too lazy to tune up this rig each time I want to use it. I much prefer to just turn on my Kenwood TS-450 and just operate.
:-)

The condition of the rig is an 8.5 out of 10. The power supply is not in a speaker enclosure, so you'd have to add your own speaker. But the cables and connectors are in very good shape.

I don't know what this radio is really worth, so I would appreciate offers from those seriously interrested.

Prices are cash pick-up in Vista, N. San Diego County, CA, else payment in advance by U.S.Postal Service Money Order, and will split cost of shipping & insurance. Contact Frank, KE6WOE, 760-941-9174, or email frankL@home.com with questions. No trades please.

(1) Complete Yaesu FT-50RD HT, 5 watt with FTT-12 Option (Digital Voice) with the following accessories: FNB-41 9.6V 600mah battery, FNB-49 6V 600mah battery, FBA-15 Battery Case (for AA Ni-Cads), MH-34B Speaker Mic, MH-37A Ear Mic, CT-30 Mic 'Y' Adapter, CN-3 DC adapter, CSC-V10 Cordura Case, RH-1 Rubber Protector Grip Strip, CLIP-10 Belt Clip, VC-23 VOX Headset, and NC-60B Charging Stand, ADMS-1c Software and programming cable. Radio never used except to program - like new condition. Over $650 new, sell for $395.

(2) Kenwood TM-231 2mtr mobile, excellent condition - $145

(3) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906MHz good condition - $300

(4) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906MHz with TV Video Option board, excellent condition - $355

(5) RCI-2950 10Mtr all-mode. Needs alignment, fair condition - $115

(6) RCI-2970 10Mtr all-mode (100 watt version). Works fine, however, digital display needs adjusting so as to be able to read from above display (how, I don't know). Reads fine level or below eye level with display. Otherwise good condition - $265.

(7) Complete Portable Packet Station: (SOLD)

(8) Kenwood TM-331A (SOLD)

(9) Alinco DR-600 (SOLD)

(10) Kenwood TH-78A 2mtr/70cm dual band HT with ME-1 Memory Upgrade, Extended TX/RX, MAHA Speaker Mic, BT-8 NiCad (AA) Battery Case, PB-18 7.2V 1100mah battery, ANLI RD-88H Antenna - $300

(11) ICOM W32A (SOLD)

(12) Azden PCS-7500H (SOLD)

(13) Portable 4 Band HT + Scanner Station: Comes with custom configured aluminum carrying case with cut-out foam lining, wired for 12 vdc to each HT and scanner position. Case opens to configure as operating stand and an external 12VDC power source (battery, powersupply, ??) plugs in to rear of case, powering all radios and scanner. Included in case accessories are a digital multimeter, BNC antenna adapters, battery clamps with cable for external case plug, small set of basic tools, 2 BNC to PL-259 coax cables and BNC to external suction cup glass antenna mount with coax cable. I built it for an ARES/RACES field mount-out kit.

Radios included:

a. Kenwood TH-78A 2mtr/70cm dual band HT with extended TX/RX, SMC-32 Speaker Mic, ME-1 Memory Upgrade, PB-14S 12V 800mah battery, PB-13 7.2v 700mah battery, ANLI RD-88 antenna

b. Kenwood TH-315A 220MHz HT, PB-2 8.4v 500mah battery, charger, SMC-30 speaker mic, AEA telescoping rod antenna

c. Azden AZ-61 6mtr HT with Azden ARD-6m telescoping rod antenna (and "rubber duck"), 2 BP-11A battery packs, BC-26 AC adapter/charger, speaker mic

d. RS Pro-43 scaner (30-54MHz, 118-194MHz, 220-512MHz, 806-999.9875MHz, external speaker, 12 to 9vdc adapter (built into case), and 2 AA battery packs

Case is designed so that when configured, all radios stand vertical in their respective case cut-outs, and operate from the case's 12vdc power (external) or can easily be individually removed for operation outside of the case/stand. All radios are in excellent condition, as well as the Pro-43 scanner. Would prefer local pick-up so that you can see the value. I don't intend to split up the radios at this time. $1095. Will include NIB RS 2mtr 35 watt amp (12vdc)

and assembled Ramsey Electronics PA-20 20 watt 220MHz amp (also 12vdc)
in the deal.

The correct procedure is to preface your ad with FA instead of FS. Then those who do not care for Ebay can ignore the ad..

Standard C558a Dual Band HT.

5W at 12 VDC
40+ memories (opt. 200+ memories with plug-in chip)
100-200, 300-500 & 800-900 MHz receive (including AM aircraft band)
TX Amateur bands
CTCSS Encode/Decode included
DTMF squelch with Paging
Ten auto-dial memories with TX delay
Scan busy, pause or hold
Call channel both bands
Dual frequency watch
Battery save
Cross-band repeat operation
Scan busy, pause or hold
Scan priority memory channels
DTMF Air Cloning
Two volume & squelch knobs for better control
3-way frequency selection, direct, rotary-up/down, arrow
23 Menu display
Operates from 6.0 to 16 VDC
Dimensions: 6.33" (H) x 2.17" (W) x 1.22" (D)
Weight with battery 12.52 oz

Has a Rapid Charger, and the supplied antenna, battery, and belt clip.
Manual included, but no box.
Also has extended memory module. (100 channels per band.) In Very Good Condition.

$250 obo.
Nate

Stromberg Carlson CCT-46077 HF Receiver. 2 to 20 MHz. Serial 62. Model RBM 4. Operator's log has entries for CBC, Japan, and the Netherlands.

The scant information I have found says the unit is AM and CW only, but the control panel indicates a couple more modes.

I have turned the unit on (I have a home brew power supply) and verified that it powers up, but I don't have an antenna to verify that it receives. I did get some noise from the headphones which seems to indicate that it is working.

I've tried to find out what the unit is worth, but have been unable to find anyone selling them. I'm asking $200, but am open to offers.

Purchaser responsible for S/H from San Jose, CA. Money order is preferred, check is acceptable but I'll ship after it clears.

Forsale:

Swan 350 and 117CX power supply. I acquired this rig about 1 year ago and have not really used it that much. It works, and works well. I was just able to tune up the rig on 20 meters to over 200 watts into my beam. The 117CX power supply does not have the attached speaker or enclosure.

I have had a couple people express some interrest and even make an offer ot two. Since I have not heard back from them, I'm opening it up again and this time I have set a price at $175 plus the buyer pays shipping costs.

This is a real nice radio, for new ham or old timer alike. It has some of the best audio quality I have ever heard on a reciever, even better than my solid state rig.

I think the price is set rather nicely, as I am not interrested in dragging this out for too long.

$175 plus shipping.

Portable 4 Band HT + Scanner Station: Comes with custom configured aluminum carrying case with cut-out foam lining, wired for 12 vdc to each HT and scanner position. Case opens to configure as operating stand and an external 12VDC power source (battery, powersupply, ??) plugs in to rear of case, powering all radios and scanner. Included in case accessories are a digital multimeter, BNC antenna adapters, battery clamps with cable for external case plug, small set of basic tools, 2 BNC to PL-259 coax cables and BNC to external suction cup glass antenna mount with coax cable. Originally for ARES/RACES mountout.

Radios included:

a. Kenwood TH-78A 2mtr/70cm dual band HT with extended TX/RX, SMC-32 Speaker Mic, ME-1 Memory Upgrade, PB-14S 12V 800mah battery, PB-13 7.2v 700mah battery, ANLI RD-88 antenna

b. Kenwood TH-315A 220MHz HT, PB-2 8.4v 500mah battery, charger, SMC-30 speaker mic, AEA telescoping rod antenna

c. Azden AZ-61 6mtr HT with Azden ARD-6m telescoping rod antenna (and "rubber duck"), 2 BP-11A battery packs, BC-26 AC adapter/charger, speaker mic

d. RS Pro-43 scaner (30-54MHz, 118-194MHz, 220-512MHz, 806-999.9875MHz, external speaker, 12 to 9vdc adapter (built into case), and 2 AA battery packs

Case is designed so that when configured, all radios stand vertical in their respective case cut-outs, and operate from the case's 12vdc power (external) or can easily be individually removed for operation outside of the case/stand. All radios are in excellent condition, as well as the Pro-43 scanner. Would prefer local pick-up so that you can see the value. WILL NOT SPLIT RADIOS. $1095. Will include NIB RS 2mtr 35 watt amp (12vdc) and assembled Ramsey Electronics PA-20 20 watt 220MHz amp (also 12vdc) in the deal.

Price is cash pick-up in Vista, N. San Diego County, CA, else payment in advance by U.S.Postal Service Money Order, + $10 towards cost of shipping & insurance. Contact Frank, KE6WOE, 760-941-9174, or email frankL@home.com with questions. No trades please.

I have a RCI-2950 that I'd like to use for 10m mobile. It has some problems (bought it that way) and I need to troubleshoot.

I thought a couple of GIF's I downloaded would get it done but they had been poorly scanned and are missing large sections of circuitry.

Scanned schematics are fine, otherwise will pay reasonable copy and postage as agreed in advance.

Thanks!

Near mint 160-10 Meter transceiver with digital display, CW filter, operator and service manuals. Very low hours...it still has the original final tubes. No problems, a few documented reversable mods added from Kenwood and QST hints and kinks. Two BNC connectors added on back to allow external reciever. Asking $350. Local pickup in the Detroit MI area preferred. I am the second owner (non smoker) and have had it since early eighties.

Newsgroups: rec.radio.amateur.swap,rec.radio.swap

Prices are cash pick-up in Vista, N. San Diego County, CA, else payment in advance by U.S.Postal Service Money Order, and will split cost of shipping & insurance. Contact Frank, KE6WOE, 760-941-9174, or email frankL@home.com with questions. No trades please.

(1) Complete Yaesu FT-50RD HT, 5 watt with FTT-12 Option (Digital Voice) with the following accessories: FNB-41 9.6V 600mah battery, FNB-49 6V 600mah battery, FBA-15 Battery Case (for AA Ni-Cads), MH-34B Speaker Mic, MH-37A Ear Mic, CT-30 Mic 'Y' Adapter, CN-3 DC adapter, CSC-V10 Cordura Case, RH-1 Rubber Protector Grip Strip, CLIP-10 Belt Clip, VC-23 VOX Headset, and NC-60B Charging Stand, ADMS-1c Software and programming cable. Radio never used except to program - like new condition. Over $650 new, sell for $395.

(2) Kenwood TM-231 2mtr mobile, excellent condition - $145

(3) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906MHz good condition - $300

(4) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906MHz with TV Video Option board, excellent condition - $355

(6) RCI-2970 10Mtr all-mode (100 watt version). Works fine, however, digital display needs adjusting so as to be able to read from above display (how, I don't know). Reads fine level or below eye level with display. Otherwise good condition - $265.

(10) Kenwood TH-78A 2mtr/70cm dual band HT with ME-1 Memory Upgrade, Extended TX/RX, MAHA Speaker Mic, BT-8 NiCad (AA) Battery Case, PB-18 7.2V 1100mah battery, ANLI RD-88H Antenna - $300

(13) Portable 4 Band HT + Scanner Station: Comes with custom configured aluminum carrying case with cut-out foam lining, wired for 12 vdc to each HT and scanner position. Case opens to configure as operating stand and an external 12VDC power source (battery, powersupply, ??) plugs in to rear of case, powering all radios and scanner. Included in case accessories are a digital multimeter, BNC

antenna adapters, battery clamps with cable for external case plug, small set of basic tools, 2 BNC to PL-259 coax cables and BNC to external suction cup glass antenna mount with coax cable. I built it for an ARES/RACES field mount-out kit.

Radios included:

a. Kenwood TH-78A 2mtr/70cm dual band HT with extended TX/RX, SMC-32 Speaker Mic, ME-1 Memory Upgrade, PB-14S 12V 800mah battery, PB-13 7.2v 700mah battery, ANLI RD-88 antenna

b. Kenwood TH-315A 220MHz HT, PB-2 8.4v 500mah battery, charger, SMC-30 speaker mic, AEA telescoping rod antenna

c. Azden AZ-61 6mtr HT with Azden ARD-6m telescoping rod antenna (and "rubber duck"), 2 BP-11A battery packs, BC-26 AC adapter/charger, speaker mic

d. RS Pro-43 scaner (30-54MHz, 118-194MHz, 220-512MHz, 806-999.9875MHz, external speaker, 12 to 9vdc adapter (built into case), and 2 AA battery packs

Case is designed so that when configured, all radios stand vertical in their respective case cut-outs, and operate from the case's 12vdc power (external) or can easily be individually removed for operation outside of the case/stand. All radios are in excellent condition, as well as the Pro-43 scanner. Would prefer local pick-up so that you can see the value. I don't intend to split up the radios at this time. $1095. Will include NIB RS 2mtr 35 watt amp (12vdc) and assembled Ramsey Electronics PA-20 20 watt 220MHz amp (also 12vdc) in the deal.

Near mint 160-10 Meter transceiver with digital display, CW filter, operator and service manuals. Very low hours...it still has the original final tubes. No problems, a few documented reversable mods added from Kenwood and QST hints and kinks. Two BNC connectors added on back to allow external reciever. Asking $350. Local pickup in the Detroit MI area preferred. I am the second owner (non smoker) and have had it since early eighties.

Forsale:

Diamond CR627NMOB 6m/2m/70cm mobile antenna
      Gain: 2.15 db on 6m
            4.5 db on 2m
            7.2 db on 70cm
  Capacity: 150 Watts
    Length: 60 inches

Diamond K601NMO hide-away trunk mount
    Black
    6.5 ft. RG316 Teflon coax w/PL-259.

Both are less than 1 year old (bought at Dayton last year) and in great shape. Antenna is a top notch performer and the hide-away trunk mount keeps the antenna secure when away from your vehicle and out of the weather.

$140 for both (save $30 from NEW prices) and split shipping from 44125

73 de Greg KG8O

(13) Portable 4 Band HT + Scanner Station: Comes with custom configured aluminum carrying case with cut-out foam lining, wired for 12 vdc to each HT and scanner position. Case opens to configure as operating stand and an external 12VDC power source (battery, powersupply, ??) plugs in to rear of case, powering all radios and scanner. Included in case accessories are a digital multimeter, BNC antenna adapters, battery clamps with cable for external case plug, small set of basic tools, 2 BNC to PL-259 coax cables and BNC to external suction cup glass antenna mount with coax cable. I built it for an ARES/RACES field mount-out kit.

Radios included:

a. Kenwood TH-78A 2mtr/70cm dual band HT with extended TX/RX, SMC-32 Speaker Mic, ME-1 Memory Upgrade, PB-14S 12V 800mah battery, PB-13 7.2v 700mah battery, ANLI RD-88 antenna

b. Kenwood TH-315A 220MHz HT, PB-2 8.4v 500mah battery, charger, SMC-30 speaker mic, AEA telescoping rod antenna

c. Azden AZ-61 6mtr HT with Azden ARD-6m telescoping rod antenna (and "rubber duck"), 2 BP-11A battery packs, BC-26 AC adapter/charger, speaker mic

d. RS Pro-43 scaner (30-54MHz, 118-194MHz, 220-512MHz, 806-999.9875MHz, external speaker, 12 to 9vdc adapter (built into case), and 2 AA battery packs

Case is designed so that when configured, all radios stand vertical in their respective case cut-outs, and operate from the

```
case's 12vdc power (external) or can easily be individually removed
for operation outside of the case/stand. All radios are in excellent
condition, as well as the Pro-43 scanner. Would prefer local pick-up
so that you can see the value. I don't intend to split up the radios
at this time. $1095. Will include NIB RS 2mtr 35 watt amp (12vdc)
and assembled Ramsey Electronics PA-20 20 watt 220MHz amp (also 12vdc)
in the deal.

Checked it but it also is too high, starting at $590.00.
They 735's regularly go for 400-450 here in W7 land.
You can't fault a guy for trying though.

Newsgroups: rec.radio.swap,rec.radio.amateur.swap

Portable 4 Band HT + Scanner Station: Comes with custom configured aluminum carrying case with cut-out foam lining, wired for 12 vdc to each HT and scanner position. Case opens to configure as operating stand and an external 12VDC power source (battery, powersupply, ??) plugs in to rear of case, powering all radios and scanner. Included in case accessories are a digital multimeter, BNC antenna adapters, battery clamps with cable for external case plug, small set of basic tools, 2 BNC to PL-259 coax cables and BNC to external suction cup glass antenna mount with coax cable. Originally for ARES/RACES mountout.

Radios included:

a. Kenwood TH-78A 2mtr/70cm dual band HT with extended TX/RX, SMC-32 Speaker Mic, ME-1 Memory Upgrade, PB-14S 12V 800mah battery, PB-13 7.2v 700mah battery, ANLI RD-88 antenna

b. Kenwood TH-315A 220MHz HT, PB-2 8.4v 500mah battery, charger, SMC-30 speaker mic, AEA telescoping rod antenna

c. Azden AZ-61 6mtr HT with Azden ARD-6m telescoping rod antenna (and "rubber duck"), 2 BP-11A battery packs, BC-26 AC adapter/charger, speaker mic

d. RS Pro-43 scaner (30-54MHz, 118-194MHz, 220-512MHz, 806-999.9875MHz, external speaker, 12 to 9vdc adapter (built into case), and 2 AA battery packs

Case is designed so that when configured, all radios stand vertical in their respective case cut-outs, and operate from the case's 12vdc power (external) or can easily be individually removed for operation outside of the case/stand. All radios are in excellent condition, as well as the Pro-43 scanner. Would prefer local pick-up so that you can see the value. WILL NOT SPLIT RADIOS. $1095. Will include NIB RS 2mtr 35 watt amp (12vdc) and assembled Ramsey Electronics PA-20 20 watt 220MHz amp (also 12vdc) in the deal.

Price is cash pick-up in Vista, N. San Diego County, CA, else payment in advance by U.S.Postal Service Money Order, + $10 towards cost of shipping & insurance. Contact Frank, KE6WOE, 760-941-9174, or email frankL@home.com with questions. No trades please.

Thanks for reading. I have a TR-200 VHF commercial mobile for sale. 2 channel, 25 watt, with original mic. Very good condition. $100 or would trade for an internal IDE ZIP drive.

Let me know.

Hi, my dear friends&collegues
Thanks for reading of this
Does anybody know, how to shift
working band of simple 40ch CB-tranceiver
to band around freq.s 28 - 29 MHz
with the same band width
Thanks
UT0IY

Yes . No Problem. Just place it carefully behind a truck wheel and back up. Thats all theres to it. Easy Huh?? Try it. Im sure youll be pleased with the results.

You can repaint later after you give it a test on the 10 meter AMATEUR BAND where you need a license. If you had a license you would know how to do this simple feat.

If this was a legitimate request from a Russian Ham, I apologize for my
scathing sarcasm. Lately there have been a lot of CBers and truckers moving
up into the 10 meter amateur band.  I thought it was one of these guys
trolling.  Sorry.  Paul K

Now wait a minute, Dean. Before you go off the deep end you have
to realize a few things here. Paul probably has never heard any UT0
stations on his local VHF repeater, so you have to excuse his ignorance.

With the 400,000 Indonesian, Filipino, Chinese, and South American
CB'ers we have on ten meters now, one more 5 watt signal will do
permanent damage to the E layer and ten meters will never work
again.

And you have to realize that Paul probably was a CB'er before
he got his ham license, so it's his job as a duly licensed amateur
radio operator to condem anyone associated with 11 meters in order
to squelch any thoughts that maybe he used to operate there....

Finally, Dean, you have to realize that Paul doesn't realize that
the CB'ers all over the ten meter band are using Kenwood, Icom,
and Yaesu radios and 'export models' of good buddy stuff, so few of
them are converting anything to become a pain in the neck.

Or maybe Paul is just like he is because somebody backed up over
him with a truck.

And to our friend, UT0IY, yes, you can convert old 11 meter radios
to ten meters, but how to do it is very dependent on the type of
radio. The old one I converted required crystals be changed, some
of the new ones don't. Post the model of the radio you have and
maybe we can help you find out how to do it....

Paul, such a rude response!

But the apology speaks well of your character--most would not have had the courage to type it. Let's see if we can help this guy (or his radio sport club) out in simple English:

Okay Vostok-Radio, the conversion involves changing the reference crystal in the phase-lock-loop (PLL) circuit to the part you are interested in moving to in 10M. In North America, most AM activity is 29.000 to 29.100 MHz, sideband is from 28.300 on up to 28.700 or so. You can also frequency shift the carrier and operate in the FM portion of 10M from 29.400 to 29.700, but this is a slightly harder modification unless you have one of those FM CB radios that are built for overseas markets. A company named Melco used to offer a kit to make an FM conversion of an AM CB radio that was pretty easy to do. After the PLL's xtal is changed the reference voltage must be adjusted. Harder to figure out is the band-pass filter that comes after these oscillators. The new frequency will be attenuated if this is not changed. Usually it involves just changing a simple capacitor or inductor or two.

The hard part to all of this is understanding the theory behind PLL's and in finding a circuit diagram (schematic) since they are not usually published by the manufacturers and there are so many different models that have been sold. There is a CB web page that sells service manuals for CB repairmen that may help. Try

      http://www.cbcintl.com

or just keep asking on these newsgroups if you have more specifics of the circuit you are working on. In the 1970's an American magazine called '73' published many articles on CB conversions. I'm afraid that I am not going to be much help. It has been 15 years since I did my last conversion and I cannot even find my notes.

If you are going to operate illegally, be sure to work from 27.5 to 28.3 MHz, always overmodulate, add echo effects if you can, and try to speak a very fast Spanish or Portuguese so that you blend in with the other operators I usually hear there. Just kidding!

Good luck,

-- John (N0BUP)

Good grief Paul,
One must assume that there is some history of conflict between the two of
you, for you to start ranting away like this.
What an interesting way you have of conveying the spirit of Amateur Radio.
(sarcasm was never my strong point)

Alan

I'm curious to as which CB's would make the best subjects for
conversion. I know that it would be better to get one w/SSB (who does
work w/AM?), but I'm more curious about what models work best. After,
why pay $100-200 for a real 10m radio when, if I spend $20 bucks for an
old cb and do $10 worth of mods, I can have something that does the
trick?

Paul,

UT0IY may well be a valid call sign. Looking at the QRZ New DX page at http://www.qrz.com/wrad/directory.cgi?new_dx I find a couple other UT prefixes listed. I also find in the 5th edition of the ARRL Operating Manual (ch. 17, pg. 90) that the prefix UT indicates someplace in the Ukraine, specifically Kiev.

I'm not up on searching for non-US call signs online. I've no way of confirming that UT0IY is valid or not - but it sure looks like it may be, but of what class/type - I don't know.

Now if this poster had indicated he was some yak-jawed 'good buddy' I'd have to totally agree with your suggestion. In this case though, methinks you've keyed up before listening.

All new in box (FTS-22 installed) with all manuals/papers and unfilled warrantee card. I have only had it a week. Planned on using it but other circumstances have come up. All gear is 100%. Radio and accessories still in protective plastic. Selling all as a unit. Retail $820 for all. $500 and shipping takes it.

Hi,
FT-102, with original mic and manual copy. Works perfectly.
No FM board, stock filters, no modifications. Excellent condition!
$495 shipped CONUS.
regards,
Chuck...K1KW

Have a GE made 19" x 4" panel with Bendix directional coupler, multi
function meter w/ 2nd red pointer ref from
front meter, 120Watt FS, reads power, reflected pwr & VSWR, circuit on board
to remote info elsewhere. Been tested yesterday works ok for local use, no
documentation on remote use. Covers VHF & possibly UHF (dont have anything
on UHF to test it with). Very nice condition. $60. obo + shipping. Or trade
for NOS, good 810 tx tubes.
Regards
Dee

I have two transmitters, one on 6 meters and one on 2 meters, for my repeater under construction. I will be using a dual-band repeater antenna and need to find out if I need a transmitter combiner or would a duplexer, such as the kind used with multi-band transceivers, work?

Thank you,
Christopher Zeman, KB9RHA

I am happy to say that the Icom 706, 746, and 756 discussion groups are doing well.   This all started with the Icom 706 group. The 706 group was a great success and users ask about a 746 and 756 users group. So, I put one on-line for all to use.

If you have a need for one of these groups I invite you to stop by and take a look. There is a great deal of useful conversation taking place on these sites.

http://vartel.com/icom706
http://vartel.com/icom746
http://vartel.com/icom756

Also there is the Tradersnet which is doing fair. I would like to see more traffic there so please visit that site as well.

Well, I got an amateur radio auction that is easy to use and fairly priced.
The category is specifically for ham gear. You guys help me out. go
register and submit some stuff. This goes to help support the Ham's Net

server

Kenwood TR-9130 2M All mode w/mobile bracket (no manual)... cosmetic condition an "8" (some scratches on case but front panel very good.), but works great. Have brand new Communications Specialist CTCSS tone

encoder unit to go with it but have not installed it yet. Also has
Kenwood Touch-Tone keypad mic. $235.00 for
both! (Just the 9130 $200, just the tone encoder $45).

I'm looking for the best "value" in a simple and rugged yet effective 144 /
440 rig to move between my vehicles.

I don't need fancy stuff like detachable faceplates.

Small, solid and inexpensive is better.

Any suggestions?

73s....

Watch out for Tom Repstad he was going to buy a radio from me never sent
money, tried to contact but email to him bounced. I did not send radio ,
did not loose money , he just did not do what he said he would do.
beware!
Ken

You know Ken, unwarranted slander like this is ruining the net. You could have posted a message on the swap group to my attention and I would have answered. Yes I did change internet providers.... and as a result have a new e-mail address. Yes I was going to buy the SB-104A, but decided not to at this time. I did send you e-mail, I gather you did not get it. I have had a number postings here with my new e-mail address, if you were so concerned, why did you not reply to one of my postings to ask me about the deal? If everybody up here whined the way you are everytime somebody changed their mind, there would be not room for for-sale messages. That's why, you don't ship til you get the cash. Why would you even post this drivel when you lost nothing? I dunno Ken, seems like you are crying about nothing... give the world a break will ya...

That's great! Service with a smile...

Sounds like Ken may be on
to something. He said that you would not do something you
committed to doing. You admitted he was correct. Then you bash
him.

I have the following 2 scanners for sale

1 - Uniden Bearcat SC150 800MHz scanner, twin turbo, used but in good shape. 100 channels, no modifications done. Unit has a date code of 'OFIG' first $105 obo takes it

1 - RS Pro-2039 Base scanner. Very small and in great shape. 200 channel, 800MHz HYPERSCAN. Broken antenna top, but functions fine and has optional BNC antenna connector on back. Unit is 120VAC ready with cord. Asking $125 obo

I have a number of mint condition Black & White CCD cameras. Follow the below link toview . They are very small encased C-mount cameras(I have some lenses for sale as well) They were purchased new for $249 each. I
will sell for $150 each, or can work out a deal for qty. Let me know if interested

I recently ended up with a Tempo One in very good condition, but it is surplus to my needs. After receiving the unit, I gave it a good going over, and it is very clean, nearly in "out of the box" condition (except for a few items, outlined below) The receive works well, there is power out, and a clean signal, according to my IFR-1500. Physically very clean but a bit of dust, has all original tubes, it appears and comes with manual (tattered, but all there) and an equally nice looking power supply and a hand mic. It also has surprisingly little drift for a Tempo One, was able to copy 40 meter SSB without having to retune after a 15 minute warmup. (Better than my old Swan 350!)

The caveat -- it was owned by a CB'er who changed the xtals out in the 10 meter band segment, all 4 (5??) crystals. There are NO OTHER mods to the unit, luckily, that I was able to find. The next problem was it was delivered by UPS, who decided the front of the radio would be a convenient part of the box to bang against some hard object. The dial thusly has a mild wobble and a bit of binding, and a small piece of the dial trim is missing. This should be easy to fix, and I can do it if the buyer wishes before I ship. With original tubes it could probably use a new pair of outputs.

The price? Well, it is in good shape despite all this, there are no dents, dings, or rust and has been well taken care of even though it was used on (ugh!) 11 meters. Would make a decent/passable

first rig or backup rig, if the ten meter crystals are replaced
(Available via JAN crystal and others, I am told)

$150 shipped from Nashville, TN 37211 or best resonable offer.
Trades considered. No laughing please. :-)

I am a new Ham and in need of a rig.

I am interest in any radio a No-code tech would be able to use.

I have the following stuff that I am willing to trade for a rig. The fianc�e gave me the cabash on buying a rig straight out (something about spending the money on the wedding instead, or other such non-sense :)

Thanks

1975 Ford Full size Van
460 Engine Runs Well, minor body rust, paint job needs more work, needs new tires, could use new shocks, one break rotor for sure needs replacement. Would make a good tow vehicle, has full tow package including break control. Could use re-wiring from the ignition to the starter relay.

Laptop Acer 760Ic
486DX50 8Megs Memory(upgradable to 24Megs), 200Meg HD(user replaceable), color display, track ball (could use a new one/can be replaced by user), NO SOUND, or CD-ROM. Needs new battery, current one does not hold charge at all.

Beepwear Pager - Life Style (Black with Yellow style)
In new condition, just traded with pager company.
Has Flex-time, 16 alpha message slots, 3 News slots.
WWW.BEEPWEAR.COM

Multiple video cards
Multiple Modems from 9600-33.6
(33.6 = Mwav by IBM voice mail, etc.)

Small color TV
Radio shack 2 or so inch TV. Minor scratches, barely noticeable.

Mac IICX with a 68040 Daystar Card. Works fine, could use a bigger HD (200 Meg included) and a FD (Does not have a floppy drive at all, was used on network). Older machine, so not in perfect cosmetic shape, nothing major.

Linksys PCI Network card, never been used. Was bought as a set with HUB etc. My main machine is PCI the other two are not. Was still cheaper to buy the set and then buy a ISA card, PCI card, hub, cables.

150 Watt 4 Ch Mosfet Radio Shack amp for car stereos. Works great, I no longer need due to my new head unit puts out 50 Watts per channel, and I really do not need that much power in a smaller car. I used it when I drove my van regularly.   It has standard RCA inputs as well as High level inputs. All cables are standard and available at Radio Shack.

Cell Phone stuff
One 550 works fine, High hours.

One older Alpha (does not have CID, etc.), works fine, extreme hours

One flipless flip. Works fine, could use a new attenna, high hours. has built in charger, comes with transformer for.

One ultra Lite II (had minor soldering problem, which I had fixed by Motorola, does have CID, check with carrier to see if they support)
Booster kit for Lite II, one spring on the lock down mech. is broken, still works fine. Comes with handsfree. I used it a lot before I bought the Star Tac.

I do have a couple a batteries for these phones as well, one intelicharger, one standard, one slim.

Selling Ham Gear for Taxes! Prices are cash pick-up in Vista, N. San
Diego County,
CA, else payment in advance by U.S.Postal Service Money Order, and
will split cost
of shipping & insurance. Contact Frank, KE6WOE, 760-941-9174, or
email
frankL@home.com with questions. No trades please.

(1) Complete Yaesu FT-50RD HT, 5 watt with FTT-12 Option (Digital
Voice) with
the following accessories: FNB-41 9.6V 600mah battery, FNB-49
6V 600mah

battery, FBA-15 Battery Case (for AA Ni-Cads), MH-34B Speaker Mic, MH-37A Ear Mic, CT-30 Mic 'Y' Adapter, CN-3 DC Adapter, CSC-V10 Cordura Case, RH-1 Rubber Protectot Grip Strip, CLIP-10 Belt Clip, VC-23 VOX Headset, and NC-60B Charging Stand, ADMS-1c Software and programming cable. Radio never used except to program - like new condition. Over $650 new, sell for $395.

(2) Kenwood TM-231 2mtr mobile, excellent condition - $225

(3) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906 MHz good condition - $315

(4) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906 MHz With TV Video Option board, excellent condition - $385

(5) RCI-2950 10Mtr all-mode. Needs alignment, fair condition - $125

(6) RCI-2970 10Mtr all-mode (100 watt version). Works fine, however digital display needs adjusting so as to be able to read from above display. Reads fine level or below eye level with display. Otherwise good condition - $275.

(7) Complete Portable Packet Station: Custom fitted, foam-lined aluminum carrying case, Kenwood TM-231A excellent condition, Toshiba 1000 (286) Laptop computer (12Volt) with extra battery, AC charger/DC adapter and installed packet software, KPC-3 TNC with V6.0 rom. All cables configured and working - $435

(8) Kenwood TM-331A 220MHz mobile, excellent condition - $315

(9) Alinco DR-600 2Mtr/70Cm mobile, good condition - $350

(10) Kenwood TH-78A 2mtr/70cm dual band HT with ME-1 Memory Upgrade, Extended TX/RX, MAHA Speaker Mic, BT-8 NiCad (AA) Battery Case, PB-18 7.2V 1100mah battery, ANLI RD-88H Antenna - $325

(11) ICOM W32A 2mtr/70cm HT with manual, BP-175 Hi Cap Battery, BP-170 AA Battery Case, good condition, few key markings worn off - $175

(12) Azden PCS-7500H 6 mtr FM Mobile with DTMF pad speaker mic.
Excellent condition - $265

(13) Portable 4 Band HT + Scanner Station: Comes with custom configured Aluminum carrying case with cut-out foam lining, wired for 12 vdc to each HT and scanner position. Case opens to configure as operating stand and an external 12VDC power source (battery, powersupply, ??) plugs in to rear of case, powering all radios and scanner. Included in case accessories are a digital multimeter, BNC antenna adapters, battery clamps with cable for external case plug, small set of basic tools, 2 BNC to PL-259 coax cables and BNC to external suction cup glass antenna mount with coax cable.

Radios included:

a. Kenwood TH-78A 2mtr/70cm dual band HT with extended TX/RX, SMC-32 Speaker Mic, ME-1 Memory Upgrade, PB-14S 12V 800mah battery, PB-13 7.2v 700mah battery, ANLI RD-88 antenna

b. Kenwood TH-315A 220MHz HT, PB-2 8.4v 500mah battery, charger, SMC-30 speaker mic, AEA telescoping rod antenna

c. Azden AZ-61 6mtr HT with Azden ARD-6m telescoping rod antenna (and 'rubber duck"), 2 BP-11A battery packs, BC-26 AC adapter/charger, speaker mic

d. RS Pro-43 scaner (30-54MHz, 118-194MHz, 220-512MHz, 806-999.9875MHz, external speaker, 12 to 9vdc adapter (built into case), and 2 AA battery packs

Case is designed so that when configured, all radios stand vertical in their respective case cut-outs, and operate from the case's 12vdc power (external) or can easily be individually removed for operation outside of the case/stand. All radios are in excellent condition, as well as the Pro-43 scanner. Would prefer local pick-up so that you can see the value. WILL NOT SPLIT RADIOS. $1195 firm. Will include NIB RS 2mtr 35 watt amp (12vdc) and assembled Ramsey Electronics PA-20 20 watt 220MHz amp (also 12vdc) in the deal.

I would appreciate it, if you think my prices are too high, that you don't consider buying.
Let's not waste each other's time. Serious inquiries only please. If calling, turn on your caller
ID (*82 usually) if it is not normally on. My answering system will not accept calls from
blocked caller ID telephones. If using email, I'm sure the "group" would appreciate email to
my address, not a post to the newsgroup. Thank you for your consideration.

Selling Narco HT870 air band portable. Very good shape. Has both COM and NAV
freqs, backlit LCD display and 20 programmable channels. Haven't used in
several years and battery is dead but powers up fine from power supply.
Can't locate charger but is commonly available 9.6V with coaxial plug.
Battery is a BP600, also commonly available. With leather carrying case.
$200 obo.

Let me know.

Selling Ham Gear for Taxes! Prices are cash pick-up in Vista, N. San
Diego County, else payment in advance by U.S.Postal Service Money
Order, and will split cost of shipping & insurance. Contact Frank,
KE6WOE, 760-941-9174, or email frankL@home.com with questions. No
trades please.

(1) Complete Yaesu FT-50RD HT, 5 watt with FTT-12 Option (Digital Voice) with the following accessories: FNB-41 9.6V 600mah battery, FNB-49 6V 600mah battery, FBA-15 Battery Case (for AA Ni-Cads), MH-34B Speaker Mic, MH-37A Ear Mic, CT-30 Mic 'Y' Adapter, CN-3 DC adapter, CSC-V10 Cordura Case, RH-1 Rubber Protectot Grip Strip, CLIP-10 Belt Clip, VC-23 VOX Headset, and NC-60B Charging Stand, ADMS-1c Software and programming cable. Radio never used except to program - like new condition. Over $650 new, sell for $395.

(2) Kenwood TM-231 2mtr mobile, excellent condition - $225

(3) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906 MHz good condition - $315

(4) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906 MHz
With TV Video Option board, excellent condition - $385

(5) RCI-2950 10Mtr all-mode. Needs alignment, fair condition - $125

(6) RCI-2970 10Mtr all-mode (100 watt version). Works fine, however digital display needs adjusting so as to be able to read from above display. Reads fine level or below eye level with display. Otherwise good condition - $275.

(7) Complete Portable Packet Station: Custom fitted, foam-lined aluminum carrying case, Kenwood TM-231A excellent condition, Toshiba 1000 (286) Laptop computer (12Volt) with extra battery, AC charger/DC adapter and installed packet software, KPC-3 TNC with V6.0 rom. All cables configured and working - $435

(8) Kenwood TM-331A 220MHz mobile, excellent condition - $315

(9) Alinco DR-600 (SOLD)

(10) Kenwood TH-78A 2mtr/70cm dual band HT with ME-1 Memory Upgrade, Extended TX/RX, MAHA Speaker Mic, BT-8 NiCad (AA) Battery Case, PB-18 7.2V 1100mah battery, ANLI RD-88H Antenna - $325

(11) ICOM W32A (SOLD)

(12) Azden PCS-7500H (SOLD)

(13) Portable 4 Band HT + Scanner Station: Comes with custom configured aluminum carrying case with cut-out foam lining, wired for 12 vdc to each HT and scanner position. Case opens to configure as operating stand and an external 12VDC power source (battery, powersupply, ??) plugs in to rear of case, powering all radios and scanner. Included in case accessories are a digital multimeter, BNC antenna adapters, battery clamps with cable for external case plug, small set of basic tools, 2 BNC to PL-259 coax cables and BNC to external suction cup glass antenna mount with coax cable.
Radios included:

a. Kenwood TH-78A 2mtr/70cm dual band HT with extended TX/RX, SMC-32 Speaker Mic, ME-1 Memory Upgrade, PB-14S 12V 800mah battery, PB-13 7.2v 700mah battery, ANLI RD-88 antenna

b. Kenwood TH-315A 220MHz HT, PB-2 8.4v 500mah battery, charger, SMC-30 speaker mic, AEA telescoping rod antenna

c. Azden AZ-61 6mtr HT with Azden ARD-6m telescoping rod antenna (and "rubber duck"), 2 BP-11A battery packs, BC-26 AC adapter/charger, speaker mic

d. RS Pro-43 scaner (30-54MHz, 118-194MHz, 220-512MHz, 806-999.9875MHz, external speaker, 12 to 9vdc adapter (built into case), and 2 AA battery packs

Case is designed so that when configured, all radios stand vertical in their respective case cut-outs, and operate from the case's 12vdc power (external) or can easily be individually removed for operation outside of the case/stand. All radios are in excellent condition, as well as the Pro-43 scanner. Would prefer local pick-up so that you can see the value. WILL NOT SPLIT RADIOS. $1195 firm. Will include NIB RS 2mtr 35 watt amp (12vdc) and assembled Ramsey Electronics PA-20 20 watt 220MHz amp (also 12vdc) in the deal.

I would appreciate it, if you think my prices are too high, that you don't consider buying. Let's not waste each other's time. Serious inquiries only please. If calling, turn on your caller ID (*82 usually) if it is not normally on. My answering system will not accept calls from blocked caller ID telephones. If using email, I'm sure the "group" would appreciate email to my address, not a post to the newsgroup. Thank you for your consideration.

I have a mixed set through these years that was spoken for but the deal fell
through. They are:

1947 - 4,6,10
1948 - 1
1950 - 2,3,6,7,8,10,11
1953 - 2,4,7,8
1955 - 2,6,7,8,9,11

All 21 issues for $18 shipped CONUS

regards,
Chuck...K1KW

Selling Ham Gear for Taxes! Prices are cash pick-up in Vista, N. San
```

Diego County, else payment in advance by U.S.Postal Service Money Order, and will split cost of shipping & insurance. Contact Frank, KE6WOE, 760-941-9174, or email frankL@home.com with questions. No trades please.

(1) Complete Yaesu FT-50RD HT, 5 watt with FTT-12 Option (Digital Voice) with the following accessories: FNB-41 9.6V 600mah battery, FNB-49 6V 600mah battery, FBA-15 Battery Case (for AA Ni-Cads), MH-34B Speaker Mic, MH-37A Ear Mic, CT-30 Mic 'Y' Adapter, CN-3 DC adapter, CSC-V10 Cordura Case, RH-1 Rubber Protectot Grip Strip, CLIP-10 Belt Clip, VC-23 VOX Headset, and NC-60B Charging Stand, ADMS-1c Software and programming cable. Radio never used except to program - like new condition. Over $650 new, sell for $395.

(2) Kenwood TM-231 2mtr mobile, excellent condition - $225

(3) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906 MHz good condition - $315

(4) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906 MHz
With TV Video Option board, excellent condition - $385

(5) RCI-2950 10Mtr all-mode. Needs alignment, fair condition - $125

(6) RCI-2970 10Mtr all-mode (100 watt version). Works fine, however digital display needs adjusting so as to be able to read from above display. Reads fine level or below eye level with display. Otherwise good condition - $275.

(7) Complete Portable Packet Station: Custom fitted, foam-lined aluminum carrying case, Kenwood TM-231A excellent condition, Toshiba 1000 (286) Laptop computer (12Volt) with extra battery, AC charger/DC adapter and installed packet software, KPC-3 TNC with V6.0 rom. All cables configured and working - $435

(8) Kenwood TM-331A 220MHz mobile, excellent condition - $315

(9) Alinco DR-600 (SOLD)

(10) Kenwood TH-78A 2mtr/70cm dual band HT with ME-1 Memory Upgrade,
Extended TX/RX, MAHA Speaker Mic, BT-8 NiCad (AA) Battery Case,
PB-18 7.2V 1100mah battery, ANLI RD-88H Antenna - $325

(11) ICOM W32A (SOLD)

(12) Azden PCS-7500H (SOLD)

(13) Portable 4 Band HT + Scanner Station: Comes with custom configured aluminum carrying case with cut-out foam lining, wired for 12 vdc to each HT and scanner position. Case opens to configure as operating stand and an external 12VDC power source (battery,

powersupply, ??) plugs in to rear of case, powering all radios and scanner. Included in case accessories are a digital multimeter, BNC antenna adapters, battery clamps with cable for external case plug, small set of basic tools, 2 BNC to PL-259 coax cables and BNC to external suction cup glass antenna mount with coax cable.

Radios included:

a. Kenwood TH-78A 2mtr/70cm dual band HT with extended TX/RX, SMC-32 Speaker Mic, ME-1 Memory Upgrade, PB-14S 12V 800mah battery, PB-13 7.2v 700mah battery, ANLI RD-88 antenna

b. Kenwood TH-315A 220MHz HT, PB-2 8.4v 500mah battery, charger, SMC-30 speaker mic, AEA telescoping rod antenna

c. Azden AZ-61 6mtr HT with Azden ARD-6m telescoping rod antenna (and "rubber duck"), 2 BP-11A battery packs, BC-26 AC adapter/charger, speaker mic

d. RS Pro-43 scaner (30-54MHz, 118-194MHz, 220-512MHz, 806-999.9875MHz, external speaker, 12 to 9vdc adapter (built into case), and 2 AA battery packs

Case is designed so that when configured, all radios stand vertical in their respective case cut-outs, and operate from the case's 12vdc power (external) or can easily be individually removed for operation outside of the case/stand. All radios are in excellent condition, as well as the Pro-43 scanner. Would prefer local pick-up so that you can see the value. WILL NOT SPLIT RADIOS. $1195 firm. Will include NIB RS 2mtr 35 watt amp (12vdc) and assembled Ramsey Electronics PA-20 20 watt 220MHz amp (also 12vdc) in the deal.

I would appreciate it, if you think my prices are too high, that you don't consider buying. Let's not waste each other's time. Serious inquiries only please. If calling, turn on your caller ID (*82 usually) if it is not normally on. My answering system will not accept calls from blocked caller ID telephones. If using email, I'm sure the "group" would appreciate email to my address, not a post to the newsgroup. Thank you for your consideration.

Was just advised that the TM-261 was selling for $179 (thanks Cliff), and I've just verified a selling price of $199 at Jun's Electronics in L.A.

Accordingly, the new price for the subject radio is now $165.

73 to all interested parties...

Frank

Oh boy, the price police are out again, hide the women and kids.

Say, do you guys have badges, or just busybodies?

If you don't like the price, don't buy it! Easy, huh?

Wow, does that bring back memories. I was 16 years old, and working part
time at a grocery store when I ran into a fellow that owned the TX, RX and
Band Scope. He was getting ready to move out of state, and was willing to

sell. I was working diligently to purchase said same, when that fateful day came and someone else bought it out from under me. Such is life...

For those of you who have never seen this setup, it was the greatest looking groupings of equipment. Loved that electric QSY'er. One button instant dial spin.

Good luck guys.

Prices are cash pick-up in Vista, N. San Diego County, CA, else payment in advance by U.S.Postal Service Money Order, and will split cost of shipping & insurance. Contact Frank, KE6WOE, 760-941-9174, or email frankL@home.com with questions. No trades please.

(1) Complete Yaesu FT-50RD HT, 5 watt with FTT-12 Option (Digital Voice) with the following accessories: FNB-41 9.6V 600mah battery, FNB-49 6V 600mah battery, FBA-15 Battery Case (for AA Ni-Cads), MH-34B Speaker Mic, MH-37A Ear Mic, CT-30 Mic 'Y' Adapter, CN-3 DC adapter, CSC-V10 Cordura Case, RH-1 Rubber Protectot Grip Strip, CLIP-10 Belt Clip, VC-23 VOX Headset, and NC-60B Charging Stand, ADMS-1c Software and programming cable. Radio never used except to program - like new condition. Over $650 new, sell for $395.

(2) Kenwood TM-231 2mtr mobile, excellent condition - $165 (I've received such flames about this one that I feel compelled to answer a couple of the best...No, the radio did not belong to Elvis, but to a little old lady who only used it to check into the Sunday morning ARES net! / No, I do not expect you to buy the radio if you don't think the price is fair; I expect you to act as a responsible adult...)
* Thanks to all who have read!

(3) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906MHz good condition - $315

(4) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906MHz with TV Video Option board, excellent condition - $385

(5) RCI-2950 10Mtr all-mode. Needs alignment, fair condition - $125

(6) RCI-2970 10Mtr all-mode (100 watt version). Works fine, however,

digital display needs adjusting so as to be able to read from above display (how, I don't know). Reads fine level or below eye level with display. Otherwise good condition - $275.

(7) Complete Portable Packet Station: Custom fitted, foam-lined aluminum carrying case, Kenwood TM-241A excellent condition, Toshiba 1000 (286) Laptop computer (12Volt) with extra battery, AC charger/DC adapter and installed packet software, KPC-3 TNC with V6.0 rom. All cables configured and working - $435

(8) Kenwood TM-331A (SOLD)

(9) Alinco DR-600 (SOLD)

(10) Kenwood TH-78A 2mtr/70cm dual band HT with ME-1 Memory Upgrade, Extended TX/RX, MAHA Speaker Mic, BT-8 NiCad (AA) Battery Case, PB-18 7.2V 1100mah battery, ANLI RD-88H Antenna - $325

(11) ICOM W32A (SOLD)

(12) Azden PCS-7500H (SOLD)

(13) Portable 4 Band HT + Scanner Station: Comes with custom configured aluminum carrying case with cut-out foam lining, wired for 12 vdc to each HT and scanner position. Case opens to configure as operating stand and an external 12VDC power source (battery, powersupply, ??) plugs in to rear of case, powering all radios and scanner. Included in case accessories are a digital multimeter, BNC antenna adapters, battery clamps with cable for external case plug, small set of basic tools, 2 BNC to PL-259 coax cables and BNC to external suction cup glass antenna mount with coax cable. I built it for an ARES/RACES field mount-out kit.

Radios included:

a. Kenwood TH-78A 2mtr/70cm dual band HT with extended TX/RX, SMC-32 Speaker Mic, ME-1 Memory Upgrade, PB-14S 12V 800mah battery, PB-13 7.2v 700mah battery, ANLI RD-88 antenna

b. Kenwood TH-315A 220MHz HT, PB-2 8.4v 500mah battery, charger, SMC-30 speaker mic, AEA telescoping rod antenna

c. Azden AZ-61 6mtr HT with Azden ARD-6m telescoping rod antenna (and "rubber duck"), 2 BP-11A battery packs, BC-26 AC adapter/charger, speaker mic

d. RS Pro-43 scaner (30-54MHz, 118-194MHz, 220-512MHz, 806-999.9875MHz, external speaker, 12 to 9vdc adapter (built into case), and 2 AA battery packs

Case is designed so that when configured, all radios stand vertical in their respective case cut-outs, and operate from the case's 12vdc power (external) or can easily be individually removed for operation outside of the case/stand. All radios are in excellent condition, as well as the Pro-43 scanner. Would prefer local pick-up

so that you can see the value. I don't intend to split up the radios
at this time. $1195 firm. Will include NIB RS 2mtr 35 watt amp (12vdc)
and assembled Ramsey Electronics PA-20 20 watt 220MHz amp (also 12vdc)
in the deal.

I would appreciate it, if you think my prices are too high, that you
don't consider buying. Let's not waste each other's time. Serious
inquiries only please. If calling, turn on your caller ID (*82
usually) if it is not normally on. My answering system will not accept
calls from *blocked* caller ID telephones. It will from "Out of Area"
If using email, I'm sure the "group" would appreciate email to my
address, not a post to the newsgroup. Thank you for your
consideration.

Hello,
I am considering the purchase of a IC-2710 with the MB-65 and MB-58 options.
How tall of a mount is the MB-65? Is it comparible to a standard cell-phone
cradle mount? I'm wondering if it's tall enough to be easily viewed when
mounted on the center hump of my dodge pickup. Any information / suggestions
will be greatly appreciated. Please respond directly to
peaster@connors.cc.ok.us.

Thanks & 73's
Mike Peaster

If you search on amateur radio slow scan I believe that
you will discover that you can do slow scan essentially
free.

There is some freeware out there that will allow you to do
slow scan through your Soundblaster sound card ...

or so I am told.

Sure would appreciate you sharing what you learn ...

Prices are cash pick-up in Vista, N. San Diego County, CA, else
payment in advance by U.S.Postal Service Money Order, and will split
cost of shipping & insurance. Contact Frank, KE6WOE, 760-941-9174, or
email frankL@home.com with questions. No trades please.

(1) Complete Yaesu FT-50RD HT (SOLD)

(2) Kenwood TM-231 2mtr mobile, excellent condition - $165 (I've
received such flames about this one that I feel compelled to answer a
couple of the best...No, the radio did not belong to Elvis, but to a
little old lady who only used it to check into the Sunday morning ARES
net! / No, I do not expect you to buy the radio if you don't think the
price is fair; I expect you to act as a responsible adult...)
* Thanks to all who have read!

(3) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906MHz good condition - $315

(4) Yaesu FRG-9600 All-Mode Communications Receiver, continous 60-906MHz with TV Video Option board, excellent condition - $385

(5) RCI-2950 10Mtr all-mode. Needs alignment, fair condition - $125

(6) RCI-2970 10Mtr all-mode (100 watt version). Works fine, however, digital display needs adjusting so as to be able to read from above display (how, I don't know). Reads fine level or below eye level with display. Otherwise good condition - $275.

(7) Complete Portable Packet Station: Custom fitted, foam-lined aluminum carrying case, Kenwood TM-241A excellent condition, Toshiba 1000 (286) Laptop computer (12Volt) with extra battery, AC charger/DC adapter and installed packet software, KPC-3 TNC with V6.0 rom. All cables configured and working - $435

(8) Kenwood TM-331A (SOLD)

(9) Alinco DR-600 (SOLD)

(10) Kenwood TH-78A 2mtr/70cm dual band HT with ME-1 Memory Upgrade, Extended TX/RX, MAHA Speaker Mic, BT-8 NiCad (AA) Battery Case, PB-18 7.2V 1100mah battery, ANLI RD-88H Antenna - $325

(11) ICOM W32A (SOLD)

(12) Azden PCS-7500H (SOLD)

(13) Portable 4 Band HT + Scanner Station: Comes with custom configured aluminum carrying case with cut-out foam lining, wired for 12 vdc to each HT and scanner position. Case opens to configure as operating stand and an external 12VDC power source (battery, powersupply, ??) plugs in to rear of case, powering all radios and scanner. Included in case accessories are a digital multimeter, BNC antenna adapters, battery clamps with cable for external case plug, small set of basic tools, 2 BNC to PL-259 coax cables and BNC to external suction cup glass antenna mount with coax cable. I built it for an ARES/RACES field mount-out kit.

Radios included:

a. Kenwood TH-78A 2mtr/70cm dual band HT with extended TX/RX, SMC-32 Speaker Mic, ME-1 Memory Upgrade, PB-14S 12V 800mah battery, PB-13 7.2v 700mah battery, ANLI RD-88 antenna

b. Kenwood TH-315A 220MHz HT, PB-2 8.4v 500mah battery, charger, SMC-30 speaker mic, AEA telescoping rod antenna

c. Azden AZ-61 6mtr HT with Azden ARD-6m telescoping rod antenna (and "rubber duck"), 2 BP-11A battery packs, BC-26 AC adapter/charger, speaker mic

d. RS Pro-43 scaner (30-54MHz, 118-194MHz, 220-512MHz, 806-999.9875MHz, external speaker, 12 to 9vdc adapter (built into case), and 2 AA battery packs

Case is designed so that when configured, all radios stand vertical in their respective case cut-outs, and operate from the case's 12vdc power (external) or can easily be individually removed for operation outside of the case/stand. All radios are in excellent condition, as well as the Pro-43 scanner. Would prefer local pick-up so that you can see the value. I don't intend to split up the radios at this time. $1195 firm. Will include NIB RS 2mtr 35 watt amp (12vdc) and assembled Ramsey Electronics PA-20 20 watt 220MHz amp (also 12vdc) in the deal.

I would appreciate it, if you think my prices are too high, that you don't consider buying. Let's not waste each other's time. Serious inquiries only please. If calling, turn on your caller ID (*82 usually) if it is not normally on. My answering system will not accept calls from *blocked* caller ID telephones. It will from "Out of Area" If using email, I'm sure the "group" would appreciate email to my address, not a post to the newsgroup. Thank you for your consideration.

Hello, the ICOM 706 Discussion Group is continuing to do extremely well. Being this is such a great mobile HF rig, I have decided to giveaway a HamStick mobile antenna each month to those that register for the free drawing each month.

Folks, Amateur Radio is a fantastic hobby. Mobile operations is getting better everyday!. Let's all get talking mobile.

Come by http://vartel.com/icom706 and see what all the fuss is about with the ICOM 706.

See ya there!

For sale:

I have for sale eight Kenwood Tk-806 commercial/LMR radios. I have three radios which are working (tested tx and rx, carrier, pl, and dpl on both band edges) and five with various problems. I'm sure that the non-working five could be put together to make two or three good, working radios, but I don't want to worry with it. These radios are UHF, 470-490 split (I have been told that they will work 460-500, no guarantees on this though!) and 16 channels. They are very similar in function to a Motorola GM-300, with a few differences. (Couldn't find a pic, sorry...) The first difference is the size. The radios are roughly 5.5" wide x 6.5" deep x 1.5" tall. Second, the radios have an orange-backlit quasi-alpha display (eg Ch 1-Ch 16). Each channel set to repeat has a talkaround which is selectable by a single button (changing the display to Ta 1-Ta 16). Also, the front panel has a second button for monitor/open squelch, power push-on/push-off switch, volume control, scan, scan list delete/add (it's very easy to reprogram the scan in these) and REC for option boards such as DTMF decoding and tone signalling options, as well as the RJ-type mic connector and the channel-selector knob. The radios are at least 30 watts out within their bandsplit- I can't remember the exact figure but they may be up to 45 watts.These radios also support hang-up functions, programmable scan timings, TPL/DPL/InvDPL, etc.

Anyway, I would like to sell these radios as a lot. I think that $300 each for the working radios and $250 for all five of the dead ones is fair- total $1150. I think that this price is fair; if you don't, make an offer.

NOTE: I do not read these newsgroups. PLEASE E-MAIL ME AT TVSJR@SPRYNET.COM!!!!!!

Thanks
Terry

Portable 4 Band HT + Scanner Station: Comes with custom configured aluminum carrying case with cut-out foam lining, wired for 12 vdc to each HT and scanner position. Case opens to configure as operating stand and an external 12VDC power source (battery, powersupply, ??) plugs in to rear of case, powering all radios and scanner. Included in case accessories are a digital multimeter, BNC antenna adapters, battery clamps with cable for external case plug, small set of basic tools, 2 BNC to PL-259 coax cables and BNC to external suction cup glass antenna mount with coax cable. Originally for ARES/RACES mountout.

Radios included:

a. Kenwood TH-78A 2mtr/70cm dual band HT with extended TX/RX, SMC-32 Speaker Mic, ME-1 Memory Upgrade, PB-14S 12V 800mah battery, PB-13 7.2v 700mah battery, ANLI RD-88 antenna

b. Kenwood TH-315A 220MHz HT, PB-2 8.4v 500mah battery, charger, SMC-30 speaker mic, AEA telescoping rod antenna

c. Azden AZ-61 6mtr HT with Azden ARD-6m telescoping rod antenna (and "rubber duck"), 2 BP-11A battery packs, BC-26 AC adapter/charger, speaker mic

d. RS Pro-43 scaner (30-54MHz, 118-194MHz, 220-512MHz, 806-999.9875MHz, external speaker, 12 to 9vdc adapter (built into case), and 2 AA battery packs

Case is designed so that when configured, all radios stand vertical in their respective case cut-outs, and operate from the case's 12vdc power (external) or can easily be individually removed for operation outside of the case/stand. All radios are in excellent condition, as well as the Pro-43 scanner. Would prefer local pick-up so that you can see the value. WILL NOT SPLIT RADIOS. $1195. Will include NIB RS 2mtr 35 watt amp (12vdc) and assembled Ramsey Electronics PA-20 20 watt 220MHz amp (also 12vdc) in the deal.

Price is cash pick-up in Vista, N. San Diego County, CA, else payment in advance by U.S.Postal Service Money Order, and will split cost of

shipping & insurance. Contact Frank, KE6WOE, 760-941-9174, or email
frankL@home.com with questions. No trades please.

Racal 6790/GM -2174(P) / URR HF Receiver .5Mhz to 30 Mhz
AM/USB/LSB/CW/FM

Continuous tuning Fast (1khz rate) Slow (30Hz) Fine (1Hz Rate)

I have a total of 9 Racal GM6790 Receivers with a total of 35 filters

Check out: http://www.primenet.com/~davida/racal.htm

Email davida@primenet.com for more information, (lotus 123,
or Excel file format) radio S/N's and Filters

Factory Manual and some spares, and test cables

All Radios have the remote control board (RS232)

David

Mint condition IC-735 with optional 500 Hz CW filter.  This
unit has very few hours on it.  It makes a great all mobile
all mode HF tranceiver.

This unit has only been connected to power and turned on to ensure it works. Other than that, it is brand new. It's a great all mode radio (AM, FM, SSB, FSK, CW) that covers 180 - 10 meters + 6 meters. Recieve covers 50 Khz - 60 MHz continuous.

Last day. Check it out:

New or not, starting @ $1109.00 is quiet high for a rig that is no longer in product. Especially since better rigs can be had for as little as $850.00. Not hard to see why there have no or few bidders.

Realistic HTX-202 2M handheld in very good condition.

Includes battery pack, and aa battery pack and charger and manual, rubber
duck antenna.

Includes radio shack communications fanny pack.

Includes accessories external antenna connector (bnc to so-239), lighter socket power adapter.

$100 shipped. COD add $10.

I have 2 of these available, buy one or both. Price is firm.

Like New 4amp hour radio shack gel cell 12v battery add $20. (just purchased this year; I have 2 of these).
I used these for longer public service events, fits in fanny pack.

Newsgroups: rec.radio.amateur.swap,rec.radio.commercial-lmr,rec.radio.swap

Question: Does anyone know if the MX300-T 800MHz HT can be used as a simplex radio? I have a pair (MX-360 with keypad), the channel selector(bank or talk group?) knob is marked "A, B, C, D". The radio label states the radios have the following freqs: F1 860.7875FS, F2 859.7875, F3 858.7875, F4 857.7875, F5 856.7875. Model: N1336A. How can this radio have 5 frequencies yet only have a 4-position selector? All the radios do now is buzz (low freq. tone), at different rates depending on the position of the switch on top of the radio (one symbol=telephone, the other is "Y" shaped). Any assistance is greatly appreciated. Thanks in advance!

Deal fell through, still need to sell my Dentron DTR-2000L 160-10m full legal power amp. This amp uses a single 8877 (not included).

The amp is clean and unmodified and comes with the original manual. It has been checked by an Ham amp. expert and is working properly.

```
These sell for $1200. with a full power tube.  I am asking
$900. shipped conus, $850. picked up or delivered within
a reasonable drive to Southern NH (reasonable offers
welcomed).

I have a Swan 500 for sale. The rig is about a 7 1/2 on the 1-10 scale.
The faceplate is clean with one scratch. Here's the status: The receiver
is working on all bands and the VFO tunes nicely. The band switch must
be a little dirty as the VFO will jump a bit as you start to change
bands. The finals are dead so I can not attest to the transmit part
except to say that in the tune position it does put a few watts out.
I've cleaned it up it appears that it had been sitting for quite a while
due to the dust accumulation in the rig. I'd normally keep it and
restore it but have other projects going. Includes the power supply. I
suppose I can post a photo if interested, but don't have one handy.

$195 and I'll pay the shipping from Rochester Hills, MI

Question concerning Motorola MX-300S series Secure
(DES/DVP) radios:

Can a DES module be swapped with a DVP module in a
secure capable MX series radio? I was just curious if
the radios used a common main board and the DES/DVP
connector pins were the same. Thanks in advance for
your help!

Kenwood TS-930SAT with all of the Fox Tango filters.
2 500hz CW and 2.1khz SSB filters. It still has the
original crystal filters to allow very crisp audio.
This is done with the IRCI filter switch kit.
The radio was updated by Kenwood and had the super
alignment by IRCI. I also have the remote tuning knob that allows the
vfo to be controlled next to the keyboard. I have a shipping box, the
owner,
and service manuals.
Asking $1000 + shipping

Icom IC-765 with the stock filters. I have a SM-20

desk mike as well. I have the original box as well as the shipping box.
I have a home brew rs-232 control interface. It has been tested with
CT, NA, TR & LOGPLUS.
Asking $1200 + shipping

Reason for selling, want to upgrade to FT-1000

We have for sale (1) Kenwood TS-440S/AT radio for sale. We are asking $600US. The radio is in 8.5-9/10 condition with only minor scuffs on the top of the unit.

Has spent most of its life in the box (was for a project that never got off the ground).

Comes with original packaging, user's manual, and hand microphone.

The radio has had the extended TX modification done.

For more information check out the web page below.

Remove the capital letters from the reply email address (NOSPAM).

Thanks!

GREAT SOUTH BAY AMATEUR RADIO CLUB & SUFFOLK COUNTY RADIO CLUB
ARRL APPROVED LONG ISLAND HAMFEST - MARCH 7, 1999

On March 7, 1999 the Great South Bay Amateur Radio Club & Suffolk County Radio Club will again sponsor an indoor Hamfest. The location will be at the:

Knights of Columbus
400 South Broadway
Lindenhurst, Long Island, NY

There will be radio equipment, electronic componets, computers and accessories, softeware, books, technical manulas, ARRL information, Amateur Radio License Exams, Door Prizes. General admission is $6.00.
Free Admission for spouses and children under 12.

VE - ARRL - 12:00 NOON

For exam candidates please remember to bring your original FCC Amateur Radio license (if licensed), any C.S.C.E. forms that are pending, plus a photocopy of each, pens, calculator, formal form of ID (preferably photo ID), and the examination fee, to the exam session. 1999 ARRL/VEC fee is $ 6.45, exact change is appreciated. Novice exams are free.
The VE team is from ISLIP ARES Group and GSBARC. Thanks guys.

For vendor and additional information pleas contact, Peter Portanova WB2OQQ at(516)541-4886. Email info@gsbarc.org

Talk-in will be via W2GSB Repeater on 146.685 4Z(136.5) PL.

Food Service during the Hamfest will be provided by members of the Knights of Columbus Council.

Information is also available during the GSBARC 2 meter info net every Monday evening at 7:00 pm on the W2GSB repeater, 146.685 -600 4Z(136.5) PL required. You may also write to:

Here's what I got. No price is set in stone, I'm sure I'm probably off base with some of it :) If I am, I'm sure you'll be more than happy to "inform" me otherwise :)

Computer (most of it): Cyrix P200+, Otto mainboard (specs on request), 3.5 floppy, Enlight Mid-Tower AT 250W case, new ATI Xpert98 3D/2D accelerator card, new 16bit/3D Yamaha 719 sound card, new 3 button mouse. No harddrive, CD-Rom or ram. $400.00

R/S HTX-212   2m mobile (I think most are familiar with this one :) $150.00
TrippLite PR-12   12A Power Supply 9ACont.-12A ICS. Used for above radio. $65.00
Cushcraft AR-2 2m Ringo Vertical antenna, great for attics only 3.9' tall $30.00
Arrow Antenna 2m 3 element beam w/ Magnavox LD rotor. In attic too. $70.00
Yaesu FT-2500M 2m mobile w/ optional CTCSS board. $225.00   Nice radio!
Diamond SG-7500NMO 2m/70cm 3.5/6.0 dB mobile antenna with nmo large magnet mount. $55.00 This antenna rocks!
Bencher BY1 Iambic paddle with MFJ 407C keyer, I purchased both as demos from HRO less than 6 months ago. $65.00 for paddles, $50.00 for keyer or $105.00 for both.
R.L.Drake TV3300LP 1kw filter. $15.00
R/S Digital Sound Level Meter. $40.00   This ones for the audiophiles :)
R/S Gordon West Learning Morse Code cassettes $10.00
R/S Benchtop Digital Multimeter (new from warranty replacement) $75.00 Specs on request.
Lowrance X-65 fishfinder with speed/temp sensor (still shrinkwrapped). $250.00
Oh almost forgot, a 486SX25 (yes pathetic I know) processor only. $15.00 obo

Still digging around so keep an eye out :)

Hello Everyone,

I just wanted to drop a few names of some guys I have dealt with over the past couple of months who have been a real pleasure to deal with. The deal went through smoothly with lots of communication between parties and the parties involved were real gentlemen. I have dealt with these guys on the newsgroups and/or the For Sale/Swap mailing list at forsale-swap@qth.net.

These GOOD GUYS are:

W2KL - Louis Bocchetti
KA1SRD - Edward Rauer
KD1UX - Glenn Pike
KJ5NO - Brian Horst

Thanks guys, it was a pleasure doing business with you.

73, Piero - N3FVG

I have 3 Plectron Patrol recorder/receivers for sale. These are VHF in the
154.xxx frequency range. Asking $100 for all three or $40 each.

Let me know.

Don't know where this one came from, appears to work. Asking $25 plus shipping.

Let me know.

For Sale:

Yaesu FT736r S/N: 61060120 with:

Standard:

* 144 MHz & 440 MHz
* Operator's Manual & Schematic Diagrams

Options Included:

* 50 MHz module (<-= Work the world!)

* CW keyer filter (Internal / Installed w/manual)
* FIF-232C CAT System Computer Interface (External / Included w/manual)
* FTS-8 CTCSS (Internal / Installed w/manual)
* WinTrak Pro Satellite Tracking Software for Win 95/98/NT! (<-= Serious Stuff Here!)
* Semi Auto Bencher Key included! (<-= WOW!)
* 150 QSL cards designed just for you! (<-= Cool! see below!)

This radio is a GEMSTONE for VHF Weak Signal Work! Satillite/SSB/CW ready. I worked my 6m VUCC (#980) in less than 6 months with this radio. And that was barefoot too! I have received fantastic signal reports from this rig with the majority at 59's! My 6m computer log has been well posted on the Internet at:

http://www3.sympatico.ca/the.hiltner.family/6m-log.htm (needs some updating for Feb99! Hi Hi!).

Very Clean & respected unit (Lets face it, its my "second wife"!, so my XYL says! (HEY!, at least my wife KNOWS where I'm at!)). A great contest radio to say the least! And with Sun Cycle #23 on the rise, you can top my radio accomplishments! 6m Sure is grand!

And if your new at VHF Work, and don't have any QSL's (or you just want a change from the standard QSL you may already have...), I can help you out. I will make you a nice run of your own QSL cards! I enjoy doing this for other HAM's! Designed my own QSL Card! Get the best reviews on the backs of my replied QSL's (QSL TNX).

Selling price:

$1,500.00 USD (Will NOT brake up this package deal!)
or
$1,750.00 USD I will include my Mirage A1015g 150w Brick! (Rigged for Auto Detect Switching!) and comes with a spare Pre-Amp transistor too! (only 6 months young!)

I will ship (Drive) the Toronto / Ottawa / Montreal corridor. (lunch @ Wendy's)
Would also consider Buffalo / Rochester / Syracuse for a nice spring drive. (lunch & a tank fill).

My address & Phone number are listed below.

```

Hello all,

I have an Icom Deskmike #IC-SM6 and need some info about it, such as schematics and manual. All the wires from the gain pot on the bottom have come loose and need to be rewired

Any help would be appreciated

1 Icom UT50 encode/decode tone board. 50$ shipped

1 Icom BP85 12 volt 5 watt battery pack,hardly used, 40$ shipped

1 Icom BP90 Alkaline case for S series,takes AA batteries, 10$ shipped
SOLD

1 Icom leather ht case,fits s series attatched to BP 85, 20$ shipped
SOLD

1 Icom 3SAT,220 HT, had a horrible life before I bought it,kept it going

the last two years by multiple repairs. Bottom plate needs replacement,battery lock tab gone,internal battery is gone and have been

using these wires to supply 12 volts to the rig. Top input for 12 volts is loose and has intermittant short,hence the jumper scheme. Microprocessor OK,can see display by moving 12 volt plug on top. Numbers

on keys are readable,radio has lots of wear and currently does not work.

Too small and complicated for me to repair,good fixer-upper for someone on a budget, 40$ Shipped SOLD

All items prepaid with US postal money order. Thanks W4AMP Jim O'Brien
Atlanta

Will consider offers for all,but individual prices are firm.

I've been looking for interesting ways to sell stuff on the internet.

Your method does address the growing problem of people saying they want it and not following thru.

If ten people send you money, you'll have nine very angry people. How do
you deal with this?

My first thought was that it exposes the buyers to much greater risk of
fraud. One could get
10x the price and keep it all. After thinking about it a little, I guess a
person could always
promise 10 people that they bought it and get the same place.

Does it reduce the number of interested people? I'd personally never send
any money on a deal
like this. Just too much risk and too low probablilty. If you lived in
same town and I could
pick it up, then it might work to my advantage.

So, how does it work in practice?   Does the grief you get outweigh the
potential delay of the
first person not following through?

Hello Everyone,

I am looking for a very small dual band (2M/440) HT to keep with me at work. Doesn't have to be fancy, looking for something with 1/2 watt to a watt or better, such as YAESU FT-50, VX-1R,; KENWOOD TH-G71A,; ICOM IC-T8A or IC-T42A radios. Should be in good working condition but doesn't have to be brand new. I already have the tiny Alinco and it just isn't quite enough power or antenna, (poor telescoping antenna). Please respond directly by e-mail with description, accessories included, and asking price.

Thank you,
Piero - N3FVG

Greetings,

We have a Spectrum 440 repeater. Need a service technician who
can repair these units. Someone who will not need to study the manuals
for hours... Looking for a good repeater tech who knows this model.

Best of 73! And thanks for any pointers.

Al Rabassa, NW2M
nw2m@qsl.net

Tri-Ex Mod 237 40' crankup tower for sale.
Has thrust bearing. Tower is steel. Tower is
a little browned due to rust, but can be cleaned
up. Cable should be replaced for about $15 at
a cable shop. Asking only $250

Intech 1000 Watt 1.6 to 30 mhz commercial radio station.
Class AB for voice and high speed data. Class C for
FSK and CW operation. Solid state mosfet PA.
Microprocessor controlled. Com 1000B amplifier,
PS 248 Power Supply, and COM 3620 Control Unit.
This is a complete HF station with transmitter and receiver
with a common control unit, and power supply all rack
mounted in a Rack about 3-1/2' high. The system is about
10 years old. Unit originally cost over $10,000. The company
is still in existance. I have all the manuals. Asking only $750
for the whole thing

X-MimeOLE: Produced By Microsoft MimeOLE V4.72.3110.3

Timex TI3000 125 watt solid state HF SSB radiotelephone system.
System consists of a Receiver/Exciter control head with keypad
entry and a Power Amplifier/Antenna Coupler (automatic antenna tuner). Unit
is microprocessor controlled and has the ability to store
48 simplex or 24 duplex channels in non-volatile memory
within it's operating range of 1.605 to 25.1 Mhz. Unit has extra
weather resistance due to it's design for commercial marine
applications. Operates from a 12 volt supply. I have all the operating
and technical manuals. Unit is about 10 years old but was only

in service about 1 or 2 years when purchased and hasn't been used since. There is a minor problem with the microphone audio circuit, but I've heard this has been successfully overcome by bypassing that circuit with the use of a power mic. This unit cost around $3000 when new.

Asking only $400 for entire system.

I Have some new heavy duty galvanized steel tower side mounts to support verticals off the side of a tower.

Also, I have one side mount used for mounting a small beam, such as for 2 meters or 440 off the side of a tower. This mount supports rotor and antenna and nearly allows antenna 360 degree rotation around tower.

$20 ea for the vertical mounts
$30 for the rotor/beam support

This is at least half what I paid and the vertical mounts are in perfect conditon - never used.

I'm located near Tacoma Washington.

KLM 440-50N Very good condition.
Sell for $75

2 meter KLM beam. 21 foot long - haven't

counted the elements, but there's a lot.
This one is a log-yagi. Some of the mount
insulators are broken and some of the elements
are bent a little, but it can easily be put back in
good condx.
Sell for $45

I also have verticals.

Can you ship it UPS ??
I'll take it if so.

Hello Everyone,

Thank you for all the replies for my wanted post. I ended up purchasing an ICOM IC-T8A HT, still new in the box at a great price. Thanks again for all the replies.

I have for sale a YAESU FT 736.
vhf / uhf all-mode base station.
stock bands are 2meters+ 70cm. also has 6 meters and 1.25 meters.
plus the FVS-1/1a Voice Synthesizer and the FTS-8 CTCSS Module.

on a scale from 1 to 10 this rig is a 8.
it has very light scratches on it, a a tiny tiny ding in the tuning knob.
i bought it this way. the radio has been to yaesu for a Dust and clean.
and the IF circuit replaced. i bought it broken and had it fixed.
it is 100% working condition and is looking for a good home.

First $1500 gets it shipped free. no trades i need the cash.

We are moving and I need to lighten and shrink the
load, so my nice and clean and complete Cushcraft
A3S with 40m Add-On is for sale.

Asking $235. or best reasonable offer.

Cannot be shipped (is partially assembled), must be
picked up in Southern NH or I can deliver within a
reasonable distance.

Hi,

I have 3 MT1000 pkgs. for sale. Radios are UHF mid split, 438-470, 8 channel, scan, H44GCU7180AN model #, stubbies, beltclips, excellent condition! (will do 16channels if needed...) In following configurations programmed to your needs:

1 ea. MT1000, sp/mic, charger, battery.......... $230

1ea MT1000, charger, battery................ $220

1ea MT1000, 3 batteries...... $200

LOT PRICE: $640 SHIPPED CONUS

Please contact via email.. Radios are guaranteed not DOA and in excellent condition. Shipping not included. (if u want all, or 2, I'll ship) No clue on the batteries as date codes are around 96-95, but they seem to hold a charge ok. Prepayment with postal money order, and can offer more info and pix to the serious inquiries.
.... as always, thanks for the time and bandwidth!

1 Icom UT50 encode/decode tone board. 50$ shipped-SOLD

1 Icom BP85 12 volt 5 watt battery pack,hardly used, 40$ shipped

1 Icom BP90 Alkaline case for S series,takes AA batteries, 10$ shipped-SOLD

1 Icom leather ht case,fits s series attatched to BP 85, 20$ shipped-SOLD

1 Icom 3SAT,220 HT, had a horrible life before I bought it,kept it going

the last two years by multiple repairs. Bottom plate needs replacement,battery lock tab gone,internal battery is gone and have been

using these wires to supply 12 volts to the rig. Top input for 12 volts is loose and has intermittant short,hence the jumper scheme. Microprocessor OK,can see display by moving 12 volt plug on top. Numbers

on keys are readable,radio has lots of wear and currently does not work.

Too small and complicated for me to repair,good fixer-upper for someone on a budget, 40$ Shipped-SOLD

All items prepaid with US postal money order. Thanks W4AMP Jim O'Brien Atlanta

I have a very nice Ten-Tec 229B 2Kw roller inductor tuner - 1.8-30Mhz.
About a 7.5/10 cosmetically - some light scratches on case, front panel is perfect. 100% functional.

Would like to trade for a late-model 2M or dual-band ~3 watt HT. Let me know what you have.

Hello Everyone,

I am looking for a "stubby" or shorter SMA connector HT antenna (rubber duckie), for my ICOM IC-T8A. The supplied antenna is around 6"-8" long and I am looking for a replacement shorter antenna. Plenty of dual band stubby antenna's around but haven't seen a tri-band. If you have one for sale or know of a source, please e-mail me direct.

Thank you,
Piero - N3FVG

Give you an opportunity if you need some of this equipment before putting on auction. Parting out (painfully) a Nice Collins 32V2 tx. Just not enuf time to finish it.

1- 32V2 cabinet fresh re-powder coated (black), looks like new......$200. obo

1- 32V2 panel match with cab & freshly silk screened..$100. obo

Have a number of reproduced clear slide rule dials for 32V
$10. ea

The chassis I will part out & it is real clean, transformers, sub assemblies, all. Might do some trading. Want NOS certain tx & audio tubes. All the above + shipping. Terms: I prefer MC/Visa or MO.

I picked up 4 Comco Com-pak II 804 HTs. Anyone know anything about these radios? I'd like to find out the xtal specs, whether or not they'll tune to 6M (were xtalled to 47 MHz), etc. Also interested in schematics.
~~~

Thanks!

Rob, N1NTE

I have the following equipment for sale and/or trade.

*****SOLD***** Icom IC-25A 144MHz FM Transceiver
Frequency Coverage: 143.800-148.195MHz
Output Power: 25W(High), 1W(Low)
Good condition. Works great! Comes with manual.
$75.00 shipped

6' Equipment Rack
Standard 19" wide rack. Large cooling fan mounted on top.
Great shape! On wheels!
Pickup or delivery only. Will deliver withing 25 miles of Lake Villa, IL.
If you have and idea for shipping arrangements, please run them by me. We might be able to strike up a deal.
$425.00

Siemens Programmable Logic Controller
Two Power Supplies, One CPU, One Handheld Programmer, One Digital Input Module, Two Digital Output Modules, Three Bus Modules.
No, this does not program radios. It has a series of inputs and outputs. Once programmed, it will monitor the inputs and will turn on and off the specific outputs.
$150.00

Sony Hyper HAD Color Video Camera
Excellent condition! Comes with 24VAC Power Supply.
$250.00

I am looking to trade for the following:

Kantronics KAM+ TNC

Icom CT-17 RS-232 Level Converter

Vertical HF Antenna

If you have something else you would like to trade, please tell me and I might just want it!

You can e-mail me or call me by telephone.
E-Mail - zman@iwc.net
Telephone - (847) 587-0551 - I have voice mail, so if I'm don't answer, leave voice mail. I'm usually here, but sometimes I'm too busy to answer.

Thank you,
Christopher Zeman, KB9RHA

Let me clarify a few things....

1.) Roland Geter consummated the deal as a "member" of the Maricopa County Sheriffs Department. They were not and still are not happy about this. I filed an official complaint with them...(I'm a police officer in Pennsylvania). Needless to say, Roland Geter is no longer associated with the Maricopa County Sheriffs' Office.

2.) In Pennsylvania and Arizona (shipped from PA to Arizona) Roland Geter committed "Theft by Deception" by his actions.

3.) He didn't "change his mind", he scammed me as he did many, many others. Check out Deja News and do a search of his name, you will see over 500 hits for Roland Geter, many, many of them victims of his scams.

4.) I did make a mistake of trusting "a fellow law enforcement officer". Fortunately the ramifications for Roland Geter were a lot more expensive then the $132.58 I lost.

Hi

Does anyone have a lonely Drake 2BQ Q Multiplier / Speaker they wish to sell?

Please e-mail if you can help.

I live in the UK.

Regards

Simon

710/6011, (2) @ $30.00 ea.  "
```

Will sell as lot for $200.00 plus shipping.

All tubes are N.O.S. in original boxes. I would consider possible trades for tubes more suitable for amateur use.

I have a top case for Icom 781.  It has some blemishes on it, but is not
damaged or dented.  (I just wanted to put a prettier one on, and paid
Icom $207.58 plus shipping for it!!!)  Sold my 781, so wondered if
anybody out there might need a used top case at a reasonable price?
It's Icom part number 969-05872.  How about $65.00 and you pay the
shipping?  (That's about a 68% discount!).  Please don't try to haggle
me down or beat me up on this.  If it gets any cheaper, it isn't worth
sending.  Happy New Year!  Steve Sample / N9FD. (812) 948-2973.  (E-mail
is best for initial contact!)  Thanks!

umm, not to be the politically correct one, but i honestly don't think you
need to be calling people racial slurs just because they don't pay. i am
white, but i also know many white people who do this stuff. be careful
what you say, your life could depend on it in a city....or even a suburb.

VX-1R with extra lithium ion battery, AA alkaline battery adapter, out of
band mod.
Comes with all as when new, even the original box!
 $200 for all. Plus shipping. Works perfectly, just have too many HTs!

Credit card is OK.

As an honest black man, I find this comment totally unnescesary. I have made many deals on the Internet, and customer satisfaction and fair play have always been #1 to me. I wish when some unscrupulous people show their colors that people wouldnt go around generalizing about others and looking for a common denominator. There are good and bad in every race, sect and creed.

Well I have chopped a lot from this msg, and I really cant see why it was
posted to so many groups.
Anyway I am not going to argue about the merits of doing biz with Roland.
But hell guys aint any of you got brains?
I seriously cannot believe that you would send equipment prior to getting
paid for it regardless of method.
Unless the dough is in your hands the equipment should still be in your
hands, an due to popular belief there aint a lot the authourities can do for
you in most cases.
This is particulary true when dealing international or even interstate.
Be warned, get the money first, then send.

Just for the record, please read the replies carefully before sending me
hate messages calling me a racist. Another person quoted my original
message then added a racist slur at the end of my original message. At
no time did I ever include any racial comments or slurs in my original
posts and messages.

Piero

You have the wrong manual with the unit. This is not the "G" 7600.

Newsgroups: rec.radio.swap,rec.radio.amateur.equipment,rec.radio.amateur.swap

We have for sale (1) Kenwood TS-440S/AT radio for sale. We are asking
$600US or best offer. The radio is in 8.5-9/10 condition with only
minor scuffs on the top of the unit.

Has spent most of its life in the box (was for a project that never
got off the ground).

Comes with original packaging, user's manual, and hand microphone.

The radio has had the extended TX modification done.

For more information check out the web page below.

Thanks!

As I posted...I DID NOT POST ANY RACIST REMARKS! If you bothered to read
the thread you will see someone quoted my original THEN ADDED THEIR OWN
RACIST REMARK. At NO TIME did I post a message from myself with a racist
remark! You guys are certainly quick to criticize but slow to apologize.

Piero

Hi,

 Price reduced to bottom dollar... selling FT-900/at in pristine condition
for $725 plus shipping. Radio has built in tuner, keyer, and not a scratch.
Never mobile. '95 manufacture. sorry, no xtra filters or seperation cable.
.30-30 rx plus MARS/CAP. Works great and puts out around 110 watts.. Must
have prepaid money order on this one. includes hand mic, box, manuals,

orig. factory paperwork, reciept of orig. buyer from AES, etc.
thanks for the time!
Randy

Is it me or has this list (rec.radio.swap) suddenly become less Ham user friendly and more dealer, auction, and collector overloaded?

I am finding a tiny percentage of posts even vaguely of interest to a typical Ham looking for something to add to his station without breaking the bank.

Is there another Ham-specific newsgroup we might move to?
Perhaps rec.radio.amateur.swap or rec.ham-radio.swap?

Just a thought! Perhaps it is just a abberation of the past few weeks.
Or perhaps I just need more sleep! :-)

Exactly where to you find the word "ham" or "amateur" in rec.radio.swap.
You are already aware of two other newsgroups with these words in them...So
use them.

All too often, people speak of censorship in this newsgroup, from too much
commercial stuff to eBay bashing. I for one, want to see all that is
available to me, and then make an intelligent and informed decision whether
or not to buy something.

If you want to only be "ham specific", hang out on a newsgroup that specifically caters to you guys. In my view, rec.radio.swap welcomes all.

Rob

13. KENWOOD IF-232C Interface. Clean w/original
box and manual. Asking $65.
14. KENWOOD TM-732A 2/440 mobile. Chassis,
remote mounting cables, mobile mount. No LCD
section (use this assembly as a backup or second
location between which the head is moved)
Asking $95. shipped conus.
15. MOTOROLA MITREK 2m range Mobile. These
commercial quality 30-40w rigs are frequently used
to make Ham repeaters due to their ability to tolerate
continuous duty. They also make excellent packet,
emergency and mobile rigs due to their durability.
These include the main box, remote control head,
cables, and mics. (I have 4 sets.) These are the
4 channel models and you may get the modules
re-crystalled by JAN and others. Asking $35.
as-is each (shipped conus), $55. tested.
They are not abused though they could use a
little cosmetic cleaning.

Happy New Year!

I'm studying (hard) to upgrade my license and get on HF. I would like to find a Kenwood TS-520, since I've heard they're a good basic rig for a beginner. I have a Radio Shack HTX-242 mobile 2m and an Alinco DJ-C1 credit card 2m HT to offer in trade. Both are like new with the original boxes and manuals.

In 1991 I realized a dream as old as my novice ticket: a station with a big gun antenna! I've had a ball with it but now I'm ready to realize another dream: to retire to live in the mountains. My Boulder, Colorado QTH will soon be listed for sale with my favorite realtor. But first, I want to spread the word of this rare opportunity.

Obtaining the permit for a tower in Boulder County is about as difficult as making DXCC Honor Roll. But I have just such a tower: 87' of Rohn 55G and mast, HyGain HDR300 rotator and a 10-element Tennadyne Log-Periodic. The tower permit stays with the site. And, the site is something else.

This QTH sits on the high ground between Boulder and Boulder Reservoir with commanding views in all directions. But, the signal radiated from this site defies simple analysis-it is a big gun antenna on a big gun QTH!

The house will sell quickly when listed. It's a comfortable and spacious home, on a acre of pastoral splendor within minutes of downtown Boulder. Hardwood floors, HW heat, passive solar, two offices, heated shop, unfinished basement...

Until it's listed, as a concession to an early buyer, I will include the tower & antenna with the property. Asking price is TBD but will be in the $500K range. Qualified buyers are urged to contact me directly. Pass the word. 73,

Stan Huntting, KW7KW

Hi People:

After 5 years of good service, I've decided to let my IC-502
go. The 502 is a 6 meter portable (about 6" high, 2" wide, and
5" deep). It has a built in 1/4 wave whip, so-239 connector,
will take "c" batteries for true portable operation. It is has an
analog scale covering 50 to 51 Mhz, and has USB and CW modes.
I have worked most southern states (from EN93) using just the
whip antenna and the built in "power house" amplifier (2 to
3 watts, of course when the band is open!!).

It comes complete with the original 4 pin mic, shoulder strap
and mic envelope (a small pouch that is encorporated into the
shoulder strap).

Sorry, no manual (I bought it used). I used to use it many
times a year when I went camping, but times have changed,
and the family doesn't go camping much anymore.

A solid 9 out of 10 on appearance and operation! Parts of the
front face still have the removable plastic film protector.

$300 Canadian, or $200 USD

I currently have 2 Cessna RT/385-A NavCom Aviation Radios which I am interested in selling. I don't know much about the radios- however, from my experience and slight use, the radios are in excellent condition electronically and good condition cosmetically. One radio works on 14 volts, while the other will not transmit or receive unless supplied 28 volts.

I don't know exactly how much these are worth, but I know that new replacements are about $2700 list. I would like $1,000/radio. If this is that far off base please let me know- like I said, I don't know much about the market. Also, any other information would be greatly appreciated.

Please contact me ONLY via e-mail at TVSJR@SPRYNET.COM

Thanks!
Terry

Looking for the FIF-232C or the W1GEE interface cable Model LCU-3Y1 for Yaesu (FIF-232C Compatible)

Help with PK232 to FT990 hook-up:

The way that the Din plug looks in the book based on the diagram is that the little indent is on the botton that would
mean the narrow part is on the top. When you look at the back of rig it sahow the other way. When I hook it up based on the book. The rig keys ups but does not send Rtty correctly. I have wired like the following.

If you go by the FT990 Manual I wired the following: (Narrow part of plug on top)

Din Plug: Pin 3 goes to Red Pin 5 of PK232
Din Plug: Pin 2 goes to Green Pin 1 of PK232
Din Plug: Pin 1: goes to White Pin 2 of PK232

Symtoms: RIG Keys up and Receives great, But no RTTY.

If I wire the plug based on the back of the rig(FT990, Wide part of plug on top)

Wired the same as above

Symtoms: Rig stays in transmit mode

Any input would be appreciated muchly.

I am trying to locate a schemtatic diagram and a diagram showing the routing of the dial cord for the band switch. This I desperatly need for a Henry 2K-4D (a pair of 3-500Z's sitting on a pedestal). If you can help, please send replies to: Mike W3SLK, E-mail: kc4slk@csrlink.net
Thank you,
Mike

I recently parted a homemade transceiver, and have 2 good power
transformers that may be of interest to someone trying to get an old
boatanchor receiver going, or a Johnson transmitter going.
Pictures/URL for your convenience.

The smaller one is a Thermador CS5565 400volts ct @.02 amps. Mounts
easlily with 4 case screws, and connections are marked. $10.00 plus
postage

The second is a 700volt ct about same size physically as the low voltage
supply transformer in the Valiant. Leads are tagged. $20.00 plus
postage.

Donnie,

Clearly you have no idea what housing costs in Boulder County. $100k buys
you a TRAILER.

Newsgroups:
rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.swap,sci.electronics.basics,sci.electronics.components,sci.electronics.design,sci.electronics.misc

I have the following mint condition, unused, high-quality equipment and
materials
to sell:

--1 HEATHKIT 3201A "DIGITAL TECHNIQUES COURSE"
(2 Volumes).

--1 HEATHKIT ET3700 "DIGITAL TRAINER,"
Includes a total of 4 insertion-type circuit breadboard cards
in a single, well laid-out package.
Also includes:
built-in +-5 and +-12v power supplies;
a variety of square wave TTL clock signal outputs at up to 100 khz;
a built-in DVM/frequency counter;
on/off led logic state indicators, buffered data switches; etc.

It's perfect for quick breadboarding of experimental circuits by means of
inserting component
leads and #10 wires in the little holes on the breadboard cards.

--1 KIT OF IC'S AND OTHER PARTS for doing the experiments in the course.

I bought these items in 1989 just before I became interested in computers
instead of electronics, so I never used them. I had previously taken
Heath's DC Electronics, AC Electronics, and Electronic Circuits"

courses, and found them unusually clear and easy to use, so I suspect this
course is also.

NOTE: This course teaches the fundamentals of digital circuit design
(e. g., AND, OR, and NAND gates; shift registers, clocking, Boolean
operations, etc).
These principles do not change, even if the hardware does.
The course does not teach computer programming, etc. so it should not be
out of date.
The accompanying ICs are TTL.
The course allows you to learn entirely on your own, by means of
"Programmed Learning".
The subject is broken down into manageable units, in each of which they
first tell you what
they are going to explain to you, they explain it, then present an
experiment demonstrating
it. There are periodic tests to help you synthesize what you've learned.

TOTAL COST NEW: $430
COST TO YOU $200, shipped.

hello,
I "inherited" a Heathkit SB-101 but didn't get a manual.
Does anyone have any documentation? Would anyone be willing to
copy pages? Does anyone know where I can purchase a manual?

The unit seems to be in good shape but one of the tuning
rubber bands has broken. If the band is broken,
does the replacement procdeure include alignment?
Anyone know where I can find a replacement part?

Does anyone know anyone who can reliably service the unit?

BTW, I have not been active for quite a few years.
I hope this unit will get me interested in the
hobby again.

regards

Norm,

As for the manual try: http://www.w7fg.com/

As for getting it fixed try: http://homepage.usr.com/r/rtoelect/

I originally posted this as a 2K-4D. Please forgive me for the
re-posting.
Thanks.

I am trying to locate a schemtatic diagram and a diagram showing the
routing of the dial cord for the band switch. This I desperatly need for
a Henry 2K (a pair of 3-500Z's sitting on a pedestal). If you can
help, please send replies to: Mike W3SLK, E-mail: kc4slk@csrlink.net
Thank you,
Mike

RARE AND DESIRABLE, VINTAGE SWBC ITEMS FOR YOUR SHACK!

1. WORLD RADIO TV HANDBOOKS!!! Complete your collection�s gaps now!
-- 1965 (hardbound!) - beautiful shape, $45
-- 1968, 1969 - poor condition, $22 each
-- 1970, 1971, 1973 - vy rough condition, $16 each
-- 1974 thru 1979 - nice condition tho used, many covered with clear plastic contact paper, $14 each
� 1980 thru 1988 - fine to near mint condition, $12 each
-- 1990 thru 1992 - near mint condition, $11 each
-- 1995, like new, $10

2. �NUMERO UNO� weekly private DX newsletter: Wow, a complete run of issues from the heyday of this legendary DX weekly, from 1972 - 1984!! Three binders, 3-inches thick each, jammed full of DX news, pioneering reports on rare stations, feature articles, controversy, you name it. Finally, you can now see just what all the noise was about and read what the �elitists� (hi!) were up to! Full-sized 8.5 x 11 sheets, a stack of paper 9-nches thick, 600 issues. Won�t break this up, to be sold as one lot. $250 firm.

2. FINE TUNING: Again, a mother lode of early issues from another late 1970s/early 1980s private circulation DX every-couple-weekly: issues 1-70, 113-140, 172-239. One stuffed 3-inch binder. Plenty of great DX info. $50.

3. �RADIO NUEVO MUNDO� Treasure Trove: Issues 1-71 of the famous Japanese LA DXing publication from the late 1970s into the early 1980s. Incredible amount of info for the serious LA DXer. Also, includes two books, �LA DXING�, a photocopy of the first book and a bound copy of the second edition, from 1982. Also, the special Fifth Anniversary edition of RNM. And finally, to cap off this orgy of LA DXing paraphernalia, a few stray copies of the Machu Pichu DX Club, published in Peru, and the Bolivia DX Club boletin. $70.

4. �THE RADIO BOYS SEARCH FOR THE INCA�S TREASURE�, here�s one that you

never see, a hardcover �Hardy Boys� type of radio aficionado�s novel for kids, copyrighted 1922. Super condition. If you call yourself a diehard LA Dxer, your shack isn�t complete without this. $50.

5. SOUTH AMERICAN HANDBOOK: Very handy reference, and the historical stuff, of course, doesn�t age. Maps and geographic info make this classic a must-have. Save twenty bucks and buy a used copy! 1983 - $8. 1976 - $6.

6. BROADCASTING STNS OF THE WORLD (FBIS), BOOKS I & II, 1974. Nice condition, 500 pgs of data from the US govt�s listening posts. $10.

7. BEST OF LOUDENBOOMER: NASWA/FRENDX SWBC satire from the 60s & 70s. $6.

8. REVIEW OF INT�L BCSTG: 1983-84 Issues No. 75-87, $3.

9. PASSPORT TO WORLD BAND RADIO: 1988/90/91, $17.50 for lot of all 3 books.

10. VIRTUAL GRAB BAG OF RADIO REFERENCE BOOKS: Japan�s �BCL� (date?); �DXing According to NASWA�; Radio Amateur�s Handbook 1973; The ARRL Antenna Book. Take �em all for only $12

11. POPULAR COMMUNICATIONS MAGAZINE: The First 18 issues!!!! Starts with the desirable Vol. 1, No. 1, in Sep. 82. Great reading and a lot of fun, too. Collectible. $35 for the entire lot, just under two bucks an issue. Great condition.

12. GRAB BAG OF RADIO STATION CASSETTE RECORDINGS: Here�s a real assortment for the LA Dxer: 3 cassettes, two are recordings of Peruvian station IDs from the 70s and one is of Bolivian stations made by the Bolivian DX Club. Bonus: will toss in another 3, I don�t know what they are, might even be old blank tapes, but could be better.. Based on just the first 3 alone, this is a real catch for Andes specialists. $20

13. DANISH SW CLUB INTL BULLETINS: 3/73 TO 7/80, three 3-inch binders chock full of info. Also, bulletins from the Finnish DX Club, 1967/68/71/72. Only $20 for all of it!

14. VINTAGE FRENDX!!!!!!! Saving the good stuff for the end, gang: A lonnnnnnng run of the monthly publication of the North American Shortwave Association, FRENDX, from Jan 1971 through May 1984! That�s 160 issues of nostalgia, news, radio information and feature articles, old names and faces, history of stations, etc. Virtually priceless! .... but for you, the entire lot goes for $250, just a shade over a lousy buck-fifty an issue. You�ll never buy such great reading, so cheaply, again ! (Bonus: a free year of SPEEDX, just for fun.)

15. ANDES FOLKLORICO MUSIC ALBUMS!!!!!!!! Here�s a classic deal for the Latin DX specialists. Imported LP albums (get out your turntables!) from Ecuador, Peru and Bolivia, featuring that beautiful haunting music from the Andes. Finally, you can learn the different between a huayno and a passacalle! Special deal, assortments of 3 albums for $20, or 10 albums

for $50. I have something like 50 albums to sell, so build up your collection now! Sorry, assortments will be as put together by me; no custom orders, please. I will try to make each lot as balanced a set as possible. Also, these are 20 years old and although look to be in tremendous condition, no guarantee that they will all play like new and some warping is probable on the discs.

IN ADDITION TO ALL PRICES ABOVE, BUYER PAYS SHIPPING/HANDLING.

Ralph W. Perry

1 Icom UT50 encode/decode tone board. 50$ shipped

1 Icom BP85 12 volt 5 watt battery pack,hardly used, 40$ shipped

1 Icom BP90 Alkaline case for S series,takes AA batteries, 10$ shipped

1 Icom leather ht case,fits s series attatched to BP 85, 20$ shipped

1 Icom 3SAT,220 HT, had a horrible life before I bought it,kept it going the last two years by multiple repairs. Bottom plate needs replacement,battery lock tab gone,internal battery is gone and have been using these wires to supply 12 volts to the rig. Top input for 12 volts is loose and has intermittant short,hence the jumper scheme. Microprocessor OK,can see display by moving 12 volt plug on top. Numbers on keys are readable,radio has lots of wear and currently does not work. Too small and complicated for me to repair,good fixer-upper for someone on a budget, 40$ Shipped

All items prepaid with US postal money order. Thanks W4AMP Jim O'Brien
Atlanta

Will consider offers for all,but individual prices are firm.

Newsgroups: rec.ham-radio.swap,rec.radio.amateur.swap,rec.radio.swap,rec.radio.scanner,alt.radio.scanner

I have a brand new Icom IC-2SRA hand-held for sale.
It has 2 radios in one package.
A 2 meter transceiver and a scanner.

Transceiver
 Transmit   : 140-150 MHz
 Receive   : 138-174 MHz
 Output Power : 0.5 to 5 Watts (4 levels)

Scanner
 Freq. : 25-950 MHz (Continuous, NO GAP)
 Mode : AM, FM and WFM

It comes with BP-84 Battery Pack, Wall Charger, Softcase,
and Manual, but no original box.
I threw the box away as soon as I bought it.
It's been in the drawer for several years and never been used.
Sure I turned it on to see if it worked OK when I first bought it
and I decided to sell it today. It still works and looks brand new.
I'm asking $300.00 U.S. plus shipping.

73, Robin

I have a Motorola full duplex radio for sale. It was private labelled for Western Electric as a KS21466, but is internally marked as a Mototola TUD1733A. I believe this is a VHF Pulsar II carphone, which would put it on 152/157MHz. It is complete and clean, including the 'Trisolector' duplexer. It is synthesized, and I have heard that with work they can be made into a repeater. I have a cable, but no head. I don't have a service manual, but can point you to someone who does. $100 and split UPS shipping; either check in advance or COD are fine.

This radio has seen very little use. It is a really nice little radio, but definitely for 'specialized' use. It would be a good radio to keep in your jacket pocket so you always have one handy. It will last up to 100 hours on a charge. This unit will receive 118-174MHz and transmit 136-174. It is complete with everything it came with (box, manual, snap-in charger). I have heard these radios are not longer manufactured, due to the introduction of the dual-band model, and are getting hard to find. I would like to trade for an Alinco DJ-S11 or sell outright for $75 + shipping.

Chris KB0WWP

I would also trade for an HTX-202.

For more specs, see the Alinco website: http://www.alinco.com/usa.html

1 Icom UT50 encode/decode tone board. 50$ shipped

1 Icom BP85 12 volt 5 watt battery pack,hardly used, 40$ shipped

1 Icom BP90 Alkaline case for S series,takes AA batteries, 10$
shipped-SOLD

1 Icom leather ht case,fits s series attatched to BP 85, 20$ shipped

1 Icom 3SAT,220 HT, had a horrible life before I bought it,kept it going

the last two years by multiple repairs. Bottom plate needs replacement,battery lock tab gone,internal battery is gone and have been

using these wires to supply 12 volts to the rig. Top input for 12 volts is loose and has intermittant short,hence the jumper scheme. Microprocessor OK,can see display by moving 12 volt plug on top. Numbers

on keys are readable,radio has lots of wear and currently does not work.

Too small and complicated for me to repair,good fixer-upper for someone on a budget, 40$ Shipped

All items prepaid with US postal money order. Thanks W4AMP Jim O'Brien Atlanta

Will consider offers for all,but individual prices are firm.

Update-1/18 People have made offers on BP85 and the rig. Let me know if you are sending a money-order. Cannot reserve without confirmation.
Thanks Jim

Dan,

Is that the rotor and control box? Norm's Rotor service has just the rotor brand new for $350. You didn't mention control box, so I'm assuming it's rotor only?

Hi,

A really great accessory...... A high quality weighted spinner knob!
This spinner knob matches the band/tune/load knobs already on HENRY amplifiers.
This knob will fit any other 1/4" shaft as well. Metal bushing with TWO set screws, this knob is QUALITY!
When we want to move from 160M or 80M to the higher bands or back again there sure is quite a few turns of the roller inductor (tune) needed to get there.

Well, here is the solution!
I have been testing this knob for a few weeks and believe it's "just right"!
$32 delivered USA (Calif. add $2.39 tax), Foreign e-mail for shipping price.
RADIODAN has them! Credit cards OK.
See it at http://radiodan.com/Henry/parts/spinner.htm

Was supposed to be for my packet BBS but my 386 is cutting the mustard
just fine. It is set up as a Win95 net-surfer right now and it seemed
like overkill for my requirements. It's a 486DX with lotsa ram, modem,
soundcard, speakers, mouse/pad, keyboard and monitor.
```

$300+ shipping, w/o software - will trade for best radio

-Chuck

Hi,

CAN HAVE PROGRAMED TO YOUR SPECS.
I have 3 MT1000 pkgs. for sale. Radios are UHF mid split, (438-470) 8 channel, H44GCU7180AN model #, stubbies, beltclips, excellent condition! should be convertable to 16 easily. :)
In following configurations:

1 ea. MT1000, sp/mic, charger, battery.......... $240

1ea MT1000, charger, battery............... $225

1ea MT1000, 3 batteries...... $200

Please contact via email.. Radios are guaranteed not DOA and in excellent condition. Shipping not included. (if u want all, or 2, I'll ship) No clue on the batteries as date codes are around 96-95, but they seem to hold a charge ok. Prepayment with postal money order, and can offer more info or pics to the serious inquiries..... as always, thanks for the time and bandwidth!
Randy, KC8CPK, KAG0900

This isn't very encouraging, Paul! It's been a week since I sent a "flat-rate" envelope via Priority Mail from my local Maryland post office to a Post Office Box in Florida. It still has not arrived, despite assurance from the postal clerk when it was sent that "it will arrive there in 2 days". Now, another trip back to the post office to wait again in line for 1/2 hour, fill out forms necessary to "trace" it, and "hurry up and wait" until they report they can't find it. Some priority!

The 2-3 days applies to "most letters". The post office will tell you nothing is guaranteed. They of course, dont offer this information up front.

GL on the tracing. I have not heard anything. The person on the other end did get his part of the paper work to sign stating he never received the package...but that is it.

Hi Gang,

I have a TS-930SAT (Auto-tuner), w/250 Hz CW filter in excellent condition both cosmetically and electrically. The 930 has an absolutely great signal processor to give you great SSB, an with the 250hz filter you can really pick out the signals during QRM. Asking $750.00 + shipping.

e-mail direct if interested.

I have some Heil BM-10 headsets NEW for $40 each with #5 (full range element).
Also have some Heil HM-10 mics with #5 elements NEW with cable and clip ready for your stand. These look like a singers mic and are very high quality. $40 each.

As of now I still have some Yaesu and Kenwood wired versions although it is

the same connector and just needs rewiring if I don't have the one for your
brand when you call.

I have a few cable adapters for Heil Prosets at $10 each. Collins, Yaesu,
Kenwood
And a very few Heil B4K microphone boom with #4 DX element, This unit
replaces the entire boom mic on a BM-10 headset, and has the 8 pin plug, 1/4
jack and cable. Usually the guys use this to switch between contest and DX
#4 element and the regular ragchew #5 element, $25 for this unit, again NEW!
Plus ship. Credit cards OK

Todd:

How is it they have perfect cellular capabilities?  I didn't think the
BC9000 was capable.  Isn't it the UBC9000, or something like that?

Thanks,
Bill Crocker

Wattmeter is in great condition. Was checked out by technician in 96 and
found it to be in great working order. I just do not have a need for this
nice of meter anymore..
Comes with

4410-3	2-30 mhz
4410-5	25-80 mhz
4410-6	50-200 mhz
4410-8	200-1000 mhz

operational from 200mw-1kw
Leather case hold meter and 6 elements

I have a BC-9000 and it doesn't pick up cel calls....but you see, i'm
not interested in listening to someones personnel telephone calls so I
dont' care.

For what it's worth;

I repair amplifiers so I go through a LOT of
sweep tubes....

I currently get ALL my sweep tubes from Bob.

I have tried various other vendors but Bob consistantly provides me with better tubes at a lower cost than the other vendors did...

I hope everyone on this newsgroup has a safe, happy, and healthy holiday!

Dennis

I got sooo many responses to the BM-10 headsets (all sold out now, thanks!)
that I dug around the warehouse and came up with 4 dusty boxes with HEIL
BM-5 desk mics. BRAND NEW in box.
I have only 2 for Kenwood, 1 for late model (8 pin) ICOM, and 1 for Yaesu.
All with 8 pin plugs.
These are very nice units with goose neck and ptt bar on smart looking base.
All have #5 element for natural sounding audio.

$50 each + ship.

First payment (credit card OK) and shipping info gets choice.
Also, still have some HM-10 mics (looks like singers mic) with same #5
element and cable/connector for only $40 + ship NEW!
And a few B4K (Kenwood) and 1 B4Y (Yaesu) boom mics complete with cable and

connector for the BM-10 headset. This has the DX #4 element and can be simply installed by removing the original boom so you can easily have a #4 and a #5 element boom available for DX/contest use or regular ragchewing.
NEW $25 + ship.

Phone on Thursday OK 800 995-2929 or e-mail

Hi folks,
An announcement about the new HENRY reflector on contesting.com.
Here's how to join the group! We talk about anything related to HENRY Amplifiers.
Address a new e-mail to majordomo@contesting.com

In the body (NOT subject) of the message simply type subscribe henry

When you get the confirmation back, just copy and paste into a new e-mail the authorization information.

You will get another confirmation that you are all set and welcome to the list! Then, after you're all set-up just type henry@contesting.com to post new messages.

Hope to see all HENRY enthusiasts there!

Hi,
Well, I'm giving it up in lieu of a new computer....

NEVER MOBILE

Yaesu FT900AT
auto freq. tracking tuner built in
modded for MARS/CAP
all the normal base model stuff....
no scratches or dents, works great!
Purchased new in 1995 from AES, (I even have the reciept.. over $1300!!)
Radio, manual, hand mike, box, papers to include factory mods, etc...
factory filters
Priced at $775, uship, No trades, please....

Please reply via EMAIL
Picture emailed on request and this one will have to be prepay, so
references available, too, from these groups even!
thanks for the time and space,
Randy, KC8CPK

X-MimeOLE: Produced By Microsoft MimeOLE V4.71.1712.3

I found 3 Plectron Receiver/Recorder combos after moving to a new house. All are functional but a little dusty. They are VHF (154.xxx) and have ship dates of 1975, 1979, and 1980. Two are the Patrol model and the third is an unknown (Model # RR16X4).

If any one has an interest, please email me at khoerz@accessus.net

Kurt

Anyone wishing to sell an IC 706 MKII for a reasonable price please
email me privately. Will pay shipping as well.

I am in search of a DTMF palm microphone for the Radius/Maxtrac line of radios. I have a Spectra Desk Mic in great condition which I would like to trade. Any one interested?

Also, does anyone have the fourth-row DTMF modification for the DTMF moto mics?

Please reply via e-mail TVSJR@SPRYNET.COM because my ISP has been dumping a bunch of news lately.

Thanks!

Terry

I have a brand new Icom IC-2SRA hand-held for sale.
It has 2 radios in one package.
A 2 meter transceiver and a scanner.

Brief Specifications;
Transceiver
 Transmit : 140-150 MHz
 Receive : 138-174 MHz
 Output Power : 0.5 to 5 Watts (4 levels)

Scanner
 Freq. : 25-950 MHz (Continuous, NO GAP)
 Mode : AM, FM and WFM

It comes with BP-84 Battery Pack, Wall Charger, Softcase,
2 Antennas (one for Tranceiver and one for Scanner),
and Manual. but no orginal box.
I threw the box away as soon as I bought it.
It's been in the drawer for several years and never been used.
Sure I turned it on to see if it worked OK when I first bought it
and I decided to sell it today. It still works and looks brand new.
I'm asking $325.00 U.S. plus shipping.

Happy New Year, 73.

Robin

During a recent move to a new house I found several items I no longer need and that are taking up space. I have the following for sale:

1. Regency TRH-202 mobile VHF 2 ch ($100)

2. Maxon SM-4150 VHF 16 ch ($225)

3. Motorola Convert-A-Com for MX300 series portables ($50)

4. Motorola Saber rapid charger ($100)

5. Federal Signal 100w compact siren speaker ($60)

6. Uniden Force rapid charger APX 111B ($25)

7. Motorola rapid charger NLN6895A for HT-220 ($25)

All prices are plus shipping from St. Louis metro area.
Feel free to contact me for further information, serial #'s, etc.

I have a Knight Kit R-100A reciever, with a nice copy of the manual for sale. It doesn't have the S-meter option, but it is in good shape. I put photos on my web page. The URLs are:
http://www.wwc.edu/~frohro/Knight/R100A.jpg and
http://www.wwc.edu/~frohro/Knight/R100A_back.jpg
I'd like $75 plus shipping from 99324. If you don't think this is a fair

price, make me an offer.

73,

Rob, KL7NA/W7

Hello Everyone,

On August 26, 1998, I posted a warning message about doing business with Roland S. Geter, Sr., WB6LNA. Mr. Geter posted a "wanted" message on the newsgroups in late June, 1998 for laptop computers for a "law enforcement" project. I e-mailed him about a Toshiba Pentium notebook I had for sale that was not working and needed minor repair. I specifically explained to him what was wrong with the notebook, we agreed on a price and Roland Geter agreed to pay shipping. He requested Fed Ex C.O.D. shipping, since he "did a lot of business with the shipping depot in Pheonix Arizona" and things would go a lot easier. It cost me $132.58 in shipping and C.O.D. charges to ship the package.

I shipped the package as per his specifications and request and advised him of such. When the package arrived in Arizona, Roland Geter failed to pick up the package as requested by Federal Express several times. After several days the package was returned to me less my shipping charges I had already paid.

After that, I contacted Roland Geter several times by e-mail and phone to no avail. He always told me he was sending payment but never did. I finally took further action in late August, 1998. I posted the original warning message, contacted the proper authorities and filed a formal complaint with the Maricopa County Sheriffs' Office in Arizona. Roland Geter had stated to me he was a deputy with that sheriffs' office, (which later proved to be false).

After a lot of pressure from many on the newsgroups and the sheriffs' office, Roland Geter contacted me in late September to call a "truce" and settle our dispute. I had received several e-mails from others who had been ripped off by Roland Geter so he agreed to pay me and then "square up" with the others. At that time I also agreed to stop the pressure from the newsgroups and the sheriffs' office

To make a long story short, to this day I still have not received my money. I have tried to contact him several times a week to no avail. The others involved also have not received payment.

I am continuing to follow up with the authorities involved. I am posting this message to warn others of Roland Geter's bad dealings, i.e. bad checks, failed payments, bad trades, etc., that he has done to many, many others and myself. Do yourself a big favor, do not deal in any way with Roland S. Geter, Sr.

Piero

This really does not constitute fraud. Looks like he just changed his mind to purchase a dead laptop. As a seller you always risk that someone will change his/her mind while waiting for the package to arrive. maybe he found something better.

Piero Sassu <n3fvg@worldlynx.net> writes:
: Hello Everyone,

:   On August 26, 1998, I posted a warning message about doing business
: with Roland S. Geter, Sr., WB6LNA. Mr. Geter posted a "wanted" message
: on the newsgroups in late June, 1998 for laptop computers for a "law
: enforcement" project. I e-mailed him about a Toshiba Pentium notebook I
: had for sale that was not working and needed minor repair. I
: specifically explained to him what was wrong with the notebook, we
: agreed on a price and Roland Geter agreed to pay shipping. He requested
: Fed Ex C.O.D. shipping, since he "did a lot of business with the
: shipping depot in Pheonix Arizona" and things would go a lot easier. It
: cost me $132.58 in shipping and C.O.D. charges to ship the package.
:   I shipped the package as per his specifications and request and
: advised him of such. When the package arrived in Arizona, Roland Geter
: failed to pick up the package as requested by Federal Express several
: times. After several days the package was returned to me less my
: shipping charges I had already paid.
:   After that, I contacted Roland Geter several times by e-mail and
: phone to no avail. He always told me he was sending payment but never
: did. I finally took further action in late August, 1998. I posted the
: original warning message, contacted the proper authorities and filed a
: formal complaint with the Maricopa County Sheriffs' Office in Arizona.
: Roland Geter had stated to me he was a deputy with that sheriffs'
: office, (which later proved to be false).
:   After a lot of pressure from many on the newsgroups and the
: sheriffs' office, Roland Geter contacted me in late September to call a
: "truce" and settle our dispute. I had received several e-mails from

: others who had been ripped off by Roland Geter so he agreed to pay me
: and then "square up" with the others. At that time I also agreed to stop
: the pressure from the newsgroups and the sheriffs' office
:   To make a long story short, to this day I still have not received
: my money. I have tried to contact him several times a week to no avail.
: The others involved also have not received payment.
:   I am continuing to follow up with the authorities involved. I am
: posting this message to warn others of Roland Geter's bad dealings, i.e.
: bad checks, failed payments, bad trades, etc., that he has done to many,
: many others and myself. Do yourself a big favor, do not deal in any way
: with Roland S. Geter, Sr.

: Piero

So if you can please explain in detail what fraud has taken place? People that buy on the internet are looking for deals. When a better comes by than i am sure that majority if you will go for the better deal. I have sold things on the internet COD, I have gotten bad checks refused packages...etc. I do post if i am defrauded in anyway, but if I get a refused package than that my loss.....it would be my fault because I did not close the deal securely. i wont go crying to a ng.

I never said anything about fraud. I'm not even clear on the legal
definition of fraud.
But since you asked, I will expound a bit about the "Golden Rule".

When I make a verbal contract to buy/sell an item, I buy/sell it per the
verbal contract. If I find a better deal, I might buy that TOO.
I DO NOT leave the other party holding the bag for my change of heart.

Yes, I've had it happen to me, but that's no excuse for me to do it to
you.

Remember that ILLEGAL covers only a small part of DISHONEST.
I do believe that it is beneficial to the group to expose those who are
dishonest. I also believe that there is some correlation between
condoning dishonesty and exhibiting dishonest behavior.

In summary, if you tell me that you think it's ok to refuse a COD on
a whim, you ain't never gonna get no COD from me. I'll probably also
suspect your other motives and never buy anything from you. It's my
choice based on your statements.

Is that detailed enough?

MFJ Deluxe Power Sentry, Model MFJ-825.

It has two meters on its face, one for forward power, and the other for reflected power or SWR. It can be switched to measure average power, peak power, or SWR. It has 3 switchable modules installed, to measure power as follows:

HF - 200 or 2000 watts Full Scale.
HF - 2 or 20 watts FS.
VHF (50-175 Mhz) - 20 or 200 watts FS.

NOTE: Each measurement module has its own set of input and output "UHF" connectors, so no fiddling is necessary to measure the power output from different radios

Its case is black metal with chrome trim--no plastic! It's very accurate and in near-perfect cosmetic condition. It dates from 1983. I packed it carefully away in a cool closet, along with several other high-quality items, when I changed my main interest from ham radio to computers in 1987. You get the manual with it.

Total original cost in 1983 dollars: $240 You pay $150.

Model HD1418 Active Audio Filter -- dates from 1988.

Assembled solid-state unit in mint condition. Attractive design. Has bandwidth settings for CW, SSB, and RTTY. The CW filter includes a tunable notch/peak filter with variable BW. The unit also has high and lowcut capabilities to get rid of "rumble" and "hiss". It has its own audio amplifier.

Very dark brown metal with red and white lettering--no plastic! Coordinates with the Heathkit rigs of the era. In perfect cosmetic condition. I packed it carefully away in a cool closet, along with several other high-quality items, when I changed my main interest from ham radio to computers shortly after I assembled it. You get the manual with it.

Asking $100

Hi.

I have following items for sale;

1. TS-530S
Serial # is 1 million.
Cosmetic condition is about 8.5 out of 10 scale. No major scratches but

some dings on the bottom of the case near feet. Front panel is in
perfect condition.
Electrical condition is 10 out of 10. No filter installed.
Comes with original manual and hand mic (not original).
Price is $320 in US fund.

2. Lafayette HE-30 general coverage receiver
Covers all HF and MF bands. It has band spread and BFO.
Cosmetic condition is about 9 out of 10. It is in very good condition.
Electrical condition is 10 out of 10. Perfect working order.
comes with original manual. All tubes have been checked OK with TV-7.
Price is $80 in US fund.

3. Murch UT-2000B 2kW tuner with meter.
This tuner handles 2kw, and has meter on it.
Appearance is about 7 out of 10, but it works perfect.
It had a little crack on the edge of ceramic core of center coil, but I
repaired it professionally. Electrical condition is 9.9 out of 10.
Price is $100 in US fund.

All prices do not include shipping. I normally use Canada Post (same as

US Postal Service) and I will pack it nicely when I ship.

If interested, please call or e-mail me. Thanks and 73.

Hi folks,

I have a few brand new in sealed boxes SGC230 tuners.

$350 plus ship (price good till 12-31-98 or when all gone)

See http://radiodan.com/ted_stuff/sgc230.htm

Well, after another deal fell through, I have a box of tubes to sell. I'm unsure of their worth.

1 GE 17JB6A
1 GE 1G3GTA/1B3GT
2 RCA 10JT8
2 RCA 12BE6
1 RCA 15KY8A
1 RCA 2ILU8
1 RCA 42KN6
1 RCA 5814A
2 RCA 5JL6
1 RCA 5U4GB
1 RCA 6AY3B
1 RCA 6EH7/EF183
1 RCA 6EJ7/EF184
1 RCA 6GE5
1 RCA 6GH8A
1 RCA 6GJ7/ECF801
1 RCA 6HM5/6HA5
2 RCA 6JT8
1 RCA 6JZ8
1 RCA 6U8A/6KD8
1 Realistic GoldClad 17JB6A
1 Realistic GoldClad 6GK6
1 Realistic GoldClad 6LT8
1 Sylvania 3A3B

1 Westinghouse 1G3GT/1B3GT

I would like to sell the whole box, but would consider splitting.
E-mail with best offer- TVSJR@SPRYNET.COM

If you reply to the ng, I may not receive- my ISP's news server has been really bad about "losing" things lately.

Thanks!
Terry

the po has lost 2 of my packages in the last 4 years or so, but considering i handle about 3-4 a week, I'd say this is not bad. I have had too many problems with UPS to ever consider using them. They do lose stuff, but more often, it is abused, and sometime totally destroyed during shipment. The po has yet to damage one of my packages. I'd prefer the less than 1% dissapearance rate of the USPS, to the 5% damage rate of UPS.
Of course, this is only me personal experience, but it is true. I always insure everything. It just makes it easier to accpet a loss.
And as far as speed, for the money, i prefer priority mail, and it usually is within 2-3 days like they say. It is cheaper than going to my local mailboxes USA place, and having them send it UPS. The UPS place that is closest to me, is not really close.

Just my $.02, YMMV.

Lowband/6 meter equipment for sale:

RCA Series 1000 mobile radio, model CMFM7MMRNC. 100 watts, presently on 39.xxMHz. Complete system with 4 frequency scanning control head & bracket, speaker, mic, mounting tray, and control/power cable. Has optional noise blanker option. Also includes complete, original RCA 700/1000 series lowband service manual set in three ring binder. Clean, complete, working when pulled a couple years ago. $75.

RCA 'Supercarfone' mobile, model CMFA50N2TT. 50 watts, 45-54MHz split, presently on 47.98. Complete system with 4 frequency 'integrated' control head with mtg bracket, speaker with mtg bracket, mic, mic hangup box, mounting tray, control and power cables. Also includes complete, original RCA Supercarfone/Superfleetfone lowband service manual set. Radio is very clean, head and cables complete, but a little dirty and worn. Working when pulled a couple years ago. $60.
Both for $115.

Equipment is in southern NH; I would be glad to show it if you're in the area. Prices plus shipping. Check in advance or COD (at cost) are both fine.

Hi.

I have following items for sale;

1. TS-530S
Serial # is 1 million.
Cosmetic condition is about 8.5 out of 10 scale. No major scratches but some dings on the bottom of the case near feet. Front panel is in perfect condition.
Electrical condition is 10 out of 10. No filter installed.
Comes with original manual and hand mic (not original).
Price is $300 in US fund.

2. Lafayette HE-30 general coverage receiver
This receiver is almost identical to Trio-Kenwood 9R59.
Covers all HF and MF bands. It has band spread and BFO.
Cosmetic condition is about 9 out of 10. It is in very good condition.
Electrical condition is 10 out of 10. Perfect working order.
comes with original manual. All tubes have been checked OK with TV-7.
Price is $70 in US fund.

3. Murch UT-2000B 2kW tuner with meter.
This tuner handles 2kw, and has meter on it.
Appearance is about 7 out of 10, but it works perfect.
It had a little crack on the edge of ceramic core of center coil, but I repaired it professionally. Electrical condition is 9.9 out of 10.
Price is $100 in US fund or best offer.

All prices do not include shipping. I normally use Canada Post (same as US Postal Service) and I will pack it nicely when I ship.

If interested, please call or e-mail me. Thanks and 73.

Merry christmas !!!
http://www.radiotelephone.net/merry_christmas/

@@@ Santa's Christmas Blow Out Clearance Price @@@

TRC-485 AM40 (~12W modifiable) / SSB 80 (~30W modifiable) CB radio (cigarette plug ready !) for sell.   Radio Shack Price $299.99 CAN + Tax.   Asking only $129CAN (or US$89) o.b.o. (shipping included to Canada or U.S.)
Rarely used.   Mint Condition.

TRC-484 AM 40 (~12W modifiable) Mobile CB radio (cigarette plug ready !) for sell.   Radio Shack Price $129.99 CAN + Tax. Asking only $49CAN or $35US (shipping included to Canada or U.S.) o.b.o.   Rarely used. Mint Condition.

Modifications to above CB radios are available at my web site.

I will try to attach an antenna for both CB radios.

If anyone is interested in pro-28 (30 channels 29-54, 137-174, 406-512) scanner, I will give away for $39CAN (or $29 US), shipping included to Canada or U.S. (It costed me about $150 !!) o.b.o.

Money orders please (except for Canada, C.O.D. is ok.). Please make a cheque in your choice of Canadian or US dollars.

If you are interested in the rigs, not the price, you can still contact me to reduce the price as everything is sold first come, first acceptable price, first serve basis !

If you want all three of the above, you can get them everything for $200CAN or $139 US.   Shipping ?   Included !!   You can't miss this opportunity !!

Merry Christmas !!

SG-2000 with PowerTalk control head.
    Electrical condition is 10 out of 10, but cosmetic condition is 9 out of 10.
    Some wears on edges and corners (no major though).
    Comes with all mounting bracket and manuals.

Perfect radio for any type of mobile operation.
Price is $1300 in US fund plus shipping.
Thanks.

ment,
```

1) Standard (brand) "Twin Bander" (Dual Band) 144 MHz/450 MHz FM Transceiver. Includes optional 100 channel memory upgrade. Can also be used for repeater or packet duties. All controls are on the microphone so you can mount the main unit anywhere in your car or truck. It includes the 2m extension cable between the microphone/controls and the main unit. It works perfectly and looks near new. It's never been abused. It has been modified so it can transmit/receive on Civil Air Patrol frequencies. It is made for mobile use so it needs 12 volts DC to operate on. It has around 50 watt output and can receive from 118 MHz to over 800 MHz in addition to the ham and CAP bands. It can receive on two different bands simultaneously, and can also be used as a cross-band repeater. Simultaneous receive and transmit is possible.

2) ICOM IC-W2A Dual Band FM hand-held Transceiver. 5 Watts output. Also modified for use on the CAP bands that have no negative effect on normal operations. This also receives outside the hambands too and includes 118 to over 800 Mhz. It can receive on two different bands simultaneously, and can also be used as a cross-band repeater. Simultaneous receive and transmit is possible. This unit can also operate packet. 60 memory channels.

3) Cushcraft R-5 HF Vertical antenna. Perfect for the 10M band now coming back alive. This unit is near-new, since it was only installed a

couple hours before a neighbor threatened to sue me over it (CC&Rs). Please, no comments on that LOL... I dealt with that some time back. I don't recall the specific bands this antenna works but 10/15/17/20 come to mind.

If you don't want to spend cash, I will negotiate for certain items I want you can buy off your credit card and ship to me in exchange.

Please, PLEASE... don't contact me UNLESS you are serious about buying one or more of the above units, I get too much email as it is. I'll accept best offers for them all. $350 minimum for the Standard, $300 for the ICOM, $150 for the Cushcraft. You pay shipping costs.

73,

Jerry Bransford

Better to go with Express Mail if you want a tracking number. With that,
you can track your package via the USPS web site. I've followed packages
all the way across the country with that thing...!

In article <36686FCD.5DDEA034@bellsouth.net>, ni4l@bellsouth.net says...
> Last week i send out 875.00 in postal M/O for some gear.
> I ask the clerk which would be the best way to ship, Why Priority Mail
> certified of course. it will be there by monday.......Well here it is
> Friday and it still didn't show up! Let me tell you this They cant track
> it . It is out there in Limbo somewhere...
> I did purchase postal M/O But that is another story, if it is lost
> because of there
> incompetence then im the one who has to suffer for 60 days before they
> issue a refund. Listen up.. You ship m/o best bet is overnight/insured
> make sure it has a tracking number that can be traced.
> ANY ONE ELSE EXPERIENCE THIS WITH PRIORITY MAIL I'D LIKE TO KNOW...

Just a note to let you know of an established guy who is now on the web.

We've known him for years as Duane Heise AA6EE. He has ARRL books & CDs, and other goodies like this.

Vist him and bookmark http://radiodan.com/aa6ee/

Hi folks,

I have lots of web space available and would be very happy to share my site and skills in putting up a small WebSite for your HAM related products that YOU offer to us all. Products, Services, Tips, etc??
I know it sounds crazy, but I will put up and maintain a site, makes changes and updates when you want ALL FOR FREE!!
See http://radiodan.com/aa6ee/
As an example of one such site I have put up for a guy who sells books and CD's at discount to us all.
Another example is http://radiodan.com/IIX/
E-mail these guys if you have any questions about the authenticity of my offer!

Merry Ho Ho Ho!!!

E-mail me if you have any questions.

Hi All.  I'm looking to get involved in 6 meters and need a radio.  I have
AT&T 486 DX4/75 mhz laptop with color screen, 20 megs ram,  540 meg HD,
33.6K modem, WIN95, etc etc.  Great little machine with leather carry case.
Will take $350.00 for it or trade for radio equipment.   Thanks.

I have quite a few AOR AR-210 TNCs. Use as standard AX.25 packet. Great for portable operation as these about the size of a cigarrette pack. I use one for regular base operation for DX packetcluster. Works great and very inexpensive!
$75 + ship each.

Optional ni-cad battery $25

See it at http://radiodan.com/ted_stuff/AR-210.htm

I sent a radio to K0XM in Kansas from Winter Haven Florida via priority mail on 1Dec98. It has not been delivered yet. The post office has a form to fill out and they claim they will look for the package...but I have already sent the money back for the radio.

It's UPS or Fedex for me. The USPS will get no more of my business.

how do you pack your stuff? i havent had a single problem with USPS yet. when i'm done packing something up you can heave the box across the livingroom without fear of breakage providing its no heavy enough to destroy the packing material. i recvd some pretty lousy examples of packaging from some folks and some well packed items from others. for labels i use bright yellow post-its that are stuck to the package using clear 3M heavy duty tape, you can spot the label from across the room.

i have a buddy who works at miami international and he's witnessed packages from UPS going into the dumpster just because it fell off the conveyor and onto the floor, worst of all its been their supervisors doing it!

i have yet to deal with fed-ex but dont think i will since their prices arent too competitive.

MFJ Deluxe Power Sentry, Model MFJ-825.

It has two meters on its face, one for forward power, and the other for reflected power or SWR. It can be switched to measure average power, peak power, or SWR. It has 3 switchable modules installed, to measure forward power as follows:

HF:
200 or 2000 watts Full Scale
HF:
2 or 20 watts FS
VHF (50-175 Mhz)
20 or 200 watts FS.

This should cover just about all your station power measuring/testing needs, I would think!

It's black metal with chrome trim. It's ery accurate and in near-perfect cosmetic condition. It dates from c. 1987. I packed it carefully away in a cool closet, along with several other high-quality items, when I changed my main interest from ham radio to computers, You get the manual with it.

The price is $125

This is the forrunner of a newer model which encorporates cross needle technonlogy and covers all the same frequencies and ranges. The newer model sells for $85 and can often be found on sale at $10 or so off. Your price is about $75 to $85 too high.

I forgot to mention: Each module has its own input and output connector,
so, no connecting and disconnecting is necessary. Three different rigs can
be connected simultaneously.

I have a VHF Visar that truly is 'as new' - no marks on it, and the
original Motorola programming still in it except for two channel I
programmed to
test with. It has the antenna and owner's manual; it does not have the full
keypad option. I would like to trade it for a UHF Visar; preferably the
mid-split, but high split is OK also. I would prefer to keep my battery
etc., and you keep yours, but would consider including either battery(s)
and/or nylon case for the right deal.

Regards,

Phil Barber

I do dont understand the "do not post ahead of time"
that Glirsun is talking about. So he doesn't have to
look at it all day? *shrug*

Maybe it has just been a long day and my brain is not
in gear any longer.

Tom

I have an ongoing series of sales on eBay for HP Journals dating back to 1952. The issues currently available are from the '70's and I am constantly adding older issues to the sale.

By clicking on the link below, you will go to the January 1978 issue and from there you can follow the link to all the other issues that are available at this time.

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=46285232

Thanks very much for your interest.

Huh? HP Journals for sale? A couple years ago I called HP, they sent me
whatever back issues I wanted for free.

John

WTB: ARRL Advanced Class License Manual - the one that's good thru 6/30/99. I'd like to take the test before then, so I need one with all the pages in legible condition. This may be your last chance to sell yours. The ARRL wants $17 including shipping...Give me a price for yours mailed to me in Texas. Please respond by direct e-mail since I may miss a post in this newsgroup.

Last week i send out 875.00 in postal M/O for some gear.
I ask the clerk which would be the best way to ship, Why Priority Mail
certified of course. it will be there by monday.......Well here it is
Friday and it still didn't show up! Let me tell you this They cant track
it . It is out there in Limbo somewhere...
I did purchase postal M/O But that is another story, if it is lost
because of there
incompetence then im the one who has to suffer for 60 days before they
issue a refund. Listen up.. You ship m/o best bet is overnight/insured
make sure it has a tracking number that can be traced.
ANY ONE ELSE EXPERIENCE THIS WITH PRIORITY MAIL I'D LIKE TO KNOW...
thanks chris   73s

Yep. I sent my USPO Money order to Tom Kasey in Kentucky certified priority mail with return receipt requested and they never had him sign for it or send back the receipt. There is no record of anything. I made my inquiry to Louisvile and they sent back the form saying they never dealt with it. Of couse the MO was cashed so hopefully my recourse will be to claim that it was stolen from the mail since they just handed it to anyone there: assuming some postal employeee didn't rip it off and cash it himself! I am now dealing with it that way. I'll keep everyone posted on what happens. This will be a good lesson since this is the worst case scenerio that could ever happen to anyone. Keep looking for subject headers called "Kentucky RIPOFFS!

Ask the Post Office, priority mail is treated EXACTLY like first class mail.
When they say 2-3 days, that is actually their target for first class!  Of
course there are no guarantees.  The only time priority mail makes sense is
if the cost is less than the cost of regular first class.  It sometimes is
and sometimes is not because its a flat fee whereas first class is so much
for each ounce after the first.  If you are sending a letter or a MO or
such, dont be sucked into paying $3.00 for the same service 32 cents will
buy !!!!

I just sent two packages to the same address from CA to AL. One was sent
on Tuesday and cost $11.00 to mail priority. It arrived on thursday in
great shape. The other was heavy and cost $31.00 to mail on wednesday
and it arrived on friday in great shape. Two days in both cases and with
great service from USPS people and not an AK-47 in sight :) . I have
stories about big brown that will give you the shudders.

I have heard of these stories for years and know that a good many of them are true. However, I have to stop and think about how much "stuff" the USPS handles in a year and by percent how small the problems are.

The boys in the brown trucks are very picky about what they will and will not ship, not the USPS. I know there have been and will be problems but, I still feel the best job for the money is the USPS. And, they don't stop in the middle of the street and block traffic while they unload........I know it's a pet peeve.

Hi, have a Yaesu commercial radio for trade or sale... need a GP300 programming cable, not a homebrew, radio is 6 channel, 4 watt UHF 450-470 split with dtmf pad and nc40 dual-slot rapid/slow charger. Will program to suit if needed. sale or trade.
radio isn't mint, but is fine working unit. email for details.
thanks,
Randy

Hi.

I have following items for sale;

1. TS-830S
Serial # is 1 million.
Cosmetic condition is 9.5 out of 10 scale. No visible scratch anywhere.
Electrical condition is 10 out of 10. No filter installed.
6146B finals are in perfect condition and I cleaned all switches with
Pro-Gold contact cleaner few months ago.
Comes with original box and manual, but no mic.
Price is $360 in US fund.

2. TS-530S
Serial # is 1 million.
Cosmetic condition is about 8.5 out of 10 scale. No major scratches but

some dings on the bottom of the case near feet.
Electrical condition is 10 out of 10. No filter installed.
Comes with original manual and hand mic (not original).
Price is $320 in US fund.

3. Drake C-Line
R4C has serial # 17xxx. 4 position mode selector model.
500Hz filter included.
No mod has been done on this unit.
Cosmetic condition is about 8 out of 10.
Electrical condition is 9.9 out of 10 (because of the age of the
receiver).
T4XC has serial # 27xxx

Cosmetic condition is about 9.5 out of 10.
Electrical condition is 10 out of 10 (low hours on this transmitter)
with AC-4 and MS-4 included, but no mic.
Price for the whole set is $400 in US fund.

4. Murch UT-2000B 2kW tuner with meter.
This tuner handles 2kw, and has meter on it.
Appearance is about 7 out of 10, but it works perfect.
It had a little crack on the edge of ceramic core of center coil, but I
repaired it professionally. Electrical condition is 9.9 out of 10.
Price is $100 in US fund.

All prices do not include shipping. I normally use Canada Post (same as

US Postal Service) and I will pack it nicely when I ship.

If interested, please call or e-mail me. Thanks and 73.

Greetings,

This radio is in excellent condition. Very clean. Non smoking environment. (No disrespect to smokers, my wife used to smoke. Some people like to hear about the non smoking environment.) The radio is a 2 meter/70 cmtr all mode. Sat/and packet ready. Hand mic, tone board, box and manuals. $1000.00 Shipped. Thanks in advanced.   73, Stuart KB8VIY 440-352-7787

Lafayette HE-30 general coverage receiver in very good condition for
sale.
Covers all HF and MF bands.  It has band spread and BFO.
Cosmetic condition is about 9 out of 10.
Electrical condition is 10 out of 10.  Perfect working order.
comes with original manual.  All tubes have been checked OK with TV-7.
Price is $100 plus shipping.
Thanks.  Chris  VE3UVT

This is really one of those things that IS as it appears ! NO SMALL PRINT!!!
Good till 12-31-98
Just one Ham who found some bargains passing them on to you!

40-60% off all existing stuff on my shelves from
AEA, Isopole, Ameritron, AOR-210 TNCs, CSI (private patches), Cushcraft, CW filters, Daiwa, HFX propagation software, JPS noise reducer, Kantronics, KLM antennas, M2 antennas, MFJ, Mirage, RF Concepts, SGC-230 tuners, solar panels, Timewave DSP units, Vectronics, Ramsey kits, The Clip belt clips.
All NEW in box. Manufacturers warranty applies. Sales are final.
Here is where you need to pay attention: LIMITED ONLY TO STOCK ON HAND!!!!!
This means that if it is not listed on the WebPage I CANNOT get it!!!
These prices are WAY below dealer prices! Visa/MC OK

See all the stuff at http://radiodan.com/hamindex.htm

MFJ Deluxe Power Sentry, Model MFJ-825.

It has two meters on its face, one for forward power, and the other for reflected power or SWR. It can be switched to measure average power, peak power, or SWR. It has 3 switchable modules installed, to measure forward power as follows:

HF - 200 or 2000 watts Full Scale.
HF - 2 or 20 watts FS.
VHF (50-175 Mhz) - 20 or 200 watts FS.

NOTE: Each measurement module has its own set of "in" and "out" UHF connectors, so no fiddling is necessary to measure power output of different radios.

Its case is black metal with chrome trim--no plastic! It's very accurate and in near-perfect cosmetic condition. It dates from . 1983. I packed it carefully away in a cool closet, along with several other high-quality items, when I changed my main interest from ham radio to computers in 1987. You get the manual with it.

Entire assembly bought for $240 in 1983 dollars. The price is $150 today.

i need a couple used 4cx250b tubes and one socket with screen bypass
built in. [440mHz amp project]

i've got a itt/triton 6366 to trade [120w drive 3kw output up to 50mHz]
this tube is worth a bit but i've built an hf amp for it and have plenty
of spares so i can let one perhaps two go for the stuff i need now =]

I always come up with varying results when I use a search engine to look for an amplifier.

I'd like to hear from anyone and everyone privately about what words YOU use to search for amplifiers.

Which words individually?
Which two or three word phrases?
What can you think of?

Please reply privately to me as this won't be of much interest to most newsgroup viewers.

For Sale: 2M (50 watt) Linear Amplifier and pre-amp

This amp is just over one year old and is in excellent condition. The current list price for the amp is $119.95 at AES (which is where I bought it). I am willing to sell the amp for $70 or best reasonable offer. I got my amateur radio license a while back and have just gotten out of the hobby for one reason or another. Please let me know if you have any questions or are interested. I'd be more than happy to answer any questions you may have. Please feel free to e-mail me at: mnicolia@greenapple.com

Model: MH-A103 (Maha)

This amp is designed for use with any VHF band handheld or mobile transeiver with an RF output power rating of 2.5 to 5 watts to increase it's output to a nominal 50 watts and has a built-in GaAs FET receiver pre-amp.

Features
----
* 50 watt output with 2.5-5 watt input
* Low noise pre-amp
* Dual Mode (FM & SSB)
* SWR protection circuit
* Reverse DC power polarity protection

Specs

Frequency range: 144-148 MHz
Modes: SSB/FM
Input: 2.5-5 watts
Output: 50 watts
Receiver gain: 18 dB
Impedance: 50 Ohms
Connectors: Type M (SO-238)

DC Input: 13.8 Volts
Current Drain: 8 Amps (max)
Dimensions: 5.3" (W) x 1.7" (H) x 6.3" (D)
Weight: 2 lbs

There is more information about this product at:

http://www.maha-comm.com/products/poweramps/mh-a103.htm

Please contact me if interested (mnicolia@greenapple.com).

Hi all.. please be aware that ALL merchandise I ordered from Roly has arrived a little late, but AS STATED IN CONDITION STATED, People do sometimes have difficulties and we can't plan for the unexpected, so let's cut the guy some slack. I posted with a simple question: 'where did you go and what happened to your contact lines?' This apparently sparked a rash of other postings, I assume, of a less than polite nature.... I hope it wasn't my posting that started it and if so, I do apologize to anyone affected.
Roly, if you're out there...Thanks, and hope u resolve the problems, whatever they were and all turns out for the good.....
73 to all,
Randy

I have an excellant condition ICOM IC-551.
6M SSB/CW/AM rig (no FM board, FM was not good on this rig anyway!).
Has the rare optional PBT (pass band tuning) installed. 10 watts out.
Perfect working condition and about a 9 consmetically.
Very sensitive and selective, built in Noise Blanker, selectable AGC, dual VFOs, memories!
This rig has a REAL S-meter, not a light show! Very clean, not a TVI generator.

See it at http://radiodan.com/xcvrs/icom551.htm

Built in AC power supply. I have worked 42 states on 10 watts and an indoor dipole with this rig!
You can too!

(I can accept credit cards)

You must have never experienced FM on the 551, 10 watt or 551-D,  80 watt
Icoms.  The quality of FM is as good as the new radios of today.

I have two TM2400 radios. These are Kenwood 2.4ghz mobiles. They are based on the same chassis as the TM742 triband radios. The 2.4ghz modules take up two slots in the radio therefore you can add one more band using a standard TM742 band module. Kenwood only sells this model in Japan and they are no longer in production however you can still occassionally find them at isolated ham shops in Japan.

These are brand new, still in the box although I took one out just to look at it. I paid 13999 yen plus 5% consumption tax plus 10% import duty. That translates to $1364 at the exchange rate of 118 which is what it was when I bought them. I'll sell them for that price each plus shipping. I also have a mobile antenna and a base antenna which I will sell to whomever buys one of the radios.

I have a Yaesu FT530 2m/70cm handheld forsale.
Case is a little worn, but has new keypad, antenna and side buttons.
Just factory serviced by Yaesu.

Includes:

 NC-50 2 pocket desktop rapid charger
 EDC-5B 12vdc filtered power cord/cig. lighter adapter
 1500ma Periphex battery
 600ma factory battery(works, but case is taped together)
 User's Manual AND Service Manual

Asking $250

Acceptable pre-payment in advance by Postal Money Order only.

Dan

Hi,

After the latest wind storm messed my Ham IV rotor up, I've decided it is maybe time to look for a better solution. If you have a prop pitch motor or rotor you would condsider selling me, please send me a note.

Thanks & 73,

Rob, KL7NA/W7

Sorry I don't have a prop pitch motor to donate or sell, but I would like to
mention that they sure are awesome rotors. My brother had one in the 60's
from a B-29 which was very slow but very sure. The thing probably could have
rotated the house if we could have figured out how to get it (the house) on
top of the tower.

I recently purchased a used FT-530. I am rather fond of it, and it's
performance. I got one more battery than listed here, but paid $300. I
wish I had seen this one first.

I have two TM2400 radios. These are Kenwood 2.4ghz mobiles. They are based
on the same chassis as the TM742 triband radios. The 2.4ghz modules take up
two slots in the radio therefore you can add one more band using a standard
TM742 band module. Kenwood only sells this model in Japan and they are no
longer in production however you can still occassionally find them at
isolated ham shops in Japan.

These are brand new, still in the box although I took one out just to look
at it. I paid 13999 yen plus 5% consumption tax plus 10% import duty. That
translates to $1364 at the exchange rate of 118 which is what it was when I
bought them (and about what it is now). I'll sell them for that price each
plus shipping.
I also have a mobile antenna and a base antenna which I will sell to
whomever buys one
of the radios.

I have one....with the original output gear, you will have to adape it
to the tower. the one i have on the tower has ben there foe 25 yeears
and still works. 24 volt 10,000 to 1 gear ratio....allows the motor to
run a little before getting the to the position...keeps the grears
lubed.   it still has value to the airplane restorrers so the price is $
850. too high for the cssual amateur, butif you can get one its the
best... hp

I have two TM2400 radios. These are Kenwood 2.4ghz mobiles. They are based on the same chassis as the TM742 triband radios. The 2.4ghz modules take up two slots in the radio therefore you can add one more band using a standard TM742 band module. Kenwood only sells this model in Japan and they are no longer in production however you can still occassionally find them at isolated ham shops in Japan.

These are brand new, still in the box although I took one out just to look at it. I paid 13999 yen plus 5% consumption tax plus 10% import duty. That translates to $1364 at the exchange rate of 118 which is what it was when I bought them (and about what it is now). I'll sell them for that price each plus shipping.
I also have a mobile antenna and a base antenna which I will sell to whomever buys one
of the radios.

I have a new Sony ICF-SW77 shortwave receiver. One only. This unit was the visual demo in a glass glass (internal store display) and was NOT used. With box, manual, like new.

List on this unit is $649.

You can own it for $350 shipping included to the lower 48. Shipping anywhere in the world is possible for extra $.

See it at http://radiodan.com/rx/sony_sw77.htm

I'm selling this receiver/transmitter combination on eBay at

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=45793183

I bought these receiver/transmitter pair about 5 years ago and used them for about a year before I moved to an apartment. At the time I boxed them up they worked great. A matching speaker is included in the price along with a morse-code keyer and a microphone (it doesn't have a stand though). I have the original manuals, boxes, and an advertisement (text included below) that ran in magazines when the radio was new.

I will pay shipping (which is about $35 due to the fact that the receiver and transmitter weight a bunch). For method of payment I would prefer a cashiers check. I will accept a personal check I'll wait for it to clear before shipping the goods. If the radio is DOA (dead on arrival) I'll refund your money.

Gordon Edwards, N4VPH

Here's the text from the advertisement (when it was new):

Kenwood developed the T-599D transmitter and R-599D receiver for the most discriminating amateur.

The R-599D is the most complete receiver ever offered. It is entirely solid-state, superbly reliable and compact. It covers the full amateur band, 10 through 160 meters, CW, LSB, USB, AM and FM.

The T-599D is solid-state with the exception of only three tubes, has built-in power supply and full metering. It operates CW, LSB, USB and AM and, of course, is a perfect match to the R-599D receiver.

If you have never considered the advantages of operating a receiver/transmitter combination... maybe you should. Because of the larger number of controls and dual VFOs the combinaton offers flexibility impossible to duplicate with a transceiver.

Compare the specs of the R-599D and the T-599D with any other brand.
Remember, the R-599D is all solid state (and includes four filters). Your
choice will obviously be the Kenwood.

The following items are for sale, prices do not include shipping, e-mail
direct if interested:

Two Hy-Gain "Hy-Quad" antennas, one completely rebuilt with 14ga 168
strand
"Super Flex" wire, one needs new wire. $200 for the pair.

Homebrew RF-Deck uses pair 4-125's, about 500W out needs HV supply:
$150.00
(The parts in this thing alone are worth $150.00)

Unbuilt Heathkit 5-Position Rotary Coax-Switch $50.00

Heathkit DX-60B w/matching HG-10 VFO: $120.00

Heathkit AM-2 Swr Meter: $10.00

Heathkit HN-31 "Cantenna" dummy load $25.00

MFJ-16010 300W Random Wire Antenna Tuner $25.00

HTX-202 HT in good condition, with external hand mic/spkr
w/2 batteries. The batteries for this need work, so only $65.00

Linear Amp Parts (sold as set, will not split): Pair of 4CX1500B medical pulls, w/1-Socket/Chimney,
Peter W. Dahl Plate transformer a 115/230 VAC primary and a 1250 VAC @ 1.5A CCS secondary
8-1500mfd @ 450V Computer Grade caps, pair of 5KV block diodes,
pair of ducted blower fans (pulls from military equipment) all for $400.

Radio has a LCD display, 12 digit keypad, and many other buttons. It is a handheld. I am not sure of the frequency but I believe it to be 800mhz. Radio is in good shape, corner of battery is chipped. *No charger included*.

$200 or best offer.

i have CSI private patch V forsale.

it works in several modes to fit a variety of needs.

i've used it mostly in simplex mode with 1 radio [dr-119]
with connections made through the mic jack.

complete repeater controller if you want to use 2 radios or
seperate tx and rx units.

speed dials, fully programmable over air or on built in keyboard
or with the telephone.

remote base operation in any mode.

$200.00 u.s. dollars includes shipping via postal priority.

thanks for your time.

Hi all,

Since the JRC NRD-535 receiver has been discontinued, are there any discounts on this receiver out there? Also, would someone know of any radio closeout/liquidators that might have this radio? I've been searching for one of these radios, and would greatly appreciate any information you might have.

please reply to mroriole@gte.net if you have any information.

Thanks in advance,

-jim

Newsgroups: rec.radio.swap,rec.radio.amateur.swap

I have two Cessna RT-385A NavCom Aviation Radios which I would like to sell.
Both radios light up at 14 VDC, however one will not receive- probably a 28
volt version (however, an Astron variable supply will let you run it).
Replacements sell for around $2,000 new. These radios are in 8 of 10
condition, and include the radio itself.

These are the same radios used in many aircraft for navigational aids as
well as voice communcations. They have a D-Sub connector which handles all
functions, and I should have pinouts around somewhere.

Make an offer...

Thanks
Terry

I'm looking for an old NexGen motherboard and CPU combo for a class I'm going to be teaching this summer.

It must be working, and I'd perfer it to have PCI slots and the instruction book, but will concider others if not. If you got one for sale, remove the anti-spamming works from my addy and e-mail me and we'll negotiate the price.

```

I just picked up a Bowtie antenna and it doesn't match up to the manual I
have for the HF5B The dimentions are the same(12ft x 6 ft) but it is
missing a few traps.And it is too small for their 10/11 meter bowtie.
Did Butternut make another Bowtie..maybe a 3 Band model???
If so,is there any manual available.I will pay copying and mailing costs.
Thanks in Advance

I have for sale a UHF Motorola Visar radio, like new condition. It  has
DTMF Keypad that lights up, but radio model is a NON DTMF unit. The
radio was re-cased with a DTMF case but radio functions normal
otherwise. Radio does signaling though. Comes with charger, 2 1500mah
batts. pager style clip. All for $250.00 (buyer pays shipping)
Radio split is 450-520mhz (Can program in ham bands) Programming free
with purchace.

Hello all!
I have a KENWOOD TR-7800 2 Mtr mobile for sale
it has mobile mount (sturdy),NEW nicad memory backup batts,MIC, and
COM-SPEC TE-32
PL DECK, Unit has its share of scratches but works great puts out 5 or
25 watts
15 channel. It kind of looks like a HF rig at first glance and has DTMF
on face
This radio was recently serviced and aligned at BURGHARDTS in So. Dakota

I just have too many radios now only reason for getting rid of it
I am asking $200 I ship for the package
If interested Please email
tiny2nz@jorsm.com
Thanks Tiny

I guess you couldn't get the pad to work. I am still interested in the radio since you lowered the price. I'll just use it for talking.

Hi,

I recently acquired an old Knight Kit R-100A receiver, and it is missing a
main tuning knob.  I've scanned a couple of images in of it so you can see
how it
looks.  It is about 1.9 inches in diameter.

A photo of the front is available on the web at:
 http://www.wwc.edu/~frohro/Knight_knob_top.jpg

A photo of the back of the knob is on the web at:
http://www.wwc.edu/~frohro/Knight_knob_bottom.jpg

If you have a spare, please send me a note!

Thanks & 73!

Rob, KL7NA/W7

Rob:

You should be able to find very similar knobs at most electronic supply houses, even Radio Shack. Or are you restoring it, and concerned about maintaining original parts?

Bill Crocker

i've got an hm-103.
it's the mic that came with my 706.
no dtmf but works/looks great.

a friend of mine used it with his 2710h while i replaced a chip resistor in the stock mic to bring the audio down to an acceptable level.

I am looking for an NC-15 drop-in quick charger for my FT227R. I will settle for the NC-18 compact charger (wall wart) for FNB-4 battery packs if I can't find the NC-15 for a reasonable price. I want to deal pretty fast as my old charger is dead and the rig is pretty useless with no juice. Thanks in advance for your help.

This is the last day for this auction. I'm selling my tried and true 520se
with the optional 500hz cw filter installed. Rig is in good cosmetic
condition - (some light scratches on the case, face is very good), and
excellent operating shape. With manual. Only reason it's leaving is that I
just bought a new radio (TS-570D) and wife says if one comes IN, then one
goes OUT! (hi, hi). Nice first hf rig, or as a backup. Very fine transmit
audio - like most of the tube kenwoods always get great reports on the
sound. And the cw filter is great for picking a signal out of the qrm.

So it's on EBAY thru tonight (11/13). Currently at $250. I have a $275
reserve, but have decided to sell for $250 or above plus shipping.

Mike,
I have sent you 3 emails, but they keep bouncing. Your package went out
last Friday.
73's Lisa

Not trying to be price police or anythig like it. But it seems to me one
can buy a real nice DSP unit for the same price. I own all the same
equipment and do not find anything special about the filter except the
only way to find it is used.

Its checking the "extender" channels for whatever state you selected, when it finds activity on one of them it will sound an alarm and the red "WARNING" lite will flash. To restore deleted frequencies, make sure the BCT-2 is not scanning (open the squelch) then press and hold the (DELETE) key until "CL" appears on the

display.

Daniel, you might want to take a look at

http://www.interlog.com/~saturn/david/links/interfaceslink.htm

for a cheap and easy homebuilt version of what you want.

73, Dick W0EX

For Sale or trade: Complete AEA Fast Scan Amateur fast scan tv station. Includes:

AEA VSB-70 Fast Scan 430mHz transciever

AES RLA-70 remote 50 watt linear amp, can be mounted at antenna for low loss.

AEA MPS-100 multipurpose power supply,for both above units. Feeds DC to remotely mounted amp via DC block in coaxial feedline.

This equipment has seen very little use and is in as new condition.
Comes with complete documention and an added Complete ATV workbook, second edition. Original boxes and manuals.

Add your antenna/feedline, and TV of your choice and you're
on the air with fast scan TV.

Original cost at Amateur Electronic Supply was near $1100.
Will sell
for around half that or entertain interesting trades,
particularly
a Kenwood TS-50 or IC706.

Never installed Ham IV Rotor and control box. Could not put up the new
tower restricted neighbourhood so it has to go. $350 + shipping
Comes in the original box with instructions from Telrex HyGain.
Thank you 73 Chris VE3NGW/W4 Florida

Subject: Need data on Shakespeare Pogo Stick 318-GBT(28.885
machine?)
Cc: rec.radio.cb
Date: Sun, 18 Oct 1998 11:49:18

Hi All.

Can anyone tell me what this is? :(IE: electrical details)
I recently purchased a fiberglas/aluminum vertical whip.
Aprox a 6' fiber base, and a 12' vertical aluminum top section.
As far as I can tell, there are no ground wires needed but there
is a small bolt near the bottom for ?? (maybe a coil???)
It's labled as a "Shakespeare POGO STICK model 318-GBT"
No data on any of the Shakespeare pages. No electrical contact between
the so239 and any surface or connection on the outside of the antenna.

I can't find anything at all on the net about it, and the 2nd hand shop
I got it at
didn't know. I thought maybe it was an older CB vertical that I might
load on
28.885MHz (ahhh..., the link to the VHF reflector-6m liason qrg)

I put it all together but it won't resonate on *any* freq from
1.8-174MHz so I
am thinking a broken connection somewhere or a missing part. I took the
bottom
plug out and the 'interior' coax connection to the so239 is all ok.

Someone mentioned to me they thought it was a 26-30Mhz antenna, but
needed
an external coil to operate it, but that's all they knew. Would be a
shame to
trash this rugged beast, as I am sure it'd make a dandy 28.885Mhz
aerial.

Any leads, tips, ideas?

Many thanks!

MIKE/ve9aa

rec.radio.amateur.swap,rec.radio.swap,rec.radio.shortwave,rec.radio.scanner

For Sale: Yaesu FRG-9600 multi-mode scanning communications receiver.
Receives 60-905 Mhz continuous
100 memory channels in 10 banks of 10
All mode - AMN, AMW, FMN, FMW, USB, SSB, CW
Can be computer controlled
Clock, timer
Triple conversion
Signal strength meter
Search, priority
Attenuator, tone control
Dial or keypad tuning
Base or mobile operation (mounting bracket, DC cable not included)

This receiver is ideal for those wanting to explore all signals between 60-905 Mhz. It will receive amateur radio (all modes), military (all non-digital), public service, business, FM broadcasts, TV broadcasts, etc. There is even an optional board (this radio does not have it) which will allow you to connect a monitor to it and view TV signals! In particular, this receiver should be of interest to amateur radio operators working satellite and DX. Radio is in mint condition and includes the whip antenna, AC adapter and manual.

This radio originally sold for $550 to $600 with dealers selling it used for around $400 currently. Price is $360 firm, I pay your choice of UPS or USPS shipping. Payment by postal money order only, no trades, US sales only.
Please Email if interested. Thanks...

Tom, N0YGT

Greetings,
    This radio is in brand new condition. Very clean. No scratches. Non smoking environment. I bought the radio on 06/02/97 from HRO. I have only used the radio on 2 meter ssb. Never even hooked an antenna up to the 70 cm connector. Due to schedule change and lack of time I am selling it. I have the box, manual, schematics, unused hand mic and the tone board is installed. Very nice write up on it in the March of 1997 QST. I am asking $1200.00 "OR BEST OFFER." If interested please e mail me at stu@harborcom.net or call me at 440-352-7787. Thanks in advance.
73, Stuart KB8VIY

I have the following for sale, prices do not include shipping:

Homebrew RF-Deck uses pair 4-125's, about 500W out needs HV supply:
$150.00
(The parts in this thing alone are worth $150.00)

Unbuilt Heathkit 5-Position Rotary Coax-Switch $50.00

Heathkit DX-60B w/matching HG-10 VFO: $120.00

Heathkit AM-2 Swr Meter: $10.00

Pair Collis Motorized Roller Inductors $75.00 for both!

Two HTX-202 HT's, these are in good to excellent condition, each with external hand mic/spkr and 1800mah battery. $95.00 Each or $175.00 for the pair.

Kenwood TS-930SAT w/250hz CW filter, auto tuner, etc... exec condition:
$850.00

Linear Amp Parts (sold as set, will not split): Pair of 4CX1500B medical
pulls, w/1-Socket/Chimney,
Peter W. Dahl Plate transformer a 115/230 VAC primary and a 1250 VAC @
1.5A CCS secondary
8-1500mfd @ 450V Computer Grade caps, pair of 5KV block diodes,
pair of ducted blower fans (pulls from military equipment) all for $400.

AMD K6-233Mhz Computer with 32MB Ram 6.5G Hard Drive, FDD, 32X CDRom,
1M PCI SVGA Video, KB, Mouse, Acer FX-3d Sound Card, 20W Speakers.
Full Tower Case. $400.00

If interested send e-mail direct.

I have for sale-
Icom IC-706 (Original) with HM-95 Touch Tone Hand mic.
Matching AT-180 auto antenna tuner for the 706.
The 706 has the CR-502 High stability oscillator,
UT-102 Voice synth. and
FL-223 1.9 kHz IF SSB filter installed.
Radio has the MARS/CAP Mods.

$925.00 shipped Con U.S.
Will not separate! Price is firm!

I can send digital pictures if interested.
I am looking for a Swan 250 in good condition.
Also looking for a 5 pin DIN to fit a Microwave Modules Transverter.

Hello,

I am in search of some li-ion cells to rebuild the battery paks in my old Texas Instruments notebook computer. They are Sony US18650B size A. Can anyone recommend a place to get these cells from? I searched for over an hour on the internet with no luck. Many thanks to anyone who can help.

Mark

Hmmm, unless your going for an exact OEM replacement of the identical type of cells, I wouldn't recommend you attempt to swap in dissimilar type lithium ion cells. The electrical characteristics (cell capacity, discharge curves, etc), are very precisely matched to the charging circuit at the time of manufacture. Most packs contain an onboard embedded processor to monitor the charging process. This might allow you to replace the cells with a non matching type, given the window of adjustment the circuitry will permit.... however, and this is a big however, if it doesn't like the type of load it sees, or encounters an unexpected type of characteristic, there's no telling what will happen. Li-Ion cells are very volatile devices. Used properly, they are a superb power source, but abused they can cause serious safety issues. Pick up an issue of "Portable Design", or Battery Engineering for more substantial info and a list of OEM suppliers.

I have the Kenwood TM733A/E Service Manual, with an additional 14 application notes and tech service bulletins for sale. This manual has large schematics, PCBoard layouts, parts lists, and circuit descriptions, and is as new in the original wrapping.
I will ship Priority Mail for $30

I also have an unopened operators manual, with the small schematics, purchased as a spare, for sale.
I will ship Priority Mail for $10.

These manuals are no longer needed as the 733 has been sold.
If interested reply via direct email.

Newsgroups: rec.radio.swap,rec.radio.amateur.equipment,rec.radio.amateur.swap,rec.ham-radio.swap,rec.radio.amateur.boatanchors

Ten-Tec Argonaut 505 QRP SSB/CW transceiver. Nice QSK, 5 watts input, about 6 lbs. Draws less than 100 mA on receive. (This is less than the more common Argonaut 509.) According to Ten-Tec advertising, there were only about 2000 of these produced. This one (serial number 73) is cosmetically about a 7 out of 10 (it has one scratch that is noticable on the top of the front panel), and operationally it is absolutely perfect. In fact it is a tad more sensitive than my Argonaut 509. It has been recently completely aligned. Comes with a copy of the manual. Great for camping, or just QRP operating.

Reason for selling: I have an Argonaut 509 as well and can't really justify keeping both. I decided to keep the 509 for nastalgic reasons because I used to have one in my younger days. If you would like to look at some data, including a scanned QST advertisement, see:
http://asd.state.va.us/tentec/tttrans.htm

$250 plus shipping.

It IS an older vertical CB Antenna, but I don't know any other details.
I can remember the name and model number tho-

Does anyone know where I can get a kit for a mobile HF amp?
Specs:
~300 Watts out
13.8V power
Stripline construction
10-80 meters

I had one and foolishly sold it! I believe that the ham who
built it got the kit from somewhere in Florida, but I'm not
certain of that.

If you can help, please email direct to: lmenzel@millcomm.com

This radio works and looks well. It has no wear marks on its face. I
will not state mint condition because that phrase means an in box
condition which has never been opened. The radio does however look close
to new. It is a 4 year old radio.The price is $1250.00 Mike.....
e-mail to above address. Thanks

Simply the coolest thing for all hams with computers. This amazing 3D screensaver features high-end graphics and is self-installing. It will dazzle you when you see it. Proudly display the call sign you worked so hard to achieve!

Please download the free demo at http://www.alfano.com/w5sn/ Once you see it, you'll definitely want one for yourself, and your custom screensaver will be e-mailed to you.

How about in Win 95 right click on desktop, choose properties, select
screen saver, choose 3D Text, enter you call sign, choose the style and
type of font, colours, textture and movement; click OK. All for free.

That damned Bill Gates with his evil Micro$oft monopoly again... how in
the world can anyone else compete in the call-sign screen-saver market,
if he is allowed to give them away for free?!?? Call Janet Reno! Call
Ralph Nader! Call Ken Starr!...

(hey, if the strategy works for Netscape...)

I know How everyone does not really like ebay auctions but please dont
flame
me for one more, it seemed the easiest way to sell this radio to me.

Please look at.

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=34824409

Thanks
-Ryan

Ryan,

It's not that we all hate eBay auctions, it's just that we'd rather
you put the word "eBay" in the title of your post, so we'll KNOW it
is an auction and not a normal sale.  I wouldn't have read the post
if I'd known it was an auction (although I use eBay myself a lot!).

73,

Dean, K5DH

Ryan, you could avoid the flames by paying attention.
```

You are already aware of the eBay "discussions" in this newsgroup. You should also be aware that a "gentlemen's agreement" has been reached - if you put FA (For Auction) instead of FS (For Sale) or eBay in the subject line, you will avoid all the flames!!

I'm trying to put together a collection of single board computers such as
the
following units from the late 70's:

KIM-1
SYM-1
AIM-65
EBKA Familiarizor
HAL MCEM-8080
MicroDaSys MD-690a
OSI Challenger 400
OSI Model 500
AMT 2650
Sphere One-Card Computer
Microcomputer Associates Jolt

...or whatever you might have similar that is now serving as a mouse house.

You can email me at chipsndips@snet.net

Alan

Hello,

    Are all new Southern California Repeater Location Guides are on our
Web Page. PLease pay a visit at http://www.rotd.com/worldxn

                        The "Original Southern California" Repeater
Location Guide
                        contains the most complete listings of all Open
and Closed
                        Repeaters for 2-Meters, 220 MHz, 440 Mhz, 1.2
GHz, 6 & 10
                        Meters in Southern California.

Visit before the end of next month and take advantage of our specials...

Thanks Again,
```

Greetings everyone, we have some news to share with you!!

We have a new home!! We are now located at http://www.batlabs.com
Please update your bookmarks.

Additionally, after 36 hours of work, we have a bunch of updates to share as well. These include:

-Added the cloning cable pinout, cloning instructions, and 99 channel scan programming info to the HT600/MT1000/P200 page

-Added Pac/RT and Type I to Type II/IIi trunking conversion infor to the Maxtrac page

-Updated the model chart and added channel expansion info and the power connector pinout to the MCX1000 page

-Re-scanned the MTSX model chart

-Added B5 to C7 conversion info the the Spectra page

-Added info on adding conventional personalities to trunking STX's

-Added some out of band info for 5-tone GP300's

-Added the R.I.C.K. schematic

-Added some info on the mic connector for the Maxar 50 and the power connector for the Moxy

-Added a PROM conversion chart for the Syntrx

-Corrected an error on the pager RIB schematic

-Added the pinout and schematic of the PL board for the SP10

-Added the programming cable pinout for the MTR-2000 repeater

-Added some info on adding channels to an SM50

-Added another possible dongle pinout for TK

-Added a link to get MoSlo for slowing your machine down

-Made a correction to the Spectra 900 programming cable

-Updated the WANTED page.

SO, come visit the premier Motorola 2-way information page at our new home on the internet. There is no one else who compares (actually, there is no one else, period :)).

Thanks,

Bat Wing

I have the following for sale, prices do not include shipping. E-mail direct if interested.

Homebrew RF-Deck uses pair 4-125's, about 500W out needs HV supply:

$150.00

Unbuilt Heathkit Coax-Switch $60.00

Heathkit DX-60B w/matching HG-10 VFO: $130.00

MFJ 752C Signal Enhancer: $40.00

Heathkit AM-2 Swr Meter: $15.00

Pair Collis Motorized Roller Inductors $80.00

Kenwood TS-930SAT w/250hz CW filter, auto tuner, etc... exec condition: $850.00

Linear Amp Parts (sold as set, will not split): Pair of 4CX1500B medical pulls, w/1-Socket/Chimney,
Peter W. Dahl Plate transformer a 115/230 VAC primary and a 1250 VAC @ 1.5A CCS secondary
8-1500mfd @ 450V Computer Grade caps, pair of 6KV block diodes,
pair of ducted blower fans (pulls from military equipment) all for $450.

sounds like it's checking the priority channel (every 2 seconds or so)
i think you'd have to use "hold" on the channel you want to override
the priority checking (i think)

i think if you hold the "lockout" (delete?) button down for
2  (or is it 5 seconds) you will hear a "beep beep". this is
the procedure to release all locked out channels.

if this don't work - maybe find a operator's manual . . .

todd k.

Hi

I would like to buy a Heathkit SB 600 speaker.
Thanks
Jill

r.boatanchors,alt.ham-radio.marketplace

This Argonaut is in excellent electrical shape. It draws less current than my 509, and may be more sensitive as well. It has been realigned very recently. Cosmetically it is average. It has one scratch on the top of the front panel that is quite noticable. It is an early serial number. There were only about 4,000 of these made according to a Ten-Tec ad. It is a really fun little rig for camping, and QRP. The reason I'm selling it, is that I already have a 509 and a chap in Ireland wanted it quite badly until I got it packed up and he found out it didn't cover 160 meters. (It covers the 5 old bands between 80 and 10 meters.) I'd like $250 for it.

73,

Rob Frohne, KL7NA/W7

Hi Guys, got some good stuff here that I no longer have the room for...
:)

e-mail direct if interested.

Homebrew RF-Deck uses pair 4-125's, about 500W out needs HV supply:
$150.00
(The parts in this thing alone are worth $150.00)

Unbuilt Heathkit 5-Position Rotary Coax-Switch $50.00

Heathkit DX-60B w/matching HG-10 VFO: $120.00

MFJ 752C Signal Enhancer: $30.00

Heathkit AM-2 Swr Meter: $10.00

Pair Collis Motorized Roller Inductors $75.00

Kenwood TS-930SAT w/250hz CW filter, auto tuner, etc... exec condition:
$850.00

Linear Amp Parts (sold as set, will not split): Pair of 4CX1500B medical
pulls, w/1-Socket/Chimney,
Peter W. Dahl Plate transformer a 115/230 VAC primary and a 1250 VAC @
1.5A CCS secondary
8-1500mfd @ 450V Computer Grade caps, pair of 6KV block diodes,
pair of ducted blower fans (pulls from military equipment) all for $425.

For Sale: Yaesu FRG-9600 multi-mode scanning communications receiver.
Receives 60-905 Mhz continuous
100 memory channels in 10 banks of 10
All mode - AMN, AMW, FMN, FMW, USB, SSB, CW
Can be computer controlled
Clock, timer
Triple conversion
Signal strength meter
Search, priority
Attenuator, tone control
Dial or keypad tuning
Base or mobile operation (mounting bracket, DC cable not included)

This receiver is ideal for those wanting to explore all signals between 60-905 Mhz. It will receive amateur radio (all modes), military (all non-digital), public service, business, FM broadcasts, TV broadcasts, etc. There is even an optional board (this radio does not have it) which will allow you to connect a monitor to it and view TV signals! In particular, this receiver should be of interest to amateur radio operators working satellite and DX. Radio is in mint condition and includes the whip antenna, AC adapter and manual.

This radio originally sold for $550 to $600 with dealers selling it used for around $400 currently. Price is $375 firm, I pay your choice of UPS or USPS shipping. Payment by postal money order only, no trades, US sales only.
Please Email if interested. Thanks...

Yaesu FT 1000D in absolutely mint, out-of-the-box condition. Hardly used due to lack of time and other commitments. Would be surprised if used more than 75-100 hours in total. I am original owner and have manuals and original packaging for the unit. Price also includes new

Yaesu compatible speaker (with filters) and desk microphone.

Hate to sell but unit needs a new home and Owner willing to make better use of it that I have.

Will sell for $2900 U.S. plus shipping. Condition warrants price.

"Piero A. Sassu" <n3fvg@worldlynx.net> wrote:

> Roland Geter requested the package shipped to the Federal Express depot in Phoenix Arizona and he would pick it up there, apparently he does a lot of business there. The package was shipped on Friday June 26, 1998 and arrived at the Federal Express depot in Phoenix on Monday June 29, 1998. Federal Express in Phoenix notified Roland Geter several times to pick the package up which he failed to do so. The package was returned to me about 10 days later but Federal Express would not refund my shipping charges. In their words..."We are a shipping facility, not a storage facility. We provided you with a service which we expect to get paid for!"

Is it true that you gave him the WRONG tracking number for the package? Do you think others should have to pay for YOUR mistakes?

> I am in the process of taking action with the PA State Attorney Generals Office and law enforcement agencies in Arizona. These laptops we supposed to be used for a "Law Enforcement Project". I just wanted to warn everyone so there is no one else losing money on bad dealings with Roland Geter.
> Piero

The laptops ARE to be used for a law enforcement project. Is it true that you LIED to the Maricopa County Sheriff's Office, telling them that Roland said he was a Deputy Sheriff when in fact he would never say that? If you did lie, and you are in fact a police officer, then maybe someone needs to take some action with the Internal Affairs office at YOUR agency. There's nothing worse than a corrupt cop.

- Harold

I have a New MFJ-1024 active shortwave antenna with the following

1) Covers 50kHz - 30MHz
2) 20dB attenuator with gain control
3) 54 in. whip antenna
4) 50ft. cable

MFJ does not sell this with any sort of power supply.  I will throw that in as
well.  This is new guaranteed against DOA. First $75 gets it.  Buyer pays
shipping.  Questions to thecrow@poboxes.com.

He didn't even need the tracking number. Federal Express in Phoenix
Arizona contacted Mr. Geter personally to pick up his package. They had
the package waiting for him and he never picked it up! They (Federal
Express) and I contacted him several times to pick up the package but he
never picked it up!

WRONG! He told me what the laptops were to be used for and that he was a
deputy sheriff for the Maricopa County Sheriff's Office. If he didn't
tell me that, how would I have known that fact, crystal ball???
I also have several e-mails from other amateur radio operators he has
done the exact same thing to, I guess we are all lying and Roland Geter
is the only one telling the truth!

>If you did lie, and you are in fact a police officer, then maybe >someone needs
to take some action with the Internal Affairs office at >YOUR agency. There's
nothing worse than a corrupt cop.

No, I did not lie and I substantiated my facts with the Maricopa County
Sheriff's Office with documentation. I will be more then happy to submit
to a P.S.E. test, (more accurate then a regular polygraph), given to me
by any qualified and certified law enforcement agency/operator
> - Harold

Harold, get your facts straight before you accuse someone of something you have no personal involvement in and are only getting part of the story. The Maricopa County Sheriff's Department was satisfied with the documentation I provided them, something you apparently weren't informed of.

I'm going to withdraw from this discussion temporarily, until our internal investigation of this matter is complete (I'm a member of the same group Roland belongs to, and no, neither one of us are Deputies).

BTW I don't put my email address in newsgroup postings, because the spammers search Usenet for addresses. It's not out of some desire to be sneaky. If you want to email me, you can reach me at ShlinesP@AindirectM.com (remove the caps).

Hi and thanks for rteading me

I need desesperatly a service manual for my Icom ICW2A

Not the instruction manual ...but really the service manual with diagram and board components

Copy will be enought

Thanks for any reply

Harold,

While you are conducting your investigation, why don't you do a search of the Dejanews files, in the search field enter Roland Geter and you will get plenty of hits about your buddy Roland Geter and his business dealings, bad checks, items never paid for, etc., etc. Just today (9/21/98) another posting from a guy who got a bad check from Roland Geter in Arizona and filed a complaint with the Glendale Arizona District Attorney's Office. It took five years for the victim to get his money...isn't that great! You can contact the D.A.'s office for Glendale Arizona, bad check division to verify it.

Do your homework before you start defending someone....
Piero

Hi;

Several months ago, I responded to a request from "Roland S. Geter, Sr", claiming to be a member of the Maricopa County Sheriff's Dept. and sent him a batch of RCA numerical indicator tubes. The package was sent to the Maricopa County address and the payment has not been received. Since it was a mere $35 or so, I was not overly distressed by the non-payment. But, it seems, his perfidy was not limited to me.

bye, Sid Washer KC2COO

My mistake; it was $25, not $35.00 that Geter did not pay. Please see below.

MARICOPA COUNTY SHERIFFS OFFICE
Roland S Geter Sr, Communications Posse

11201 N El Mirage Rd Suite 10
El Mirage AZ 85335-3104

Hi, Roland;

Enclosed are the readout tubes; I hope that they are what you want. I had them left over from a project many moons ago.

Pardon my ignorance, but where is Maricopa County? I'v only been in Arizona once, almost 51 years ago and that was just an afternoon in Tucson.

(snip)

BTW, just make the $25.00 cheque out to me, Sid Washer, and my vacation account will thank you for your support.

Very truly yours,

Sid Washer

Hi Sid,
Prime example of the problem I have been having with the most simple
purchases!!! I have not been at that location for quite some time
since I have been summer traveling. Since you apparently didn't send
the items COD CASH ONLY my secretary thinks its all right that you
think she's clairvoyant ....but she asks would you mind including
a return address for a remittance? (smile)

Do you remember which tubes and quantities you sent? I have a couple
volunteer technicians rebuilding four older Doppler traffic radar
units for donation to a couple surrounding low budget municipalities.
I'll check it they have been opened and used yet. Please be sure that
25 bucks included some shipping, OK?

Where is your vacation account taking you.... South for the Winter or
North for the Summer? We leave Phoenix (permanent home) during
120degree Summers then return for 80-85degree Winters.
Thanks,
Roland S Geter Sr

Gee, how unusual...ANOTHER person falls victim to Roland Geter's games. The address listed above IS NOT the address of the Maricopa County Sheriff's

Office. The actual address of the Sheriff's office is as follows.... Maricopa County Sheriff's Office 102 W. Madison Street Phoenix, AZ. 85003

I'm sure they would be very interested in the above situation about sending the package and not receiving payment. If you want to send a complaint, send it attention Lt. Scott Freeman, Internal Affairs Bureau. I know for a fact he would be interested in your transaction. Good Luck, Piero

Please move this thread off-line so we don't suffer through any more of it in the newsgroups.

It is becoming obvious that Mr. Geter only does business on his own terms - and woe to the person who doesn't understand, or strictly adhere to them. It becomes their "fault" because Mr. Jeter is in denial and now is blaming his "secretary" for not being clairvoyant. Where is his sense of responsibility? I don't expect that people will send me "free" parts - I believe I would attempt to communicate with them (that's what return addresses are for).

(It appears from the comments below that, if you just make up a package and send it "COD Cash Only" to Mr. Geter, his secretary is authorized to pay for it! I know how I am going to clean out my junk box (smile)).

Ron, is it hardcover or softcover ?
How about the other one that you'll be shipping me,
Hard or soft ? (I forgot to ask before)

Richard.

we are moving.  I have a Makita charger and two 7.2 volt 7000series
batteries.  they are good batteries and will inc. shipping for 35.00.
I have too many now, I have 4 more 7000 bats for 10.00 each plus 3.00
for the express mail 13.00 only.

Where is a source for the DC power and automatic tuner connectors? I hate to think that this is a Kenwood-only part. (Surprise, surprise, suprise! Gomer Pile, USMC)

Please reply even if you are a vendor in the business. Parts are needed.
Zipcode is 20855.

Many thanks.

Al, NW2M

I'm looking to add an early D C Hayes modem to my modem collection. Would like to buy a Hayes 80-103A S-100 bus Data Communications Adapter, or D C Hayes Micromodem 100. I would also be interested in any model of acoustic modem you may still have propping open the door of your shack. Let me know what you have and we can talk. You can contact me directly at ChipsNDips@snet.net.

Alan

Would you list the person(s) that say I have purchased their equipment WITHOUT paying them using my COD CASH ONLY system. I realize 3 complain their shipper messed up which I have taken care of them all as soon as they call me and produce some minimal documentation they even sent me anything.

You're very, very right Al........ that's why I issue personal PO numbers that I insist be on the package exterior. Before my PO system I received over 15 such bogus packages!!!

To Piero,
You know, OM, we are really getting fed up with your problem. We personally feel too sorry for you to complain because maybe you can't help your condition. But you really should seek help, seriously, OM, Good Luck. Roland

To Sid,
Please be patient for remittance until I return to Phoenix in couple weeks and get caught up with items not received COD CASH ONLY, OK? . Yes. you will get your promised 501C TAX CREDIT receipt for the difference you sold me the tubes for and the value you placed on them, OK? The readout tubes are being used to repair older Doppler Radar Units I've donated to Law Enforcement Agencies. Sorry you had to catch the garbage here on the newsgroup but you should have contacted me directly. Sincerely, Roland

Well, you're are wrong again, Piero. Just to show you how screwed up

you are I'm attaching a copy of my cellular telephone bill among many
that get mailed to me every month; you will please note my address.
You simply don't understand how our system works here and are really
making a fool of yourself. You are a prime example of attempts to
misuse your badge and position. It's called abuse of power and you
would have been immediately fired here in Arizona if not in your own
precinct. Many of my friends, and one special one you'd be very, very
surprised who I'm talking about, has personally suggested I not ignore
your lies, and inflammatory statements, with my silence but that I
respond to your lies. The truth is with the evidence, I could sue you
and very easily win, but you don't have any assets to attach. All I
could do is screw up your life with some ridiculous judgment I could
never collect on. For what, I don't dislike you but instead hope you
get better. You might consider that maybe you're burned out on your
job, OM.

My friends and acquaintances have suggested I should reimburse you the
amount FEDEX would have charged you only. Majority have said I
shouldn't reimburse you anything because of your mouth. I feel It is
not your fault but instead simply your ignorance of shipping
conventions for which you shouldn't be penalized..
Roland

I have a  ICOM IC-737 HF (160-10m TX) rig. It has the built in antenna
tuner, built in keyer, dual antenna jacks (switchable from the front panel)
and comes with a HEIL mic. This rig has all the extras and works 100%.
All knobs and bunttons are present. No gouges or that funny smokers scent on
the radio.

Asking 725.00 OBO

Thanks

Yaesu FT 1000D in absolutely mint, out-of-the-box condition. Hardly used due to lack of time and other commitments. Would be surprised if used more than 75-100 hours in total. I am original owner and have manuals and original packaging for the unit. Price also includes new Yaesu compatible speaker (with filters) and desk microphone.

Hate to sell but unit needs a new home and Owner willing to make better use of it that I have.

Will sell for best offer over $2400 plus shipping. Condition warrants price.

Lou

I have an Yaesu FT-990 AC for sale. The radio is in very good to excellent condition with the latest version 1.3 ROM firmware, standard 2.4Khz and 500hz filters, AC power supply, tuner, etc., and includes the FIF-232C computer interface, and service manual. Price $1175.00 + shipping or pick up near Syracuse, NY.

I can be reached at 315-677-5238 after 6:00 P.M. EDT or e-mail during the day at   jskapiak@inficon.com

The first thing that raises a flag is the he claims to be a member of a
Posse (volunteer group) and not an actual deputy.

The address he has given sounds like one of those Mailboxes, Etc. retail
store post office boxes that you can rent by the month.  I don't ship
until I see the $$$.

Hey Piero and Sid,

Don't feel singled out, this jerk has ripped a buddy and I off in similar ways. I sent him a Federal Express COD package that this jerk

refused to pay for and I got stuck for the shipping charges and my buddy shipped him an old Johnson mobile radio he never paid for. We both contacted this jerk time and time again and he never made good on the deals. The best advice is for everyone to avoid ANY business dealings with Roland Geter...he is a thief!

Today, I posted some auctions I have up on eBay. I then get an e-mail with the message quoted above from Jeffrey Herman. Who is the guy? Last time I checked, forum moderation went out the door when FidoNet died.

I don't think that this guy was trying to play 'Newsgroup Police." It seems like he was making a polite personal request, and pointing out the convention that is the basis of his request.

There are still lot's of moderated groups. The more useful groups are often moderated.

A charter isn't precluded because a group isn't moderated. Many Non-alt groups are still formed by vote based on a charter.

FS, FA, FT, WT* just help buyers scan the group faster and are to the seller's advantage. If the group takes too much time to scan fewer people read it.

Useful newsgroups that run well rely on a fairly high level of courtesy and convention (unwritten rules if you prefer.) The swap groups are getting busier by the day. If people don't make best use of the subject lines, the groups will get to take so long to review that they will be useless to all but the most technically sophisticated users who can filter group content by subject and message content. This mode of operation is in the interest of very few users of any of the groups.

Hi;

Mr. Geter claimed to issue "personal purchase order numbers" and that packages should be sent "COD-cash only". His memory errs because he did not specify either of those conditions at the time that I sent him the RCA numerical indicator tubes.

As far as I'm concerned, I've been ripped off to the tune of a big $25.00 and that's the end of it. Son cosas de la vida.

You will find this type of "individual" obtains pleasure from fleecing those more responsible among us. He is, after all, almost URBAN LEGEND status on ALL of the swap lists with his unscrupulous ways. I got bit two years ago when he responded to an ad for a Johnson Viking Thunderbolt amplifier. It was always "the check got lost, send it anyway and I will get another check right out".... You know how much that Thunderbolt weighed??? Took three men and a boy to lift it!! Like Monica said, "dealing with him leaves a bad taste in your mouth...."...

Too bad Roland, it appears you are the only one who is getting fed up
with this problem YOU created...you should have gone to the Federal
Express Depot when they called you and told you about the package.

> We

"We"? You have a mouse in your pocket?

> personally feel too sorry for you to complain because maybe you can't
> help your condition.

What condition? My aversion to people who cause me financial loss? If
that is a condition then I guess I have one.

> But you really should seek help, seriously, OM,

Sorry Roland, but I'm not the one who is writing bad checks, receiving
merchandise and not paying for it, not paying for C.O.D. shipments I
have personally authorized to be shipped, etc., etc. like you have been
for many years as it appears by all the replies and posts.

> Good Luck. Roland

It is nice you can pay your cellular phone bill but you can't pay for
your C.O.D. shipments, other packages you receive, etc., etc.

> you will please note my address.
> You simply don't understand how our system works here and are really
> making a fool of yourself.

Ohhh, I see, those of us who don't "understand" your system have to suffer financial loss.

> You are a prime example of attempts to
> misuse your badge and position.

If you consider me "misusing my badge and position" to bring light to your games then I guess I do. Hopefully, by posting these warnings, no one else will fall prey to your games. I also guess I "misuse" my badge every day I go to work when I arrest thieves, bad check writers, stop creeps from victimizing other people, etc., etc. I must be doing something right, I'm the highest decorated officer in my department and in the area so I guess no one in this area agrees with you

> It's called abuse of power

Wrong again, abuse of power is when, as a police officer, I commit a crime. Sorry, I haven't committed any crimes here. I haven't written bad checks, caused financial loss to others by having others ship C.O.D. packages and not paying for them, or worse yet, receiving items and just not paying for them as you have done.

> would have been immediately fired here in Arizona if not in your own
> precinct. Many of my friends, and one special one you'd be very, very
> surprised who I'm talking about, has personally suggested I not ignore
> your lies, and inflammatory statements, with my silence but that I
> respond to your lies.

I can back up my statements with copies of your e-mail messages (which I have kept) and every other aspect of our transaction. Also, if you look around you will see many others who have replied about similar problems...I guess we are all mistaken? I guess we are all lying and you are the only one telling the truth.

> The truth is with the evidence, I could sue you
> and very easily win, but you don't have any assets to attach.

And I have plenty of evidence. Please sue me, I'd be glad to see if the State of Arizona would fly two law enforcement officers here to pick me up, then transport me (fly of course) to Arizona for the civil trial. At the civil trial I would bring all the copies of our e-mails, my receipts, subpoena the other victims who have replied, and of course your court abstract from the Glendale District Attorney's Office. Oh, I forgot, the Governor of Pennsylvania won't sign an extradition order for me to be taken to Arizona for a civil trial, and I don't think the State of Arizona is willing to spend thousands of dollars to process a civil service when they look at your track record. As far as my personal assets, I have many assets you could try to attach. I own a 3000 sq. ft. 4 bedroom, 2 1/2 bath home with an inground swimming pool. I own two modern cars and two antique cars, and I own a lot of other personal property. Speaking of assets, still living in an RV?

```
>  All I
> could do is screw up your life with some ridiculous judgment I could
> never collect on.

You are correct there, Pennsylvania won't honor your ridiculous claims,
and from what the Arizona Attorney General's office told me on the
phone, they won't either.

> For what, I don't dislike you but instead hope you
> get better.

I would get better if you paid me the $132.58 you cost me from shipping
that package to you and you not picking it up.

>  You might consider that maybe you're burned out on your
> job, OM.

Sorry to disappoint you, but the professionals disagree with you.

>
> My friends and acquaintances have suggested I should reimburse you the
> amount FEDEX would have charged you only.

That would be better then the nothing I have received from you.

>  Majority have said I
> shouldn't reimburse you anything because of your mouth.

I guess your "majority" has not suffered financial loss because of your
actions. I told you not to play games, did you think I would just take
this lying down like so many other of your victims?

>  I feel It is
> not your fault but instead simply your ignorance of shipping
> conventions for which you shouldn't be penalized..

No, it is my fault for not insisting on payment up front with a postal
money order and not shipping until I received the money up front. I
trusted you when you said you would reimburse me after you failed to
pick up the package when notified by the supervisor , I'll never make
those two mistakes again! It cost me $132.58 to learn that lesson.

Don't feel bad Sid, Roland Geter specifies "his" conditions as he goes along. Even if you had met every one of his "conditions", you would still be out your $25.00. That was his excuse for not picking up the C.O.D. package I sent him as he specified, even when contacted by the supervisor at the Federal Express Depot in Phoenix, Arizona where he "does a lot of business". Yes, I also have suffered a loss, mine was a little more expensive to the tune of $132.58. I hope others won't fall victim to Roland Geter's shenanigans and they heed my warnings. You can also forget Roland Geter's false promises of making good also, I can send you his e-mails where he promises to reimburse me for the lost shipping charges AND wants me to reship the computer. Fortunately I demanded payment up front before I shipped this notebook computer again. Of course the postal money order never arrived.

An expensive lesson learned,
Piero

You are right, unfortunately he has Harold Lines buffaloed with his lies
and deceptions. I will continue to warn others about Roland Geter until
I am reimbursed for the monies I lost as a direct result of his scam. It
is ashame Roland Geter doesn't come into my jurisdiction, this problem
could be legally remedied immediately. I also hope others file
complaints with the Maricopa County Sheriff's Office so legal action
could be taken in Arizona...although some legal action already has been
taken.

I did notify the Maricopa County Sheriff's Office who took
administrative action against Roland Geter. I also notified the Arizona
and Pennsylvania Attorney General's Office. Unfortunately, because of
the small amount ($132.58), they would rather reimburse me out of their
own funds instead of prosicuting Roland Geter for Theft by Deception.
Prosecution just isn't finacially fesable for bothe states. However, if
everone who has suffered a loss by Roland Geter would file a complaint,
maybe some further action would be taken.

Have specially modified Kenwood TS-742 that works in combination with a CSI Patch IV. This provides autopatch, repeater, remote controllable configuration. Have used this set-up for field day repeater, local repeater with a 150 watt FM UHF amplifier which is also for sale.

This is an excellent combo package for anyone looking for autopatch,
economic repeater for private club or individual use.

Asking $1300 for everything and a few extras - customized cabling with N
connectors, discriminator output switch, etc.

Will consider any reasonable offer or trade. Available to ship overnight!

I recently purchased a BCT-2, When monitoring a channel it always cuts out
(checking another channel I presume) can I change this??

Also the delete button on the front I assume is to remove unwanted channels!
By deleting these is there a way to restore them at a later date, i.e...
turn off then on??????

Greetings,
    I won this radio at the Madison, Ohio Hamfest 03/98.  This radio has
less then four hours of use on it.  Due to my schedule and lack of time
most of the time it has sat in the box.  The radio is in brand new
condition.  I am asking $950.00 or best offer.  I will pay the
shipping.  If interested please e mail me at stu@harborcom.net or call
at 440-352-7787.  Thanks in advance.  73, Stuart  KB8VIY

I was going to ask if the Bables (sic) came with cream cheese. For
those who are about to come down hard on us for comments well I am Just
kidding, people lighten up. What radios does it program with what
supplied cables ?

You know, from reading these post, from Mr. Geter, I
got the impression from his early post that he actually

worked for the Sheriff's Office. Maybe it was just me.
But I wonder how fruitful it would be to file a formal
complaint with the Sheriff's Office, with a copy of the
early post that led me and probably others, to draw
the conclusion that Mr. Geter was 'officially' associated
with them. They may be able to provide some added
'influence'. Especially if you indicate satisfaction would
be achieved by being compensated, not by continuing
the complaint process.

If nothing else, you can stink it until the Sheriff's Office
wouldn't deal with Mr Geter if he gave them stuff for free.

Sometimes it's not right or wrong, correct or incorrect,
good or bad. It's strictly quieting the most annoying noise.

  I'll bet ya Harold Lines has never sent that guy ONE THING so he has
nothing to base his support on,some people just bury their head I guess.
BTW,have you even recieved a reply from the Maricopa County Sheriff's
Office?

swap

Does anyone have a PM101 personality module that they would want to sell or trade at a reasonable price? This module was used with the Tektronix model 7D02 logic analyzer...

Also, does anyone know where to find the Tektronix document that describes how to develop custom ROMs for these modules. Supposedly, there was at one time, a document referred to as a 'ROM development aid' that described how to write the P-code for these modules.

Any help would be appreciated.... Thanks..

Jim Flanagan..

Real smart Dana.

It's so touchy that you have to post 10 bytes to bitch with
how many bytes in the reply? It you don't like it, don't read
it. I sure everyone cares that you posted. For that matter,
I just every one is just tickled that I'm replying, but then,
I don't care, just like not that I've pointed out your stupidity,
I don't care about you.

It's my jop to point out stupid things.

I Would like to trade my Yaesu VX-1R (rev A102) for a Kenwood TH-G71A.

The VX-1R has extended TX & RX and is in good condition includes original box, accessories and manual.

Possibly consider cash sale... email me.

Yaesu FT 1000D in absolutely mint, out-of-the-box condition. Hardly used due to lack of time and other commitments. Would be surprised if used more than 75-100 hours in total. I am original owner and have manuals and original packaging for the unit. Price also includes new Yaesu compatible speaker (with filters) and desk microphone.

Hate to sell but unit needs a new home and Owner willing to make better use of it that I have.

Will sell for best offer over $2400 plus shipping. Condition warrants
price.

It's OK. I have worked a few of them. Thought it sounds kinda of mushy
above 35 wpm when in QSK mode. Like it's chopping some of the dashes or
something. Don't know how well it RX's. Can only tell you what it sounds
like over the air since I don't have one.

I can say, the faster you send, the better your signal must sound due to
static and QRM. It's takes too much effort to guess what your trying to
say... Best CW still comes from older rigs with a manual PTCW switch.

Well I've got an Icom IC-706MKII in my '86 Chevy S-10 pickup.
It's mounted in the space below the AMFM/cassette player.
Don't run mobile CW with it as I only use it for SSB & sometimes FM.

It also makes a great SWL reciever

Antenna is a Bugcatcher. Don't use any kind of antenna tuner.

I'm interested in acquiring any version of an RCA Cosmac Elf computer system
from around 1978. You can contact me at chipsndips@snet.net if you have one
you want to sell or if you have something similar.

Alan

Yours is not the first complaint about Geter. If you get any cooperation
out of IAD, have them check dejanews for other instances.

For those of you who were also ripped off by Roland S. Geter, Sr.
He has been fired from the Maricopa County Sheriff's Office, (as a result of my formal complaint), and if anyone else would like to pursue action against Roland S. Geter, Sr.
you may contact the sheriff's office at....
Maricopa County Sheriff's Office
102 W. Madison St.
Phoenix, AZ. 85003

Put your complaint in writing, be "professional", and be very precise with your details.
Include any relavant e-mail exchanges, receipts, etc. They are especially interested in any other instances Roland Geter identified himself as a deputy to "close" the deal. I also carbon copied the Arizona Attorney Generals Office but I have not heard from them yet.
Good Luck,
Piero

We have for sale one Kenwood TS440S/AT. The radio has hardly been used, and comes in the original box with user's manual and hand mic.

The radio has had the extended TX modification done to it.

We are asking $600US or best offer, buyer pays shipping and prepays with a US International money order.

Pictures and specs for the unit can be seen at
http://www.bcfmca.bc.ca/ts440.html

We can be contacted at bcfmca@'nospam'bcfmca.bc.ca (please remove the 'nospam').

Thanks.

It has come to our attention that someone/thing is attempting to impersonate Batwing Laboratories.

This person, going by the pen name of "Batman" residies at batlabs@hotmail.com .

We wish to make it clear to everyone that this person is in NO WAY affiliated with our organization, and any posts by said person should not be confused with us.

For the record, our email address is batlabs@psychonet.net.nospam (remove the .nospam part please).

Our web page can be viewed at http://www.psychonet.net/~batlabs

Our mission is to be a gathering place for the free exchange of information pertaining to the use, understanding, and enhancement of Motorola 2-way radio equipment.

Please feel free to drop by our page for a visit and be sure to check out our Wanted page. As information and requests come in, the web page will be periodically updated.

Thank you.

Bat

I have an Icom IC-751 that does not have a scratch on it. I have original box/manual/mike. This rig was used mostly in the late 1980's then very little since then. I have logged all my contacts and this rig has been used to work just over 1000 contacts, mostly short duration DX. As a result, it has not had a great deal of use.

I power up the rig every few months to make sure everything is in proper working order. Because I did not want the added heat load on the rig, it does not have an internal power supply.

Also included: RC-10 remote control unit. (keyboard for direct frequency

entry).

Price: $575.00 FIRM

If you are looking for an excellent, non-DSP rig with a lot of useful
features that won't overwhelm you, this is a good rig for you.

Terry Brown, N7TB

2 meter transceiver, Alinco DR1200, manual, no microphone.
Was used for a packet BBS, so it was purchased without
the microphone. However, a new mike would only cost about
$30.

Asking Price: $145

Um, wrong. I ordered the mic from HRO in Denver just 2 months ago, and it
was $50.00. AES, and several others were all the same price.

You are correct in regard to HRO which has an EMS-11 for around $50.
However, I've seen several compatible new mikes at swap meets for

around $30.

I have for sale-
Icom IC-706 (Original) with HM-95 Touch Tone Hand mic.
Matching AT-180 auto antenna tuner for the 706.
The 706 has the CR-502 High stability oscillator,
UT-102 Voice synth. and
FL-223 1.9 kHz IF SSB filter installed.
Radio has the MARS/CAP Mods.

$925.00 shipped Con U.S.

Maybe Swan 250 in good shape plus $

I can send digital pictures if interested.

Also looking for a 5 pin DIN to fit a Microwave Modules Transverter.

Could someone please tell me where to take the audio in and out from an
FT-990 radio.

There are plugs for packet and what not (friends radio) but where would be
good to plug in on the back to get the audio to send and receive SSTV??
Any info would be appreciated. Oh and I looked in the owners manual and it
doesn't say anything about SSTV. DARN.
Thanks all.
Andrew

Just like for RTTY or whatever, use the mic and phone plugs. No problem!

I use the phone patch in and out on my TS 940.  The
FT 990 probablyhas phone patch connections, use
them.
For address change .com to .net

Oh really ? I guess Icom errored when they printed the box and manuals
then, huh ? Because by god, they BOTH say ALL MODE !
Next time why don't you try posting your replies with a VALID email
address instead of some phony one. What a wimp !

Another consideration is, they will never tell you what paragraphs or tests under the generic MIL they're quoting, much less how testing was performed ("qualified" labs, etc.) MIL testing is laborious and expensive. I doubt seriously that ANY ham manufaturer has actually gone through all the hoops to qualify thier equipment. I asked Yaesu, once, and they blew it off. They had no idea what I was talking about!! Take it with a grain of MIL-K-876B/C salt!

What question ? Nobody asked a question. But yes, the rig will "work"
FM (not DO FM)  with the optional module JUST like stated in the items
description on eBay if that's what your refering to.
You ex cb'ers need to learn the "ham" language and get out of the CB
age. I see your as big a wimp as the other guy with the phony email
address.

Tim, take the chip off your shoulder and ignore these stupid comments.
We are smart enough to know that these "snipers" are just looking to get
your goat.

We don't need "road rage" in the newsgroups.

Actually, "Real" hams do go to hamfests to find cheap parts to use for BUILDING projects. Hams that sit home and work contests are known as "appliance operators".......

I got a better followup:

"REAL hams don't use FM!"

Ah, I'm just joking by the way. Anyway, why all the fuss over a 6 meter rig?

I need some help for a friend. He just picked up a FT-73r, and wanted to mod
it so that he could listen to his businesses freq but not x-mit on it. However, the
radio dosen't work much outside of it's designed limits. RX drops off pretty fast. He
says that there's a pot inside that'll widen the radio's RX and TX up. But without
the service manual, figuring out which it is isn't easy. Can anyone help him out?

He dosen't have internet access, nor even a home computer, so I'll relay
messages for him.

P.S., if you think he's doing this to mess around with other freqs, he's most
definately not. He's 67, and he's a Vet who strongly believes in not breaking the
law. I've known him long anough to know that he's straignt. Besides, as a precaution,
he's going to set the Tx freq to something so far out of band that TX power will be 0
watts. With this ht, that's easy.

item #27642396. late WE [s/n 46xxx] with RE pto subchassis--a crossover model i reckon. this radio has .8 and 2.4 filters, not a scratch or chip in the front panel, one paint chip on the rack adapter, a little shelf dust on the chassis is all, the knobs paint isn't chipped, the knob inserts do need polishing, and the power cord's a bit dirty but still has the original little green tag. probably a CCA 9 or better, but i'm not sure i fully understand the cca rating system so i've tried to give a comnplete descriptiuon.

I have a like new mt1000 VHF 99CH
portable radio. This radio includes:

Radio
Antenna
1 battery slightly used
1 new battery
1 external antenna adaptor
1 battery charger

I would like to get $385 out of the radio, or programmed to your freqs,
for $425. Shipping free to the lower 48 states.

I have a Bug that I would like to sell or trade, but have no idea of price. It's chrome and has a wide base on it. Serial number is 213677. I has a triangular shaped fulcrum and the speed setting bar has numbers on it wiht the weight there too. All parts are on it and it's in really good shape. On a scale of 10 (new) it's at least an 8.

The Comet SMA-503 is a much better performer than the stock antenna. It is available at Ham Radio Outlets nationally.

>...a replacement for the antenna which comes with the FT50R...

That ugly antenna that comes with the FT-50R isn't as horrible, say, as the stock VX-1R antenna...but the Comet SMA-503 is a better performer. You can use it, of course, on both your VX-1R and your FT-50.

- Clint Bradford

Compair the Comet and Diamond, I believe the comet will not receive the AM Broadcast band as the Diamond will reveive it great.

Hi,

I'd like to buy a Kenwwod TL-120 HF amplifier (10 watts in/100 watts out). This is the unit that matched the TS-120V, TS-130V, and TS-660.

If you have one, please write to me with price and condition.

Thanks & 73,

Circumstances force me to offer for sale my pristine 51S1F, very late
WE s/n 46XX with RE PTO subchassis, apparently a crossover model.
Works good. Not a scratch or chip in the front panel. The only
defects are a chip in the paint on the rack adapter and a dirty line
cord, which still has the little green tag attached.

$1400 o/b/o, buyer pays shipping.

RAK-8

Navy shipboard receiver built by Magnavox during WWII (contract date = 14 Jan 1943). Covers 15-600 Khz. Designed for CW, but will receive other modes with reduced performance due to 1200Hz LP filter. This is a regenerative receiver. 7 tubes. Excellent condition, includes power supply, power supply cable, and original manual. Receiver weighs 74 lbs, PS weights 41 lbs. $100, shipping from Arizona not included.

I am considering buying an Icom IC-706 or 706mkII. Since my favorite mode is CW I would like to hear comments from anyone on how well this rig performs on cw. How is Icom's optional CW filters in this rig? Good S/N ratio ? I need something more portable to drag back and forth from my cabin and since I am currently lugging seperate rigs for HF, 6 and 2 meters the 706 would better fit my bill. Any comments at all would be welcome please.

Tim-

I cannot give you a fair reveiew on CW, as I do very little CW work. The IC-706 is an excellent rig though for all-around work.   The MKII model has anumber of enhancements over the original model, and the current incentives from Icom make it almost a no-brainer as to which model to choose.

Portable, the 706 is very compact, rugged and a good performer on SSB and FM.   The menu system does take some getting used to, but it grows on you. I have used mine now for several years, and have just bough tthe matching AT-180 for it. The separation kit is almost a must for mobile use if you are going to actually mount it. I use a Timewave DSP-9+ on SSB and don't miss the filters at all.

I would choose the IC-706 over and over again, but I have to admit I would have waited for the MkII if I had known it was coming.

Go buy one.   You'll be hard pressed to find so many features in a small box like this.

It's ok. I have used one at a field day that had a cw filter. It was pretty tight. But I wasn't overly impressed with the overall audio quality of the rig. Seems to maybe have a tad to much rf gain on the low bands. But I imagine this is due to catering to the mobile ops. It wasn't distorted or anything just kinda flat sounding. But heck, what can you expect from such a small radio, and also I'm spoiled on my 830 and other rigs. Good sensitivity on the high bands. Overall I'd say it's ok. Reliable with a decent track record. And small. I use a old IC 730 in my car, and has been a very reliable radio over the years. MK

If anyone has an EJ-24U installed in their DR-610T or 610TQ,and they do
not need decode capability,
I would like to trade the encoder module in my 610T + cash , for it.
I happen to need the decode capability, but many only need the encoder
for repeater access.
If anyone is interested, contact me via direct email.
TIA, Don, W9SL

I'm selling the entire shack. This is a buy all or nothing deal, I will not sell individual pieces, I have the following:

Kenwood TS-930SAT w/250HZ Cw Filter
Johnson Mic

5-Elem/2M Yagi w/Rotor
MFJ-986 3KW Roller Inductor Tuner
Carolina Windom 160M Antenna
Mosley TA-33 3-Element Beam/10/15/20
CDE Rotor/Controller
HyGain 10/15/20 Meter Quad
Peter W. Dahl HV Xformer (new)
Astron 20A Power Supply
Homebrew RF-Deck uses pair 4-125's
Heathkig IG-102 RF Signal Generator
110V Variac
Thoradson Plate Xformer 1.2KV @ 1A
Heathkit DX-60B
Heathkig HG-10 VFO
B&K DC-30Mhz Dual Trace Scope
MFJ 752C Sig Enhancer
Heathkit AM-2 Swr Meter
Kenwood TM-733A dual Band mobile
Heath IP-17 HV Regulated Supply
Hand-Key -"J-38"
Hand-Key - "J-44"
Rohn HDBX 48ft Tilt-over tower complete
Pair Collis Motorized Roller Inductors
2- HTX 202 2M HT's w/hand mic & charger.

This is over $4000 worth of shack. $2500 get's it all.. you must pick up or arrange for shipping (the tower pretty much has to go by motor freight). I'm in NW Vermont. send e-mail if interested.

Would like to trade metal detector for transcevier around $550 in value -

some tube units finals OK. Please don't try and offer a $300 piece of equipment unless you've also got $250 cash your willing to part with.
Specifics for this unit: is about 2.5 maybe 3 years old. D/C number inside battery door indicates manufactured around August of 95.
Software version is 1.1. Unit is in excellent working condition, appearance 8.5 out of 10. Arm pad, strap and grip are not worn or torn.

Here's a list of everything I'll ship:
> XLT, Charger, Batteries, Manuals in Hard Case
> Has coil cover and weather covers for LCD and electronics unit.
> Sand Scoop
> Small Garden type shovel
> Stainless Steel Hole Hog (precision hole digger)
> Homemade ground probe (modified screwdriver)
> Advanced Water Working Techniques BookLet's
> Talk Treasure Hunting Book
> Military type canvas pouch (clips on belt)>

The least I will take for the unit is $550 plus $20 UPS shipping if you send a money order in advance. If you want COD then the shipping increases $10 to cover the CASH ONLY collection charge.
To see specs and picture:
http://www.treasurenet.com/whites/products/spectrum.html

Feel free to call me if your still interested.

Knight VFO, checked out and works fine. It runs on 110 VAC and has a plug that you put into your XTAL socket on your old novice rig. Not bad looking for its vintage. $50 plus shipping.

I have a Kenwood TS-140 all manuals(service & operating). It has the FM board, computer interface port installed and 11 meter mod. Rig works and look great. Picture's can be available on request.

I also have a AEA AT-300 Tuner, two pl-259 inputs, a balanced feed and a dummy load position.

Will take $500.00 for the pair or offers on seperating them.

Motivated to sell these as wife says I need to for my tower project. GRIN...

Hi
I'v got an Icom ic706mk1. Just got it recently, only a few months ago, but I have hardly used it. Not worth my having it really. HF mobile operation didn't turn out as successful as I hoped and I'v got another rig in the house. So I was thinking of selling it, but, what would be better is a trade.
Anyone like to swap/exchange anything radio related? Maybe a good FT747? A TS50 plus a few quid would do, or even CB gear if you've got some decent stuff. Or what have you got?
Get in touch.
cheers
Jack MM0AXL
PS. I am situated in the south west of Scotland, UK.

Talk about nit-picking!!!! This of course is a correct statement, but they are mostly reffered to as MK1's ...A lot easier than saying "original", or requiring someone to ask "is it a MKII"..

Seems like we have a lot of people on this and other groups that have nothing to do but criticize others' spelling, grammar. etc..

And you're probably like most US amateurs, if it doesn't fall in their lap ready made, to the letter, then they don't want to know and don't have the intelligence to figure it out for themselves.

Stick to it Jack. Some of us do have the intelligence to work things out for ourself without it being in black and white, and to the letter.

Are you really interested in this rig or are you just looking for something to bitch about? BTW it is not a "706" it is an "IC-706". Please follow your own advise.

Ernie, I have a nice Ten Tec Corsair II HF tranceiver for sale. It works 100% and comes with the manual. It was just recently reworked by Ten Tec and sounds great. On a 1 to 10 scale this one is 9.8 Would you be interested in a trade. The value of the radio is around $750 so I would expect $200 cash difference. Same rules as you listed below for the transaction.

William Lee

Ernie Dean wrote in message ...

William:

I bought my Ten Tec Corsair II sevarla months ago for just over $400. and then saw them posted for less than that with filters and the matching power supply (mine had neither), has something happened that has escalated the used value by over $300.?

I would have loved to have gotten $750. in trade value out of mine! I heard that collectors inflation is puffing prices, but I didn't know the Corsair II had become a collectable. :-(

Are there any QC people out there who can explain what this mil-spec business is all about? All the major manufacturers are making terrfic claims to imply a high standard of durability, but they're not being very "mil-specific."

Please post comments.

As the sender of the original IC706Mk1 message, I cant believe that this
has got so out of hand. Dont you think this is such a minor matter that its
embarrassing that some sad lonely people have nothing better to do than
pick fault.
So heres a message to Steve and Gary W8PU.
As far as I'm concerned if a radio manufacturer makes a "mark2" than the
previous model should be described as a " mark1" to save any confusion.
Now would both of you please not answer any message of mine ever again, and
preferably never post one to this newsgroup. We have better things to do
with out time than search through this crap looking for sensible material.
Jack.

Right on the head Jack. It comes from people with nothing better to do
but to sit an trawl NG's looking for things to nit pick. Good luck
selling your gear Jack.

For all your info, my 706 has been sold. To a bloke who, peculiar though it may seem, didn't give two hoots what it was called. I'm sure that wondering if it should be a Mk1 or not wont spoil his enjoymeent of the set.

I sent a few messages to people to tell them it was sold, but they bounced back, so I hope you all read this.

There are hundreds of thousands of specification out there written to cover everything that can be imagined from communication equipment to choclate chip cookies and even condoms. These mil specs detail out every requirement that the product must meet. Each of these reqirement must be tested and verified on either a sample basis or on every unit depending on the contract requirements. The mil spec system was a response to questionable equipment delivered during the late 50s and 60s. This system is being replaced by Acquisistion Reform. The new set up puts all the control and responsibility back with the manufacture.

The same as it was before the Mil Specs came about. Will this lead to the same problems all over again? MOST LIKELY.

The mil spec hardware may or may not be any better than commercial equipment. I have worked on equipment that the manufacture built to the mil spec requirements and the same equipment built to "Best Commercial Practices", sometimes the mil spec is better sometimes the commercial is better. I hoe this sheds some shadows on the idea of MIL SPECs

Hi,

Mil-spec is short for military specifications. These are simply a set
of minimum standards that the military has for some types of equipment.
This does not mean the equipment is superior to non-spec equipment. Many
manufactures exceed the mil-spec by a wide margin. It does guaranty a
minimum sort of standard. The mil-specs were devised to insure equipment
would be reliable, and rugged enough for field use. As a member of the
military who has used and repaired a fair amount of mil-spec equipment
I can only say, treat it like any other purchase. Call around and see
what the people who use it say.

Hello guys,

I'm studying for my ham ticket right now, but I found some good deals on radio books at http://www.chelmsford.com/sat/resources.html if anyone's interested.

Some are discounted pretty good, others are titles I didn't see before.

73 Doug

Looking for an Astatic D-104 desk mic. Preamplified or
NON-preamplified is ok. Physical condition not all that important as
long as it works well and is reasonably priced. Please email me with
what you have and your asking price.

For sale, HA-201 2M amplifier. Great for getting that HT signal out.

Output 8 watts with 1 watt in; 1.5 in, 10 out. Appearance is very good.

It has been modified by substituting a carrier operated relay(COR) for the original diode switching TR circuit which noticeably attenuated the received signal. Also, SO-239's have been paralleled with the original RCA jacks for both input and output. Dimensions: 5.5"x3.5"x3.0".

With original manual. $35 plus shipping from CT.

Newsgroups: rec.ham-radio.swap,rec.radio.amateur.swap,rec.radio.cb,rec.radio.swap

Its time for a shack clearout, I'm getting rid of everything I dont use
and
looking for something more useful.
The following equipment is not necessarily for sale, I'm not strapped for
cash at the moment (nice to be able to say that for a change) so I would
prefer to swap / part ex these items for something else. Like a TS50, a
FT747, a 2m/70cms dual band mobile, decent CB gear, or whatever you've got
spare. Try me.

Yaesu FT690R2, 6m multimode. Boxed, pretty good nick apart from a mark on
the top case,
BUT it comes with a brand new top case straight from Japan (still wrapped
in Japanese newspaper). Complete with clip on telescopic antenna, battery
charger and a set of brand new nicads (never been charged)

Also, Nevada 15 watt linear amp for 6m.

Also, Yaesu FT290R2, 2m multimode , with rubber duck antenna and full of
nicads. Not as
tidy as the 690, a few scratches here and there on the top and bottom
cases
and the display backlight doesn't work, but everything else works
perfectly.

Also, Microwave modules ML144/30-LS 30 watt linear amp for 2m.

Now I reckon this stuffs got to be worth 600 notes. But like I say, I'd
prefer to swap it. Drop me an email if you'd like to chat about it.

```

Hi All,

I have just spent over an hour making at least a half dozen calls across the country. You'd think that in that amount of time i'd be able to find a company willing to sell me the VPL-1D programming kit for the FTH series portables and the VXR series repeaters. Most of the companies that I spoke with said that they can sell this kit to adresses in their own state or export only. I have been unable to speak with the Yaesu rep. that covers Utah(based in Denver, go figure?).

I have 12 of the FTH-2009 radios and I need the programming cable and software. Anybody have pinouots for the cable? Can anybody help me out?

After today, I am of the belief that Yaesu software is harder to obtain than Motorola RSS.

Thanks in advance!!

Dan Dialogue

Bullshit. It is NOT all mode. It does not include the hard to find
module which is required to work FM.

For Sale:

PRC-68 handheld 30-76 MHz FM 10 channel synthesized transceiver
with camoflauge canvas carrying pouch and short rubber duck antenna.
Has benn repainted original olive drab and has no scratches or dents.
Works fine and I will include reprint of programming instructions from TM.
Needs 15.4 v DC. I have used 10 alkaline AA batteries to power radio. I
will inlcude the battery adapter I made for a slight additional cost.

$250.00

For Sale: ICOM R71A shortwave receiver. Excellent condition, some scratches on top. Just gone through by ICOM dealer. Though it is no longer in production this is still the benchmark that they compare others to. For those unfamiliar with this radio it resembles an Amateur Radio HF transceiver - so it is a �base' rather than a portable (though it will run mobile). It has coverage from 100 Khz shrough 30 Mhz, has AM/FM/USB/LSB/CW/RTTY, noise blanker, AGC, memory scan,multiple filters,attenuator, dual VFO memory, etc. Dealers sell this radio used for $600 to $700.

Asking $475 firm, payment by postal money order. I pay your choice of USPS or UPS shipping. Sorry, so sales outside US contiguous 48. No trades. If interested please respond by Email.

Tom, N0YGT

Hi All,

I'm cross posting this because I'm looking for a company, A few years ago,
I saw an ad in QST Advertising Luke Power supplies. I beleive they were
based out of Michigan. Anyhow, They mostly made commercial power
supplies... But they made a few models aimed at the Ham Radio people. and
I've asked around and no one seems to know what happened to the company,
does anyone know if the company still exists?

and if so, do they have a website? and a number?

Please help me here!

Thanks,

I have one GE Delta S low-band (42 - 50Mhz) 100 watt with 8 channel control head, cable, speaker, and mic. Programmable so no crystals involved. Easy conversion to 6 meters, just program it!. Capable of up to 128 channels.

$130.00/obo. US Postal Service money order as payment. Shipping not included.

Hi,
I have a Regency SSB mobile CB that has been converted to 10M SSB. Output is about 16W pep. Receive sensitivity is 0.25 microvolt or better. Freq coverage is 28.5-28.8, with a VFO "slider" to cover all the "gaps" that will slide down about 6 and up about 14 Khz. Includes power cord and original microphone. $65 + shipping.

thanks,
Joe
K7JOE

Hi All,
```

I found out where Luke Electronics is or shall I say WAS... Seem they went out of business... My next question is why? They had excellent products. Anyone know the story on this company? They were based in Lake City, Michigan, are the owners still around? if anyone knows the story as to what happened, please e-mail me...

We have a mixture of hollow- and solidstate radios and test equipment available to go to new homes. All prices are in US Dollars and do not include shipping. Please call (403.247.4396) or email for details.

ANTENNAS
KIWA Pocket Loop, $75

Palomar base with BCB Antenna, $100

RADIOS

AOR 7030 $800

Kenwood R5000 $695

Marconi CSR5A (general coverage receiver works extremely well, very sensitive, s-meter added to front panel) $150

Marconi Electra (striking receiver appearance-wise, works, very difficult to find, overall cosmetics very good. This receiver has been modified to accomodate a professionally constructed internal power supply which has been fitted inside the original manufacturer's cabinet, works.) $400

Pye Model 39HC (British-made wood cabinet receiver, works, dial excellent, overall very good condition) $250

Hallicrafters SX-23 (Typically very difficult to find especially in fine cosmetic and working condition. This Hallicrafters model was manufactured for a short period of time; I believe one year. Raymond Lowey is believed to have been involved in the design of this uniquely attractive receiver. The gray painted chassis is original and is in excellent condition as is the overall receiver. Easily a 9 on a scale of 1 to 10) $575

Hallicrafters SX 28A (Have seen at least a dozen nice examples of this model receiver. This receiver has the nicest knobs of any SX-28 we've ever seen. I'd call them a 9 on a scale of 1 to 10. The front panel has had a toggle switch added (alongside the BASS toggle)-- it's been extremely well done, tho I don't know what it is supposed to do. On a scale of 1 to 10, the legends, front panel, etc. are an easy 9. BTW, it's also marked SX-28A on the front panel. Internally the receiver has been modified -- one mod is a Collins filter addition, audio mods are apparent as well. Works but needs electrical restoration.) $200

Hallicrafters SkyBuddy S19R (One of the earlier Hallicrafters, still has original speaker grille flocking, very good cosmetic condition) $125

Hammarlund HQ 145A (Double conversion, similar appearance to HQ 180, no clock, chassis immaculate, front panel excellent, perforated-design cabinet ala HQ-180 has some minor scratches) $175

RCA AR88 LF (Black wrinkle boatanchor that carries an equally weighty reputation as one of the best superhets ever. National S-meter has been added, receiver works but has not had cosmetic or electrical restoration, also has a cabinet.) $200

RCA BP61X (Vacuum tube lunchbox-style portable, works, cosmetics 8.5 on scale of 1 to 10) $75

RCA A-3 (Wood cabinet receiver, recently tuned, good condition, works very well) $75

Breting 14 (Newly powder-coated cabinet, mirror excellent, escutcheon very nice, this 1930's vintage radio hasn't been restored electrically yet) $350

Patterson PR-16 (Cosmetics very good, recapped, suprisingly sensitive receiver with a unique look) $425

Stromberg Carlson Model 874 (Wood cabinet, battery operated set in good condition, untested) $50

Phillips (Small maroon bakelite tabletop shortwave receiver in very nice condition, excellent reception, great little receiver on SW bands) $65

TEST EQUIPMENT
Hickok Model 156 Traceometer w/probes. Very good condition, works. Manual copy. $150

Hickok 288-X in good condition, one escutcheon is broken off at top edge but luckily it doesn't make it look terrible from a cosmetic standpoint. Very nice condition overall. Manual copy. $65

Heathkit IM-58 Harmonic Distortion Meter in good condition, works, $45

Hewlett-Packard Model 5328A Universal Counter w/HP-IB IO Opt. 011 and Opt. H99 (TCXO) in good condition, works $550

RCA Chanalyst w/probes and manual copy. Works and is in very nice condition. $150

Starkit Sweep Marker Generator is in very nice condition, $15

Simpson Model 480 Genescope with original manual. $75

Singer Spectrum Analyzer, MF-5 w/VR4 Module. Very good condition, works and has manual from Tucker. $135

Heathkit IO-102 Scope (works, manual copy available and is in nice cosmetic condition) $45

I'm looking primarily for the cable alone and not the whole kit
that Yaesu sells for all of their radios. The stand alone cables were
sold before the whole kits. But I'll seriously concider all offers and
all cable kits.

Can an ADMS interface cable be used to program Yaesu FTH-7008 radios, assuming that the user has the appropriate programming software, and a homemade adaptor to convert from the 3.5mm stereo plug to a 2.5mm mono plug?

If so, what's the schematic for the homemade adaptor cable to be used with the ADMS cable?

Yaesu FT 1000D in absolutely mint, out-of-the-box condition. Hardly used due to lack of time and other commitments. Would be surprised if used more than 75-100 hours in total. I am original owner and have manuals and original packaging for the unit. Price also includes new Yaesu compatible speaker (with filters) and desk microphone.

Hate to sell but unit needs a new home and Owner willing to make better use of it that I have.

Will sell for $3400 U.S. plus shipping. Condition warrants price.

For Sale: ICOM R71A shortwave receiver. Excellent condition, some scratches on top. Just gone through by ICOM dealer. Though it is no longer in production this is still the benchmark that they compare others to. For those unfamiliar with this radio it resembles an Amateur Radio HF transceiver - so it is a �base' rather than a portable (though it will run mobile). It has coverage from 100 Khz shrough 30 Mhz, has AM/FM/USB/LSB/CW/RTTY, noise blanker, AGC, memory scan,multiple filters,attenuator, dual VFO memory, etc. Dealers sell this radio used for $600 to $700.

Asking $450 firm, payment by postal money order. I pay your choice of USPS or UPS shipping. Sorry, so sales outside US contiguous 48. No trades. If interested please respond by Email.

I have for sale the following-

Icom IC-V100 Commercial VHF 16 Ch. Radio with EX-494 Programmer.
Currently programmed in the 2 Meter ham band.
CTCSS Encode and Decode.
35 Watts (That is what is on the radio tag but actually puts out 45 Watts.)
A 6 on a scale of 1 to 10 (Would be an 8 but it has a small notch cutout for the programming cable)
I have a copy of the programming manual.
$150.00 Plus Shipping

Kantronics Data Engine
Has both 1k2 an 9k6 Modems
In good shape.
$125.00 Plus Shipping
(Note: No it does not do Pactor or any of the HF modes, It is high speed packet or Node use.)

Radio Shack DX-394 Communications Receiver
150 kHz to 29.999 MHz
AM,LSB,USB,CW
LCD Display
9 on a scale of 1 to 10
$150.00 Plus Shipping

I can send JPEG's of any of the items.
Email me @

I have eight Motorola Micor low-band (42 - 50Mhz), 100 watt radios. Model # T71RTN-3190A. They are four channel and come with channel elements, control head, cable, speaker, and mic. Easy conversion to 6 meter---- recrystal the channel element.

OR, use the power amp in the radio to build a PA for your 6meter HT. Schematic included.

$70.00/obo each. US Postal Service money order as payment. Shipping not included. Shipping weight is 37 pounds from zip 93309.

This rig has been out of the box once. I don't really need 6-160 meter rig. Would like to have a good, rated 7 to 10, 6 meter all-mode rig (prefer Kenwood T-60S or similiar).

Anyone willing to make a fair trade?

I have the following for sale:

1 Kenwood TR-7950 2mtr mobile with mic, no bracket or manual, $65.00. Works great, volume pot is noisy, very good condition

1 Kenwood TM-731A 2mtr/440 dual band mobile with mic, manual and duplexer, no bracket. $120.00. Works great, very good condition, can do crossband repeat

1 Alinco DJ-S41T micro 440 handheld, new, manual, box, warranty card. $65.00. Would work well in a city environment, doesn't quite cut the mustard out in the sticks where I am!

Please email billp@idsely.com if interested. Prices include shipping.

73,

Bill KD7AVW

Haven't seen this one since it hit the paket networks 2 years ago and
caused everyone to get excited.
Troll !!

Don

Hi Bill!

I would really like your portable (UHF) is it still available??

Michael
